

CONTENTS

Acknowledgments vii

Contributors ix

1. Introduction 1

Abdulrahman M. El-Sayed

SECTION 1 Simplicity, Complexity, and Population Health

2. Reductionism at the Dawn of Population Health 9

Kristin Heitman

3. Wrong Answers: When Simple Interpretations Create
Complex Problems 25

David S. Fink and Katherine M. Keyes

4. Complexity: The Evolution Toward 21st-Century Science 37

Anton Palma and David W. Lounsbury

5. Systems Thinking in Population Health Research and Policy 49

Stephen J. Mooney

SECTION 2 Methods in Systems Population Health

6. Generation of Systems Maps: Mapping Complex Systems
of Population health 61

Helen de Pinho

7. Systems Dynamics Models 77

Eric Lofgren

8. Agent-Based Modeling 87

Brandon D. L. Marshall

9. Microsimulation 99

Sanjay Basu

10. Social Network Analysis 113

Douglas A. Luke, Amar Dhand, and Bobbi J. Carothers

SECTION 3 Systems Science Toward a Consequential Population Health

11. Machine Learning 129

James H. Faghmous

12. Systems Science and the Social Determinants of Population Health 139

David S. Fink, Katherine M. Keyes, and Magdalena Cerdá

**13. Systems Approaches to Understanding How the Environment Influences
Population Health and Population Health Interventions 151**

Melissa Tracy

14. Systems of Behavior and Population Health 167

Mark G. Orr, Kathryn Ziemer, and Daniel Chen

15. Systems Under Your Skin 181

Karina Standahl Olsen, Hege Bøvelstad, and Eiliv Lund

16. Frontiers in Health Modeling 191

Nathaniel Osgood

17. Systems Science and Population Health 217

Abdulrahman M. El-Sayed and Sandro Galea

Index 221
