|--|----------------|
| <i>Preface</i> | <i>page xi</i> |
| <i>Foreword by Peter J. Cameron</i> | <i>xiii</i> |
| Introduction | 1 |
| LOWELL BEINEKE, ROBIN WILSON AND PETER CAMERON | |
| 1. Graph theory | 1 |
| 2. Linear algebra | 10 |
| 3. Group theory | 19 |
| 1 Eigenvalues of graphs | 30 |
| MICHAEL DOOB | |
| 1. Introduction | 30 |
| 2. Some examples | 31 |
| 3. A little matrix theory | 33 |
| 4. Eigenvalues and walks | 34 |
| 5. Eigenvalues and labellings of graphs | 39 |
| 6. Lower bounds for the eigenvalues | 43 |
| 7. Upper bounds for the eigenvalues | 47 |
| 8. Other matrices related to graphs | 50 |
| 9. Cospectral graphs | 51 |
| 2 Graphs and matrices | 56 |
| RICHARD A. BRUALDI and BRYAN L. SHADER | |
| 1. Introduction | 56 |
| 2. Some classical theorems | 58 |
| 3. Digraphs | 61 |
| 4. Biclique partitions of graphs | 67 |

| | |
|--|------------|
| 5. Bipartite graphs | 69 |
| 6. Permanents | 72 |
| 7. Converting the permanent into the determinant | 75 |
| 8. Chordal graphs and perfect Gaussian elimination | 79 |
| 9. Ranking players in tournaments | 82 |
| 3 Spectral graph theory | 88 |
| DRAGOŠ CVETKOVIĆ and PETER ROWLINSON | |
| 1. Introduction | 88 |
| 2. Angles | 89 |
| 3. Star sets and star partitions | 94 |
| 4. Star complements | 96 |
| 5. Exceptional graphs | 99 |
| 6. Reconstructing the characteristic polynomial | 101 |
| 7. Non-complete extended p -sums of graphs | 104 |
| 8. Integral graphs | 107 |
| 4 Graph Laplacians | 113 |
| BOJAN MOHAR | |
| 1. Introduction | 113 |
| 2. The Laplacian of a graph | 115 |
| 3. Laplace eigenvalues | 117 |
| 4. Eigenvalues and vertex partitions of graphs | 122 |
| 5. The max-cut problem and semi-definite programming | 125 |
| 6. Isoperimetric inequalities | 127 |
| 7. The travelling salesman problem | 129 |
| 8. Random walks on graphs | 130 |
| 5 Automorphisms of graphs | 137 |
| PETER J. CAMERON | |
| 1. Graph automorphisms | 137 |
| 2. Algorithmic aspects | 139 |
| 3. Automorphisms of typical graphs | 140 |
| 4. Permutation groups | 141 |
| 5. Abstract groups | 142 |
| 6. Cayley graphs | 144 |
| 7. Vertex-transitive graphs | 145 |

| | |
|------------------------------------|-----|
| 8. Higher symmetry | 148 |
| 9. Infinite graphs | 149 |
| 10. Graph homomorphisms | 152 |
| 6 Cayley graphs | 156 |
| BRIAN ALSPACH | |
| 1. Introduction | 156 |
| 2. Recognition | 157 |
| 3. Special examples | 159 |
| 4. Prevalence | 160 |
| 5. Isomorphism | 164 |
| 6. Enumeration | 167 |
| 7. Automorphisms | 168 |
| 8. Subgraphs | 169 |
| 9. Hamiltonicity | 171 |
| 10. Factorization | 173 |
| 11. Embeddings | 174 |
| 12. Applications | 175 |
| 7 Finite symmetric graphs | 179 |
| CHERYL E. PRAEGER | |
| 1. Introduction | 179 |
| 2. s -arc transitive graphs | 181 |
| 3. Group-theoretic constructions | 182 |
| 4. Quotient graphs and primitivity | 186 |
| 5. Distance-transitive graphs | 187 |
| 6. Local characterizations | 189 |
| 7. Normal quotients | 192 |
| 8. Finding automorphism groups | 196 |
| 9. A geometric approach | 198 |
| 10. Related families of graphs | 199 |
| 8 Strongly regular graphs | 203 |
| PETER J. CAMERON | |
| 1. An example | 203 |
| 2. Regularity conditions | 205 |
| 3. Parameter conditions | 206 |
| 4. Geometric graphs | 208 |
| 5. Eigenvalues and their geometry | 212 |

| | |
|--|------------|
| 6. Rank 3 graphs | 214 |
| 7. Related classes of graphs | 217 |
| 9 Distance-transitive graphs | 222 |
| ARJEH M. COHEN | |
| 1. Introduction | 222 |
| 2. Distance-transitivity | 223 |
| 3. Graphs from groups | 226 |
| 4. Combinatorial properties | 230 |
| 5. Imprimitivity | 233 |
| 6. Bounds | 235 |
| 7. Finite simple groups | 236 |
| 8. The first step | 238 |
| 9. The affine case | 240 |
| 10. The simple socle case | 245 |
| 10 Computing with graphs and groups | 250 |
| LEONARD H. SOICHER | |
| 1. Introduction | 250 |
| 2. Permutation group algorithms | 251 |
| 3. Storing and accessing a \mathcal{G} -graph | 253 |
| 4. Constructing \mathcal{G} -graphs | 254 |
| 5. \mathcal{G} -breadth-first search in a \mathcal{G} -graph | 255 |
| 6. Automorphism groups and graph isomorphism | 257 |
| 7. Computing with vertex-transitive graphs | 259 |
| 8. Coset enumeration | 261 |
| 9. Coset enumeration for symmetric graphs | 262 |
| <i>Notes on contributors</i> | 267 |
| <i>Index of definitions</i> | 271 |
