<i>Preface</i>	ix
How to use this book if you are a student	x
How to use this book if you are an instructor	x
<i>Acknowledgements</i>	xi
PART I: BASIC STATISTICAL IDEAS	1
1. Basic concepts of quantification and number	3
1.1 <i>Why quantify?</i>	4
1.2 <i>What is a number?</i>	6
1.3 <i>Classifying numbers</i>	11
1.4 <i>Converting nominal measures into continuous numbers</i>	17
1.5 <i>Fractions, decimals and percentages</i>	18
1.6 <i>How you express probability with numbers</i>	18
1.7 <i>Summary</i>	20
1.8 <i>References</i>	21
2. Designing research projects which count things	22
2.1 <i>Introduction: the dinner party experience</i>	22
2.2 <i>Designing a quantitative research project</i>	25
2.3 <i>Data collection example: working with questionnaires</i>	31
2.4 <i>Data collection example: the experimental approach</i>	36
2.5 <i>Data collection example: working with corpus data</i>	38
2.6 <i>Describing your data</i>	40
2.7 <i>Designing a study so that a statistical test is possible</i>	44
2.8 <i>What do we mean by data?</i>	47
2.9 <i>Summary</i>	47
2.10 <i>References</i>	48

PART II: ASKING AND ANSWERING QUANTITATIVE QUESTIONS	51
3. Survey of the sexiness of Klingon: is your data normal?	55
3.1 <i>The research story</i>	55
3.2 <i>Designing the study to collect numerical data</i>	55
3.3 <i>Data collection</i>	56
3.4 <i>Describing the data with numbers</i>	57
3.5 <i>Describing the data with pictures</i>	59
3.6 <i>Drawing statistical conclusions from the data</i>	65
3.7 <i>References</i>	65
4. Who speaks Low German with their children? Visualisation – describing words with pictures	67
4.1 <i>The research story</i>	67
4.2 <i>The role of visualisation</i>	68
4.3 <i>Tables</i>	69
4.4 <i>Charts and graphs</i>	71
4.5 <i>When visualisations mislead</i>	74
4.6 <i>Boxplot graphs</i>	75
4.7 <i>Summary</i>	76
4.8 <i>References</i>	77
5. Whose English uses more present perfect? Comparison of two groups where the data is not normally distributed – Mann-Whitney U test	78
5.1 <i>The research story</i>	78
5.2 <i>The data</i>	79
5.3 <i>Descriptive statistics</i>	80
5.4 <i>A follow-on research story? Identifying words that might merit further investigation</i>	86
5.5 <i>Summary</i>	90
5.6 <i>References</i>	91
6. Is there a difference in the way ‘ing’ is pronounced by people from Birmingham and the Black Country? Testing for difference using chi square	92
6.1 <i>The research story</i>	92
6.2 <i>Designing your research to make the analysis easy</i>	95
6.3 <i>The data</i>	96
6.4 <i>Answering the question with chi square analysis</i>	100
6.5 <i>Summary</i>	101

7. Do letter writers tend to use nouns and verbs together?	
Scatterplots and correlation of linear data	103
7.1 <i>The research story</i>	103
7.2 <i>Designing your research to make the analysis easy</i>	104
7.3 <i>The data</i>	105
7.4 <i>Answering the question using a Pearson's correlation analysis</i>	110
8. Does the use of pronouns differ between two academic disciplines? Using t-tests to compare two groups	113
8.1 <i>The research story</i>	113
8.2 <i>Designing your research to make the analysis easy</i>	114
8.3 <i>The data</i>	115
8.4 <i>Answering the question with a t-test</i>	121
8.5 <i>Summary</i>	123
9. Do different academic subjects have distinctive patterns of pronoun use? Comparison between three or more groups – one-way ANOVA	125
9.1 <i>The research story</i>	125
9.2 <i>Designing your research to make the analysis easy</i>	126
9.3 <i>The data</i>	126
9.4 <i>Answering the question with an ANOVA</i>	130
9.5 <i>Discussion</i>	132
10. Asking and answering quantitative questions: conclusions	133
10.1 <i>How to ruin your research project (and how to succeed with it)</i>	134
<i>Glossary</i>	137
<i>Index</i>	149
