

Aus dem Zentralinstitut für Seelische Gesundheit  
der Medizinischen Fakultät Mannheim der Universität Heidelberg  
(Direktor: Prof. Dr. Andreas Meyer-Lindenberg)

**The role of schizophrenia susceptibility candidate gene miR137 in  
psychiatric diseases**

Inauguraldissertation  
zur Erlangung des medizinischen Doktorgrades  
der  
Medizinischen Fakultät Mannheim  
der Ruprecht-Karls-Universität  
zu  
Heidelberg

vorgelegt von  
**Ping Zhang**  
aus  
**Zhangshu (China)**  
2016

Tag der mündlichen Prüfung:

19. OKT. 2016

# INDEX

	Page
ABBREVIATIONS.....	1
1. INTRODUCTION.....	4
1.1. Schizophrenia (SCZ) .....	4
1.1.1. Epidemiology.....	4
1.1.2. Clinical manifestations.....	4
1.1.3. Etiology.....	4
1.2. Micro RNAs (miRNAs) and SCZ.....	5
1.2.1. Micro RNAs .....	5
1.2.2. MiRNAs and SCZ .....	7
1.3. Micro RNA 137 (miR137) and SCZ.....	7
1.3.1. MiR137 .....	7
1.3.2. MiR137 and SCZ.....	8
1.4. MiR137 overexpression model .....	8
1.4.1. Conditional miR137 transgenic rat line (miR137 <sup>cond</sup> ) .....	9
1.4.2. MiR137 overexpression transgenic rat line (miR137 TG).....	11
1.5. Behavioral findings of miR137 overexpression transgenic rat line....	11
1.6. Aim of the study .....	12
2. MATERIAL AND METHODS.....	13
2.1. Material .....	13
2.1.1. Equipments .....	13
2.1.2. Chemicals and solutions.....	13
2.1.3. Kits .....	14
2.1.4. Primers and oligonucleotides .....	15
2.2. Methods.....	15
2.2.1. Generation of the miR137 overexpression rat model .....	15
2.2.1.1. Plasmid DNA extraction.....	15
2.2.1.2. Genomic DNA extraction .....	16

2.2.1.3. PCR.....	17
2.2.1.4. Agarose gel electrophoresis .....	18
2.2.2. Quantification of miR137 overexpression .....	19
2.2.2.1. RNA extraction .....	19
2.2.2.2. DNA digestion .....	19
2.2.2.3. miRNA reverse transcription.....	20
2.2.2.4. qRT-PCR to detect miRNA.....	21
2.2.3. Immunohistochemistry (IHC) of miR137 overexpression transgenic rats' brain .....	22
2.2.3.1. Perfusion fixation.....	22
2.2.3.2. Preparation of brain sections.....	23
2.2.3.3. DAB staining .....	23
2.2.3.4. Double fluorescence IHC .....	25
2.2.4. Neurochemistry of miR137 overexpression transgenic rats' brain .....	26
2.2.4.1. Brain tissue punch.....	26
2.2.4.2. High performance liquid chromatography (HPLC).....	27
2.2.5. Microarray analyses of miR137 overexpression transgenic rats' brain .....	28
2.2.5.1. Total RNA isolation .....	28
2.2.5.2. Microarray chip analyses.....	29
2.2.6. Statistics .....	29
<b>3. RESULTS .....</b>	<b>30</b>
3.1. Generation of the miR137 overexpression rat model.....	30
3.1.1. Deletion of the STOP cassette in miR137 <sup>cond</sup> rats .....	30
3.2. Quantification of miR137 overexpression in the brain of miR137 overexpression transgenic rats.....	31
3.3. L10a-eGFP expression in the brain of miR137 overexpression transgenic rats .....	32
3.3.1. DAB staining of GFP in the brain of miR137 overexpression transgenic rats.....	32
3.3.2. Double fluorescence IHC of GFP and NeuN in the brain of miR137 overexpression transgenic rats .....	33

3.4. Neurochemistry of miR137 overexpression transgenic rats' brain ....	34
3.5. Microarray analyses of miR137 overexpression transgenic rats' brain .....	37
3.5.1. Scatter plot and volcano plot .....	38
3.5.2. Gene expression higher or lower in miR137 TG group than in control group .....	38
4. DISCUSSION .....	44
4.1. MiR137 and SCZ .....	44
4.2. Construction of a miR137 overexpression rat model .....	45
4.3. Neurochemistry data.....	47
4.4. Target genes of miR137.....	48
4.5. Prospects.....	49
5. SUMMARY .....	51
6. BIBLIOGRAPHY .....	52
7. SUPPLEMENTAL DATA .....	63
8. CURRICULUM VITAE .....	71
9. ACKNOWLEDGEMENT .....	73
