Introduction	1
--------------------	---

CHAPTER 1

TRANSPORTATION AND THE BEHAVIORAL SCIENCES

DAVID T. HARTGEN

Introduction	5
Brief Overview of the Behavioral Sciences	7
Current Transportation Issues: Evolution and Behavioral Applications	8
Urban Transit	9
Rural Transit Systems	12
Transportation for the Mobility-Limited	15
Environmental and Social Impact Analysis	17
Energy and Transportation	20
Summary and Conclusions	23
References	25

CHAPTER 2

PSYCHOLOGICAL CONTRIBUTIONS TO TRAVEL
DEMAND MODELINGIRWIN P. LEVIN
JORDAN J. LOUVIERE

Introduction	29
Travel Demand Modeling: A Historical Overview	29
Behavioral Travel Modeling	31
Our Conceptualization of Behavioral Travel Modeling	34
Research Approaches	36
Observational Approach	37
Controlled Experimental Approach	38
Quasi-Experimental Design	39
Applications of Psychological Measurement	40
Semantic Differential Scaling	41
Category Scaling	41
Thurstone Scaling	42
Factor Analysis	42
Multidimensional Scaling (MDS)	43
Attitudinal Modeling	43
Definition and Measurement of Attitudes	44
Attitude-Behavior Relationship	45
Measurement of Qualitative Variables	47
Applications of Psychological Process Theory	48
Utility Theory	49
Functional Measurement	50
Conjoint Measurement	52
Recent Developments	53
The Psychophysical Problem	53
Choice Set Analysis	54
Choice Sets and Travel Behavior Dynamics	55
References	57

CHAPTER 3

REINFORCEMENT THEORY STRATEGIES FOR
MODIFYING TRANSIT RIDERSHIP

PETER B. EVERETT

Introduction	63
The Reinforcement Theory Approach	65
Principles of Reinforcement Theory	65
A Reinforcement Theory Model of Transit Ridership	66
Changing Transit Ridership: Case Studies and Experiments	70
Reinforcing Transit Use	70
Removal of Punishment for Transit Use	74
Discussion	78
General Comments	78
The Future	79
Summary	82
References	83

CHAPTER 4

TRANSPORTATION AND WELL-BEING:
AN ECOLOGICAL PERSPECTIVE

DANIEL STOKOLS
RAYMOND W. NOVACO

Introduction	85
Previous Research on Transportation and Stress	87
Research on Automobile Travel and Stress	89
Research on Public Transit and Stress	92
Limitations of Earlier Research on Transportation and Stress	94
An Ecological Analysis of Transportation and Well-Being	96
Basic Tenets of an Ecological Approach to Transportation and Well-Being	96
Conceptual Focuses of Research on Transportation and Well-Being	99

Travel Impedance and Commuter Stress	101
General Propositions Derived from Our Theoretical Analysis	106
A Field-Experimental Investigation of Travel Impedance and Commuter Well-being	107
Method	109
Results	114
Summary and Implications	121
Some Qualifications of Our Findings	123
Behavioral Research as a Basis for Transportation Planning	124
References	126

CHAPTER 5

HUMAN FACTORS ENGINEERING AND PSYCHOLOGY IN HIGHWAY SAFETY

RICHARD A. OLSEN

Some Definitions	131
Applying Research Findings	132
The Traditional Three E's	133
Models, Concepts, and Driver Behavior	134
A Fourth E: Experimentation	138
The Systems Approach and Error Analysis	139
Driver Reactions to Internal Stimuli from Fatigue	142
Defining Fatigue	144
Physiological Correlates of Fatigue	146
Influencing Driver Performance	149
Driver Reactions to External Stimuli in the Visual Environment ..	149
The Nighttime Visual Environment	151
Driver Concepts and Conspicuity	153
Modeling Driver Information Processing	154
Improving the Visual Environment	156
Applying Advanced Concepts	158
Conclusions and Further Directions for Research	160
References	161

CHAPTER 6

THE SOCIAL COST OF URBAN TRANSPORTATION

LYNN G. LEWELLYN

Introduction	169
Social Impacts and Impact Assessment	171
The Nature of Social Impacts	171
The Wellsprings of Social Impact Assessment	173
Procedural Steps in Social Impact Assessment	176
Community-Based Social Impact Assessment	179
Two Social Costs: Forced Relocation and Noise	181
Displacement and Forced Relocation	181
Community Noise	187
Conclusion	196
References	199

CHAPTER 7

THE EFFECTS OF A MODERN RAPID-TRANSIT
SYSTEM ON NEARBY RESIDENTS:
A CASE STUDY OF BART IN THE SAN FRANCISCO AREA

MARK BALDASSARE

Introduction	203
BART as the Model of Modern Mass Transit	205
The BART Study	207
Rationale and Approach	207
The Interview and Respondent Selection	209
The Case Study Sites	211
General Attitudes toward BART	215
BART and Residential Mobility	218
Specific BART Impacts	220
Mediating Factors	224
BART Attributes	224

Environmental Differences	226
Demographic Differences and Personal Attitudes	227
BART's Effects in the Context of Neighborhood Problems	231
Conclusions	235
References	238

CHAPTER 8

FUTURE TRANSPORTATION: ORGANIZATION OF THE DESIGN PROCESS

RICHARD M. MICHAELS

Transportation and Social Organization	240
Motivational Factors Underlying Travel	245
Transportation Performance Criteria	249
Cognitive Criteria	249
Affective Criteria	251
Social Criteria	251
Summary	252
User Operating Requirements	252
Passenger Space	253
Routing and Scheduling	255
Command and Control	257
Alternative Transportation Futures	258
Information Transfer Technology	259
Physical Movement Technology	260
Land Use Reorganization	266
References	270
INDEX	273
