Detailed Contents

<i>Preface</i>	xvii
<i>About the Author</i>	xix
1 History, Background, and Basic Concepts	1
The Search for General Principles of Learning	2
The Associationists	4
<i>Aristotle</i>	4
Box 1.1 Applying the Research. A Demonstration of Free Association	5
<i>The British Associationists: Simple and Complex Ideas</i>	5
<i>Ebbinghaus's Experiments on Memory</i>	8
<i>The Influence of the Associationists and Ebbinghaus</i>	10
Behavioral and Cognitive Approaches to Learning	11
<i>The Use of Animal Subjects</i>	11
<i>Ethical Issues and Animal Research</i>	12
<i>The Emphasis on External Events</i>	13
Brain and Behavior	16
<i>The Basic Characteristics of Neurons</i>	16
<i>Simple Sensations</i>	17
<i>Feature Detectors</i>	19
<i>The Neuroscience of Learning</i>	20
Chemical Changes	20
Growth of New Synapses	21
Growth of New Neurons	22
Where Are "Complex Ideas" Stored in the Brain?	22
Summary	24
Review Questions	25
References	26

2	Innate Behavior Patterns and Habituation	29
	Characteristics of Goal-Directed Systems	30
	Reflexes	31
	Tropisms	32
	<i>Kineses</i>	32
	<i>Taxes</i>	33
	Sequences of Behavior	34
	<i>Fixed Action Patterns</i>	34
	<i>Reaction Chains</i>	35
	Innate Human Abilities and Predispositions	37
	Box 2.1 Spotlight on Research. We Have a Lot in Common: Human Universals	39
	Habituation	40
	<i>General Principles of Habituation</i>	42
	Box 2.2 Spotlight on Research. Habituation and Psychological Functioning	44
	<i>Neural Mechanisms of Habituation</i>	44
	<i>Habituation in Emotional Responses: The Opponent-Process Theory</i>	47
	The Temporal Pattern of an Emotional Response	47
	The a-Process and b-Process	49
	The Effects of Repeated Stimulation	50
	Other Emotional Reactions	50
	A Brief Evaluation	51
	Summary	52
	Review Questions	53
	References	53
3	Basic Principles of Classical Conditioning	56
	Pavlov's Discovery and Its Impact	56
	<i>The Standard Paradigm of Classical Conditioning</i>	57
	<i>The Variety of Conditioned Responses</i>	58
	Eyeblink Conditioning	58
	Conditioned Suppression	59
	The Skin Conductance Response	59
	Taste-Aversion Learning	60
	<i>Pavlov's Stimulus Substitution Theory</i>	60
	<i>What Is Learned in Classical Conditioning?</i>	61
	Basic Conditioning Phenomena	63
	<i>Acquisition</i>	63
	<i>Extinction</i>	64
	<i>Spontaneous Recovery, Disinhibition, and Rapid Reacquisition</i>	64
	<i>Conditioned Inhibition</i>	66
	<i>Generalization and Discrimination</i>	67
	Box 3.1 Spotlight on Research. Classical Conditioning and the Immune System	68
	The Importance of Timing in Classical Conditioning	69
	<i>CS-US Correlations</i>	71
	Second-Order Conditioning	72
	Classical Conditioning Outside the Laboratory	73
	<i>Classical Conditioning and Emotional Responses</i>	73
	<i>Applications in Behavior Therapy</i>	74

Systematic Desensitization for Phobias	74
Box 3.2 Applying the Research. Virtual Reality Therapy	75
Aversive Counterconditioning	76
Treatment of Nocturnal Enuresis	78
Summary of the Classical Conditioning Therapies	78
Summary	79
Review Questions	80
References	80
4 Theories and Research on Classical Conditioning	84
Research and Theories on Associative Learning	85
<i>The Blocking Effect</i>	85
<i>The Rescorla–Wagner Model</i>	86
Acquisition	87
Blocking	88
Extinction and Conditioned Inhibition	88
Overshadowing	89
The Overexpectation Effect	89
Summary	91
<i>Theories of Attention</i>	91
<i>Comparator Theories of Conditioning</i>	92
Box 4.1 In the Media. Classical Conditioning in Advertising	93
Neuroscience and Classical Conditioning	94
Biological Constraints on Classical Conditioning	97
<i>The Contiguity Principle and Taste-Aversion Learning</i>	98
<i>Biological Preparedness in Taste-Aversion Learning</i>	98
Box 4.2 Spotlight on Research. Biological Preparedness in Human Learning	100
<i>Biological Constraints and the General-Principle Approach</i>	101
The Form of the Conditioned Response	103
<i>Drug Tolerance and Drug Cravings as Conditioned Responses</i>	103
<i>Conditioned Opponent Theories</i>	106
Summary	107
Review Questions	108
References	108
5 Basic Principles of Operant Conditioning	113
The Law of Effect	114
<i>Thorndike's Experiments</i>	114
<i>Guthrie and Horton: Evidence for a Mechanical Strengthening Process</i>	115
<i>Superstitious Behaviors</i>	117
Box 5.1 In the Media. Superstitious Behaviors in Sports	119
The Procedure of Shaping, or Successive Approximations	120
<i>Shaping Lever Pressing in a Rat</i>	120
<i>Shaping Behaviors in the Classroom</i>	122
<i>Shaping as a Tool in Behavior Modification</i>	122
The Research of B. F. Skinner	124
<i>The Free Operant</i>	124
<i>The Three-Term Contingency</i>	126

<i>Basic Principles of Operant Conditioning</i>	126
<i>Conditioned Reinforcement</i>	127
<i>Response Chains</i>	128
Box 5.2 Applying the Research. Teaching Response Chains	130
Biological Constraints on Operant Conditioning	132
<i>Instinctive Drift</i>	132
<i>Autoshaping</i>	133
Autoshaping as Superstitious Behavior	133
Autoshaping as Classical Conditioning	134
Autoshaping as the Intrusion of Instinctive Behavior Patterns	135
Summary	136
<i>Reconciling Reinforcement Theory and Biological Constraints</i>	136
Summary	138
Review Questions	139
References	139
6 Reinforcement Schedules: Experimental Analyses and Applications	142
Plotting Moment-to-Moment Behavior: The Cumulative Recorder	143
The Four Simple Reinforcement Schedules	144
<i>Fixed Ratio</i>	144
<i>Variable Ratio</i>	146
<i>Fixed Interval</i>	147
<i>Variable Interval</i>	149
Box 6.1 In the Media. The Scalloped Cumulative Record of the United States Congress	149
<i>Extinction and the Four Simple Schedules</i>	151
<i>Other Reinforcement Schedules</i>	152
Factors Affecting Performance on Reinforcement Schedules	152
<i>Behavioral Momentum</i>	153
<i>Contingency-Shaped Versus Rule-Governed Behaviors</i>	154
The Experimental Analysis of Reinforcement Schedules	155
<i>Cause of the FR Postreinforcement Pause</i>	156
<i>Comparisons of VR and VI Response Rates</i>	157
Applications of Operant Conditioning	159
<i>Teaching Language to Children With Autism</i>	159
<i>Token Reinforcement</i>	161
Box 6.2 Applying the Research. Organizational Behavior Management	164
<i>Behavior Therapy for Marital Problems</i>	165
<i>Conclusions</i>	166
Summary	167
Review Questions	167
References	168
7 Avoidance and Punishment	172
Escape and Avoidance	174
<i>A Representative Experiment</i>	174
<i>Two-Factor Theory</i>	175

<i>One-Factor Theory</i>	176
<i>Cognitive Theory</i>	177
<i>Biological Constraints in Avoidance Learning</i>	178
<i>Conclusions About the Theories of Avoidance</i>	180
Box 7.1 Applying the Research. The Procedure of Response Blocking (Flooding)	180
Learned Helplessness	181
Research on Punishment	183
<i>Is Punishment the Opposite of Reinforcement?</i>	183
<i>Factors Influencing the Effectiveness of Punishment</i>	184
Manner of Introduction	184
Immediacy of Punishment	185
Schedule of Punishment	185
Motivation to Respond	185
Reinforcement of Alternative Behaviors	186
Punishment as Discriminative Stimulus	187
<i>Disadvantages of Using Punishment</i>	187
<i>Negative Punishment (Omission)</i>	188
Behavior Decelerators in Behavior Therapy	189
<i>Punishment</i>	189
Box 7.2 In the Media. Punishment Can Be Effective, but Should It Be Used in Therapy?	190
<i>Negative Punishment: Response Cost and Time-Out</i>	191
<i>Overcorrection</i>	192
<i>Extinction</i>	193
<i>Escape Extinction</i>	193
<i>Response Blocking</i>	194
<i>Differential Reinforcement of Alternative Behavior</i>	195
<i>Stimulus Satiation</i>	195
Summary	196
Review Questions	197
References	197
8 Theories and Research on Operant Conditioning	201
The Role of the Response	202
The Role of the Reinforcer	203
<i>Is Reinforcement Necessary for Operant Conditioning?</i>	203
<i>Can Reinforcement Control Visceral Responses?</i>	204
<i>Biofeedback</i>	206
Box 8.1 Applying the Research. Neurofeedback: Controlling Your Brain Waves	207
How Can We Predict What Will Be a Reinforcer?	209
<i>Need Reduction</i>	210
<i>Drive Reduction</i>	210
<i>Trans-Situationality</i>	211
<i>Premack's Principle</i>	212
<i>Premack's Principle in Behavior Modification</i>	215
<i>Response Deprivation Theory</i>	216
<i>The Functional Analysis of Behaviors and Reinforcers</i>	218

Behavioral Economics	220
<i>Optimization: Theory and Research</i>	220
<i>Optimization and Behavioral Ecology</i>	221
<i>Elasticity and Inelasticity of Demand</i>	222
Box 8.2 Applying the Research. Behavioral Economics and Drug Abuse	224
<i>Other Applications</i>	225
Summary	226
Review Questions	227
References	227
9 Stimulus Control and Concept Learning	231
Generalization Gradients	232
<i>Measuring Generalization Gradients</i>	232
<i>What Causes Generalization Gradients?</i>	232
How Experience Affects the Shape of Generalization Gradients	233
How Sensory Deprivation Affects the Shape of Generalization Gradients	235
Is Stimulus Control Absolute or Relational?	236
<i>Transposition and Peak Shift</i>	237
<i>Spence's Theory of Excitatory and Inhibitory Gradients</i>	239
<i>The Intermediate-Size Problem</i>	240
<i>Other Data, and Some Conclusions</i>	240
Behavioral Contrast	242
Errorless Discrimination Learning	244
Box 9.1 Applying the Research. Errorless Learning in Education	246
Concept Learning	247
<i>The Structure of Natural Categories</i>	248
<i>Animal Studies on Natural Concept Learning</i>	249
Box 9.2 Spotlight on Research. Stimulus Equivalence Training	252
Stimulus Control in Behavior Modification	253
<i>Study Habits and Health Habits</i>	253
<i>Insomnia</i>	255
Summary	256
Review Questions	257
References	257
10 Comparative Cognition	261
Memory and Rehearsal	262
<i>Short-Term Memory, or Working Memory</i>	262
Delayed Matching to Sample	263
The Radial-Arm Maze	266
<i>Rehearsal</i>	267
Maintenance Rehearsal	268
Associative Rehearsal	269
<i>Long-Term Memory, Retrieval, and Forgetting</i>	270
Box 10.1 Spotlight on Research. Chunking of Information by Animals	272
Timing and Counting	274
<i>Experiments on an "Internal Clock"</i>	274
<i>Counting</i>	276

Animal Language	278
<i>Research With Chimpanzees</i>	278
<i>Research With Other Species</i>	280
