

# Contents

<b>1</b>	<b>Introduction: Encountering the Problem</b>	<b>1</b>
<b>2</b>	<b>Problem Identification: Theoretical Concepts</b>	<b>5</b>
2.1	Transition to Tertiary Education in Mathematics . . . . .	5
2.1.1	Characterising transition processes . . . . .	6
2.1.2	Learning mathematics at university . . . . .	11
2.1.3	Approaches to overcome transition problems . . . . .	43
2.1.4	Specificities of engineering mathematics . . . . .	50
2.1.5	Projects at other universities . . . . .	54
2.1.6	Engineering courses at RUB . . . . .	60
2.2	Learning Strategies . . . . .	67
2.2.1	Questionnaires for assessing learning strategies . . . . .	69
2.2.2	Origin and structure of the LIST questionnaire . . . . .	71
<b>3</b>	<b>Research Approach and Objectives</b>	<b>77</b>
3.1	The <i>Design Research Approach</i> . . . . .	77
3.2	Project Conditions . . . . .	83
3.3	Research Questions . . . . .	86
<b>4</b>	<b>Design Development</b>	<b>91</b>
4.1	MP <sup>2</sup> -Math/Plus Conception . . . . .	91
4.2	Designing the First Project Cycle . . . . .	94
4.3	Math/Plus Procedures . . . . .	96
4.3.1	Grouping of applicants . . . . .	97
4.3.2	Preparatory tutorials ( <i>Vorbereitungsübungen</i> ) . . . . .	97
4.3.3	MP <sup>2</sup> -Math/Plus HelpDesk . . . . .	100
4.3.4	Learning diary . . . . .	100
4.3.5	e-Learning course . . . . .	101
4.3.6	Revision course ( <i>Repetitorium</i> ) . . . . .	101
4.4	The First Project Cycle in Retrospect . . . . .	101

4.5	Consequences and Re-Design . . . . .	105
4.5.1	Learning groups . . . . .	107
4.5.2	Linking project procedures . . . . .	109
4.5.3	Mentors . . . . .	110
4.5.4	LearningLog . . . . .	111
4.5.5	E-learning 2.0 . . . . .	112
4.5.6	Social networks . . . . .	112
4.5.7	Mock test ( <i>Probeklausur</i> ) . . . . .	113
4.5.8	Workbooks ( <i>Arbeitsbücher</i> ) . . . . .	115
4.5.9	Revision course ( <i>Repetitorium</i> ) . . . . .	117
4.5.10	MP <sup>2</sup> -Math/Plus HelpDesk revisited . . . . .	119
4.6	Further Project Cycles . . . . .	120
4.6.1	LearningLog online . . . . .	122
4.6.2	Online tools in later project cycles . . . . .	124
4.6.3	Focus on facebook . . . . .	126
<b>5</b>	<b>Evidence Level: Methodology and Results</b>	<b>127</b>
5.1	Applications for MP <sup>2</sup> -Math/Plus . . . . .	128
5.2	Sample Description . . . . .	131
5.3	Students' Views on MP <sup>2</sup> -Math/Plus . . . . .	136
5.4	Attrition Rates . . . . .	140
5.5	Examination Statistics . . . . .	143
5.5.1	Gender aspects . . . . .	144
5.5.2	MP <sup>2</sup> -Math/Plus project participation . . . . .	148
5.5.3	Summary . . . . .	152
5.6	Structure and Viability of LIST Data . . . . .	152
5.6.1	Internal reliability . . . . .	153
5.6.2	Subsuming aspects of learning behaviour . . . . .	154
5.6.3	Exploring the model fit . . . . .	159
5.6.4	Summary . . . . .	161
5.7	Learning Strategies and Academic Success . . . . .	162
5.7.1	Data pool and descriptive statistics . . . . .	162
5.7.2	Appraising prior skills . . . . .	164
5.7.3	Testing different linear models . . . . .	167
5.7.4	Inspecting the final model . . . . .	169
5.7.5	Screening for possible mediators . . . . .	172

---

5.7.6	Assessing potential moderators . . . . .	172
5.7.7	Summary . . . . .	173
5.8	Development of Learning Strategies . . . . .	174
5.8.1	Data characteristics and properties . . . . .	174
5.8.2	Pre-post comparisons . . . . .	179
5.8.3	Influence of MP <sup>2</sup> -Math/Plus project participation . . . . .	184
5.8.4	Summary . . . . .	187
<b>6</b>	<b>Project Evaluation: Summary and Discussion</b>	<b>189</b>
6.1	Project Conceptualisation and Development . . . . .	189
6.1.1	First-year engineering students . . . . .	190
6.1.2	Selected project procedures . . . . .	191
6.1.3	Students' progression at university . . . . .	194
6.2	Impact of Learning Strategies . . . . .	195
6.2.1	Preliminary considerations . . . . .	195
6.2.2	Interpretation of the final model . . . . .	196
6.3	Development of Learning Strategies . . . . .	199
6.3.1	Reflections on the pre-post scenario . . . . .	199
6.3.2	Learning strategies related to motivation . . . . .	200
6.3.3	Other learning strategies . . . . .	201
6.3.4	Résumé . . . . .	202
6.4	Concluding Remarks and Outlook . . . . .	202
	<b>References</b>	<b>205</b>
	<b>Appendices</b>	<b>239</b>
A	Questionnaires Containing LIST . . . . .	239
B	LIST Questionnaire, English . . . . .	254
C	Evaluation Survey 2010/2011 . . . . .	263
D	Learning Diary 2010/2011 . . . . .	266
E	Support Agreement from the Second Project Cycle . . . . .	270
F	Questions to the Mentors . . . . .	272
G	Workbook Topics . . . . .	275
H	Further Tables for Examination Statistics . . . . .	277
I	LIST Items and Loadings for Nine Factors . . . . .	280
J	Graphs and Statistics for Paired Samples . . . . .	284
