<b>The Ernst Strüngmann Forum</b>	<b>vii</b>
<b>List of Contributors</b>	<b>ix</b>
<b>Introduction</b>	
<b>1 On the Cusp: Current Challenges and Promises in Psychiatry</b>	<b>3</b>
<i>Joshua A. Gordon and A. David Redish</i>	
<b>2 Breakdowns and Failure Modes: An Engineer's View</b>	<b>15</b>
<i>A. David Redish and Joshua A. Gordon</i>	
<b>Open Issues in Psychiatry</b>	
<b>3 Complexity and Heterogeneity in Psychiatric Disorders: Opportunities for Computational Psychiatry</b>	<b>33</b>
<i>Nelson Totah, Huda Akil, Quentin J. M. Huys, John H. Krystal, Angus W. MacDonald III, Tiago V. Maia, Robert C. Malenka, and Wolfgang M. Pauli</i>	
<b>4 What Does Computational Psychiatry Need to Explain to Capture Mechanisms of Psychopathology? Facts, Almost Facts, and Hints</b>	<b>61</b>
<i>Deanna M. Barch</i>	
<b>Computation</b>	
<b>5 Computational Approaches for Studying Mechanisms of Psychiatric Disorders</b>	<b>77</b>
<i>Zeb Kurth-Nelson, John P. O'Doherty, Deanna M. Barch, Sophie Denève, Daniel Durstewitz, Michael J. Frank, Joshua A. Gordon, Sanjay J. Mathew, Yael Niv, Kerry Ressler, and Heike Tost</i>	
<b>6 Computational Cognitive Neuroscience Approaches to Deconstructing Mental Function and Dysfunction</b>	<b>101</b>
<i>Michael J. Frank</i>	
<b>7 How Could We Get Nosology from Computation?</b>	<b>121</b>
<i>Christoph Mathys</i>	
<b>Nosology</b>	
<b>8 Current State of Psychiatric Nosology</b>	<b>139</b>
<i>Michael B. First</i>	
<b>9 The Computation of Collapse: Can Reliability Engineering Shed Light on Mental Illness?</b>	<b>153</b>
<i>Angus W. MacDonald III, Jennifer L. Zick, Theoden I. Netoff, and Matthew V. Chafee</i>	

<b>10</b>	<b>A Novel Framework for Improving Psychiatric Diagnostic Nosology</b> <i>Shelly B. Flagel, Daniel S. Pine, Susanne E. Ahmari, Michael B. First, Karl J. Friston, Christoph Mathys, A. David Redish, Katharina Schmack, Jordan W. Smoller, and Anita Thapar</i>	<b>169</b>
<b>11</b>	<b>Computational Nosology and Precision Psychiatry: A Proof of Concept</b> <i>Karl J. Friston</i>	<b>201</b>
<b>Exemplars</b>		
<b>12</b>	<b>Candidate Examples for a Computational Approach to Address Practical Problems in Psychiatry</b> <i>Rosalyn Moran, Klaas Enno Stephan, Matthew Botvinick, Michael Breakspear, Cameron S. Carter, Peter W. Kalivas, P. Read Montague, Martin P. Paulus, and Frederike Petzschn</i>	<b>223</b>
<b>13</b>	<b>There Are No Killer Apps but Connecting Neural Activity to Behavior through Computation Is Still a Good Idea</b> <i>P. Read Montague</i>	<b>247</b>
<b>14</b>	<b>Call for Pragmatic Computational Psychiatry: Integrating Computational Approaches and Risk-Prediction Models and Disposing of Causality</b> <i>Martin P. Paulus, Crane Huang, and Katia M. Harlé</i>	<b>259</b>
<b>15</b>	<b>A Valuation Framework for Emotions Applied to Depression and Recurrence</b> <i>Quentin J. M. Huys</i>	<b>275</b>
<b>16</b>	<b>Clinical Heterogeneity Arising from Categorical and Dimensional Features of the Neurobiology of Psychiatric Diagnoses: Insights from Neuroimaging and Computational Neuroscience</b> <i>John H. Krystal, Alan Anticevic, John D. Murray, David Glahn, Naomi Driesen, Genevieve Yang, and Xiao-Jing Wang</i>	<b>293</b>
<b>Conclusion</b>		
<b>17</b>	<b>From Psychiatry to Computation and Back Again</b> <i>A. David Redish and Joshua A. Gordon</i>	<b>319</b>
<b>Bibliography</b>		<b>331</b>
<b>Subject Index</b>		<b>401</b>
