

# Contents

<b>1</b>	<b>The Phenomenon of a MAP</b> .....	<b>1</b>
1.1	Cartography Among Other Sciences .....	1
1.2	The Subject of Research .....	6
1.3	The Form of Notation as a Defining Feature of a Map Function .....	8
1.3.1	Language, Image, Map .....	8
1.3.2	Composition in the Artistic and Model Imaging of Reality .....	9
1.3.3	Perceptual Determinants of the Map Functions .....	22
	References .....	36
<b>2</b>	<b>Elements of Map Contents with (0D) Point Reference Units</b> .....	<b>41</b>
2.1	Cartographic (Objects/Phenomena) Symbols Characterised by (0D) Point Reference Units .....	41
2.2	Qualitative Point Symbols .....	42
2.2.1	Role of Qualitative Point Symbols in Revealing Function of Maps as Topological Models .....	42
2.2.2	Role of Qualitative Point Symbols in Revealing the Functions of Maps as Geometric Models .....	44
2.2.3	Distribution of Objects/Phenomena Sets in Point Reference Units; Distribution Range, Proximity and Density .....	47
2.3	Dot Symbols .....	55
2.3.1	Function of Dot Distribution Map, Dot Value .....	55
2.3.2	Distribution of Dot Symbols .....	59
2.3.3	Choropleth and Isoline Maps as Variation Models of Dot Symbols Density .....	65

2.4	Cartographic Symbols Containing Quantitative Information: Symbols, Diagrams, Graphs . . . . .	69
2.4.1	Types of Point-Distributed Quantitative Symbols . . . . .	69
2.4.2	Numerical Point Symbols . . . . .	70
	References. . . . .	84
<b>3</b>	<b>Elements of Map Contents with Linear (1D)</b>	
	<b>Reference Units . . . . .</b>	<b>87</b>
3.1	Cartographic Designations of the Objects and Phenomena with Linear (1D) Reference Units. . . . .	87
3.2	Line Symbol. . . . .	89
3.2.1	Categories of Objects Represented on General Geographic Maps and Thematic Maps . . . . .	89
3.2.2	Model Functions of Line Symbol Systems . . . . .	91
3.2.3	Quantitative Characteristics of Line Symbols; Length, Orientation, Complexity . . . . .	96
3.3	Linear Spatial Reaches . . . . .	116
3.4	Line Diagrams, Arrows, Vectors. . . . .	116
3.5	Isolines. . . . .	118
3.5.1	Isoline Types. . . . .	118
3.5.2	Course Relations of Isoline Characteristics of the Phenomena . . . . .	124
	References. . . . .	124
<b>4</b>	<b>Content Items of Maps with Surface Reference Units . . . . .</b>	<b>127</b>
4.1	Cartographic Symbols (for Objects, Phenomena) with Surface (2D) Reference Units. . . . .	127
4.2	Surface Recognition of Objects, Phenomena and Processes Characterised by Quality Features . . . . .	130
4.2.1	Objects, Phenomena, Processes. . . . .	130
4.2.2	Distribution of Surface Objects Characterised by the Qualitative Features . . . . .	135
4.3	Surface Recognition of Objects, Phenomena and Processes Characterised by the Quantitative Features. . . . .	146
4.3.1	The Subject of Modelling, Types and Features of Renditions. . . . .	146
4.3.2	Cartographic Depictions of the Relative Characteristics of Phenomena. . . . .	150
4.4	Anamorphic Rendition of the Surface Phenomena Characterised by Quantitative Features. . . . .	169

4.5	Structural Renditions of Surface Phenomena Characterised with Numerically Determined Participation of Components . . . . .	172
4.5.1	The Structural Complexity of Phenomena . . . . .	172
4.5.2	Renditions of the Structure of Multi-featured Phenomena . . . . .	173
	References. . . . .	179
<b>5</b>	<b>Synthetic Structural Characteristics Determining the Qualificational Divisions of Areas . . . . .</b>	<b>183</b>
5.1	Introduction . . . . .	183
5.1.1	Maps as Systems and Models . . . . .	183
5.1.2	Taxonomic Divisions of the Multi-feature Phenomena/Objects . . . . .	185
5.1.3	Choice and Normalisation of Features. . . . .	186
5.2	Similarity of Multi-feature Objects . . . . .	189
5.2.1	Similarity of Objects with Alternative Features. . . . .	189
5.2.2	Similarity of Objects with Contingent Features. . . . .	191
5.2.3	Similarity of Objects with Size Features . . . . .	193
5.2.4	Similarity of Objects with Heterogeneous Features . . . . .	194
5.3	Objects Grouping . . . . .	197
5.4	Examples . . . . .	200
5.4.1	Alternative Features as Determinants of the Specificity of Regions . . . . .	200
5.4.2	Contingent Features as Determinants of the Types of the Processes' Courses . . . . .	204
	References. . . . .	207
