Preface	v
Conference Participants	vi
Generalizations of Q -systems and orthogonal polynomials from representation theory	
D. ADDABBO and M. BERGVELT	1
Some applications and constructions of intertwining operators in logarithmic conformal field theory	
D. ADAMOVIĆ and A. MILAS	15
Kac-Moody groups and automorphic forms in low dimensional supergravity theories	
L. BAO and L. CARBONE	29
The Lusztig-Macdonald-Wall polynomial conjectures and q -difference equations	
K. BRINGMANN, K. MAHLBURG, and A. MILAS	41
Uniqueness of representation-theoretic hyperbolic Kac-Moody groups over \mathbb{Z}	
L. CARBONE and F. WAGNER	51
Cocycles in conformal field theory	
J. FUCHS and C. SCHWEIGERT	65
Remarks on ϕ -coordinated modules for quantum vertex algebras	
H. LI	83
The classification of chiral WZW models by $H_+^4(BG, \mathbb{Z})$	
A. HENRIQUES	99
Some open problems in mathematical two-dimensional conformal field theory	
Y.-Z. HUANG	123
On realization of some twisted toroidal Lie algebras	
N. JING, C. MANGUM, and K. MISRA	139
Twisted generating functions incorporating singular vectors in Verma modules and their localizations, I	
J. LEPOWSKY and J. YANG	149
Characterization of the simple Virasoro vertex operator algebras with 2 and 3-dimensional space of characters	
Y. ARIKE, K. NAGATOMO, and Y. SAKAI	175

Quasiconformal Teichmüller theory as an analytical foundation for two-dimensional conformal field theory	
D. RADNELL, E. SCHIPPERS, and W. STAUBACH	205
Centralizing the centralizers	
A. M. SEMIKHATOV	239
On Neeman's Gradient Flows	
N. WALLACH	261
