Table Register	15
Abbreviation Register	17
Introduction: Assignments, activities, and objectives of the European Union and the European Monetary Union	19
Part 1: Basic Structure of Monetary Systems in Market Economies	21
1. Central Bank	22
2. Credit Institutions	25
3. “Noncredit Economic” Economy Units	25
4. Government	25
5. Lobbyists	26
6. Control of Economy by Means of Monetary Policies	26
6.1 Interest Control According to Keynes	27
6.2 Monetary Control by Quantity Theoreticians and Monetarists	28
6.3 Liquidity Control of Liquidity Theoreticians	31
6.4 Mixture of Three Control Mechanisms in Practical Monetary Policies	32
6.5 Consequences arising from a Mixture of Three different aligned Approaches	32
Part 2: Functions of Money respectively Euro	37
1. Money, Additional Good to Exchange other Goods	37
2. Euro, Currency in European Monetary Union and Functions	37
2.1 Euro as Accounting Unit	38
2.2 Euro, an Exchange-Medium	38
2.3 Euro as a Store-of-Value Medium	39
2.4 Compliance of Money Functions with Euro	39
3. Evaluations of Euro	40
3.1 Euro as “teuro”	40
3.2 Euro, an Accelerator	45
3.3 Impact of Introduction of Euro on Existing Equilibria	46

Part 3: Conditions for Monetary Security	49
1. Money Value Stability	49
2. Money Neutrality	51
2.1 Discussion about Money Neutrality	54
2.2 Importance of Money Neutrality	55
3. Counterfeit Protection	56
3.1 Technical Counterfeit Protection	57
3.2 Contribution of Economy to Counterfeit Protection	57
4. Evaluation of Euro	58
Part 4: Changes in Monetary System by Introducing Euro	61
1. Changes in Money Amount Control Theories	61
2. Changes in Practical Implementation of Monetary Policies	61
2.1 Many States with Different Economic Structures	68
2.2 Many Central Banks in European System of Central Banks	68
3. Can Convergence Criteria Guarantee Functions and Security of Euro?	68
4. Can Stability- and Growth Pact Guarantee Functions and Security?	71
5. Change of Stability- and Growth Pact by Six-Pack	72
6. No Equilibria and Missing Harmonization	73
7. Stability versus Growth	74
8. No Unlimited Growth	76
9. Summary	77
Part 5: Alternative Suggestions to secure the Euro - not leading to an Equilibrium	79
1. Rescue package	79
1.1 European Financial Stabilization Mechanism (EFSM)	80
1.2 European Financial Stabilization Facility (EFSF)	80
1.3 European Stability Mechanism (ESM)	81
1.4 The European Fiscal Pact	82
1.5 Bilateral Credits of EU-Member States	82
1.6 Evaluating Set of Measures of Euro-Rescue Package	83
2. Exit from Euro System	83
2.1 Greek Exit	84
2.2 Federal Republic of Germany Exit	84
3. Euro - Parallel Currency	84
4. Dual Currency Union	85
5. Euroization	86
6. European Fiscal Union or Political Union	87
7. Conclusion	88

Part 6: Is there a Monetary System for a better Theoretical Basis than the Combination of Keynes Monetary Theory and Monetarism Available?	89
1. Interest Control Weaknesses	89
2. Money Control Weaknesses	89
3. Effects of Cash-Management Theory on Money Amount Control	90
4. Mistakes made by Money Amount Policy Introduction	91
5. Money Amount Control According to Quantity Theory and Monetarism	91
6. Interest Control According to Model set up by Keynes	98
7. Own Approach to Money Control Based on Value Related Production Function	101
7.1 Detailed Consideration of Goods Market	105
7.2 Forecast of Money Amount	106
7.2.1 General Forecast Issue	106
7.2.2 Forecast Issues of Money Amount	107
7.3 Determining the Turnover Rate of Money	108
7.3.1 Determining the Turnover Rate of Money in Equilibrium	111
7.3.2 Determining the Turnover Rate of Money in Disequilibrium	113
7.4 There is an amazing Conclusion based on an Equilibrium Model: It also Functions without the Payment Media Money	114
7.5 How are Macroeconomic Equilibria Created?	115
7.6 Conclusion	116
Part 7: Estimating the Security of the Euro	119
1. Estimating Euro Stability	120
2. Estimation of Euro Neutrality	122
3. Estimating Counterfeit Protection of Euro	124
4. Estimation of Risk Potential of Current Security Standard of Euro	130
Part 8: Consequences for Politics	133
1. Euro Relatively Secure	134
2. Security can still be Improved	134
3. Absolute Security Impossible	134
4. Hazard Potential Externally of Monetary System	134
4.1 No Complete Harmonization	135
4.2 High Level of National Debt	135
4.3 High Levels of Subsidies	136
5. Peace - Most Important Factor	136

Annexes	137
Annex 1: Introduction of euro into the EMU-Member States	137
Annex 2: Development of the Velocity of Money	139
Annex 3: Development of inflation in the Federal Republic of Germany ...	145
Annex 4: Graphic presentation of internal risk potential of the security of the euro	147
Annex 5: Formulas	149
Literature	155
Subject Index	165
