Part I. An Introduction to Quantum Groups

1. Hopf Algebras	3
1.1 Prolog: Examples of Hopf Algebras of Functions on Groups ..	3
1.2 Coalgebras, Bialgebras and Hopf Algebras	6
1.2.1 Algebras	6
1.2.2 Coalgebras	8
1.2.3 Bialgebras	11
1.2.4 Hopf Algebras	13
1.2.5* Dual Pairings of Hopf Algebras	16
1.2.6 Examples of Hopf Algebras	18
1.2.7 *-Structures	20
1.2.8* The Dual Hopf Algebra \mathcal{A}°	22
1.2.9* Super Hopf Algebras	23
1.2.10* h -Adic Hopf Algebras	25
1.3 Modules and Comodules of Hopf Algebras	27
1.3.1 Modules and Representations	27
1.3.2 Comodules and Corepresentations	29
1.3.3 Comodule Algebras and Related Concepts	32
1.3.4* Adjoint Actions and Coactions of Hopf Algebras	34
1.3.5* Corepresentations and Representations of Dually Paired Coalgebras and Algebras	35
1.4 Notes	36
2. q-Calculus	37
2.1 Main Notions on q -Calculus	37
2.1.1 q -Numbers and q -Factorials	37
2.1.2 q -Binomial Coefficients	39
2.1.3 Basic Hypergeometric Functions	40
2.1.4 The Function ${}_1\varphi_0(a; q, z)$	41
2.1.5 The Basic Hypergeometric Function ${}_2\varphi_1$	42
2.1.6 Transformation Formulas for ${}_3\varphi_2$ and ${}_4\varphi_3$	43
2.1.7 q -Analog of the Binomial Theorem	44
2.2 q -Differentiation and q -Integration	44
2.2.1 q -Differentiation	44

2.2.2	q -Integral	46
2.2.3	q -Analog of the Exponential Function	47
2.2.4	q -Analog of the Gamma Function	48
2.3	q -Orthogonal Polynomials	49
2.3.1	Jacobi Matrices and Orthogonal Polynomials	49
2.3.2	q -Hermite Polynomials	50
2.3.3	Little q -Jacobi Polynomials	51
2.3.4	Big q -Jacobi Polynomials	52
2.4	Notes	52
3.	The Quantum Algebra $U_q(\mathfrak{sl}_2)$ and Its Representations	53
3.1	The Quantum Algebras $U_q(\mathfrak{sl}_2)$ and $U_h(\mathfrak{sl}_2)$	53
3.1.1	The Algebra $U_q(\mathfrak{sl}_2)$	53
3.1.2	The Hopf Algebra $U_q(\mathfrak{sl}_2)$	55
3.1.3	The Classical Limit of the Hopf Algebra $U_q(\mathfrak{sl}_2)$	57
3.1.4	Real Forms of the Quantum Algebra $U_q(\mathfrak{sl}_2)$	58
3.1.5	The \hbar -Adic Hopf Algebra $U_h(\mathfrak{sl}_2)$	60
3.2	Finite-Dimensional Representations of $U_q(\mathfrak{sl}_2)$ for q not a Root of Unity	61
3.2.1	The Representations T_{ω_l}	61
3.2.2	Weight Representations and Complete Reducibility	63
3.2.3	Finite-Dimensional Representations of $\check{U}_q(\mathfrak{sl}_2)$ and $U_h(\mathfrak{sl}_2)$	65
3.3	Representations of $U_q(\mathfrak{sl}_2)$ for q a Root of Unity	66
3.3.1	The Center of $U_q(\mathfrak{sl}_2)$	66
3.3.2	Representations of $U_q(\mathfrak{sl}_2)$	67
3.3.3	Representations of $U_q^{\text{res}}(\mathfrak{sl}_2)$	71
3.4	Tensor Products of Representations. Clebsch–Gordan Coefficients	72
3.4.1	Tensor Products of Representations T_l	72
3.4.2	Clebsch–Gordan Coefficients	74
3.4.3	Other Expressions for Clebsch–Gordan Coefficients	78
3.4.4	Symmetries of Clebsch–Gordan Coefficients	81
3.5	Racah Coefficients and $6j$ Symbols of $U_q(\mathfrak{su}_2)$	82
3.5.1	Definition of the Racah Coefficients	82
3.5.2	Relations Between Racah and Clebsch–Gordan Coefficients	84
3.5.3	Symmetry Relations	84
3.5.4	Calculation of Racah Coefficients	85
3.5.5	The Biedenharn–Elliott Identity	88
3.5.6	The Hexagon Relation	90
3.5.7	Clebsch–Gordan Coefficients as Limits of Racah Coefficients	90
3.6	Tensor Operators and the Wigner–Eckart Theorem	92
3.6.1	Tensor Operators for Compact Lie Groups	92

3.6.2	Tensor Operators and the Wigner–Eckart Theorem for $\check{U}_q(\mathfrak{su}_2)$	93
3.7	Applications	94
3.7.1	The $U_q(\mathfrak{sl}_2)$ Rotator Model of Deformed Nuclei	94
3.7.2	Electromagnetic Transitions in the $U_q(\mathfrak{sl}_2)$ Model	95
3.8	Notes	96
4.	The Quantum Group $SL_q(2)$ and Its Representations	97
4.1	The Hopf Algebra $\mathcal{O}(SL_q(2))$	97
4.1.1	The Bialgebra $\mathcal{O}(M_q(2))$	97
4.1.2	The Hopf Algebra $\mathcal{O}(SL_q(2))$	99
4.1.3	A Geometric Approach to $SL_q(2)$	101
4.1.4	Real Forms of $\mathcal{O}(SL_q(2))$	102
4.1.5	The Diamond Lemma	103
4.2	Representations of the Quantum Group $SL_q(2)$	104
4.2.1	Finite-Dimensional Corepresentations of $\mathcal{O}(SL_q(2))$: Main Results	104
4.2.2	A Decomposition of $\mathcal{O}(SL_q(2))$	105
4.2.3	Finite-Dimensional Subcomodules of $\mathcal{O}(SL_q(2))$	106
4.2.4	Calculation of the Matrix Coefficients	108
4.2.5	The Peter–Weyl Decomposition of $\mathcal{O}(SL_q(2))$	110
4.2.6	The Haar Functional of $\mathcal{O}(SL_q(2))$	111
4.3	The Compact Quantum Group $SU_q(2)$ and Its Representations	113
4.3.1	Unitary Representations of the Quantum Group $SU_q(2)$	113
4.3.2	The Haar State and the Peter–Weyl Theorem for $\mathcal{O}(SU_q(2))$	114
4.3.3	The Fourier Transform on $SU_q(2)$	117
4.3.4	*-Representations and the C^* -Algebra of $\mathcal{O}(SU_q(2))$..	117
4.4	Duality of the Hopf Algebras $U_q(\mathfrak{sl}_2)$ and $\mathcal{O}(SL_q(2))$	119
4.4.1	Dual Pairing of the Hopf Algebras $U_q(\mathfrak{sl}_2)$ and $\mathcal{O}(SL_q(2))$	119
4.4.2	Corepresentations of $\mathcal{O}(SL_q(2))$ and Representations of $U_q(\mathfrak{sl}_2)$	123
4.5	Quantum 2-Spheres	124
4.5.1	A Family of Quantum Spaces for $SL_q(2)$	124
4.5.2	Decomposition of the Algebra $\mathcal{O}(S_{q\rho}^2)$	126
4.5.3	Spherical Functions on $S_{q\rho}^2$	129
4.5.4	An Infinitesimal Characterization of $\mathcal{O}(S_{q\rho}^2)$	129
4.6	Notes	132

5.	The q-Oscillator Algebras and Their Representations	133
5.1	The q -Oscillator Algebras \mathcal{A}_q^c and \mathcal{A}_q	133
5.1.1	Definitions and Algebraic Properties	133
5.1.2	Other Forms of the q -Oscillator Algebra	136
5.1.3	The q -Oscillator Algebra and the Quantum Algebra $\check{U}_q(\mathfrak{sl}_2)$	137
5.1.4	The q -Oscillator Algebras and the Quantum Space $M_{q^2}(2)$	140
5.2	Representations of q -Oscillator Algebras	140
5.2.1	N -Finite Representations	140
5.2.2	Irreducible Representations with Highest (Lowest) Weights	141
5.2.3	Representations Without Highest and Lowest Weights	143
5.2.4	Irreducible Representations of \mathcal{A}_q^c for q a Root of Unity	145
5.2.5	Irreducible $*$ -Representations of \mathcal{A}_q^c and \mathcal{A}_q	147
5.2.6	Irreducible $*$ -Representations of Another q -Oscillator Algebra	148
5.3	The Fock Representation of the q -Oscillator Algebra	149
5.3.1	The Fock Representation	149
5.3.2	The Bargmann–Fock Realization	150
5.3.3	Coherent States	152
5.3.4	Bargmann–Fock Space Realization of Irreducible Representations of $\check{U}_q(\mathfrak{sl}_2)$	153
5.4	Notes	154

Part II. Quantized Universal Enveloping Algebras

6.	Drinfeld–Jimbo Algebras	157
6.1	Definitions of Drinfeld–Jimbo Algebras	157
6.1.1	Semisimple Lie Algebras	157
6.1.2	The Drinfeld–Jimbo Algebras $U_q(\mathfrak{g})$	161
6.1.3	The h -Adic Drinfeld–Jimbo Algebras $U_h(\mathfrak{g})$	165
6.1.4	Some Algebra Automorphisms of Drinfeld–Jimbo Algebras	167
6.1.5	Triangular Decomposition of $U_q(\mathfrak{g})$	168
6.1.6	Hopf Algebra Automorphisms of $U_q(\mathfrak{g})$	171
6.1.7	Real Forms of Drinfeld–Jimbo Algebras	172
6.2	Poincaré–Birkhoff–Witt Theorem and Verma Modules	173
6.2.1	Braid Groups	173
6.2.2	Action of Braid Groups on Drinfeld–Jimbo Algebras	174
6.2.3	Root Vectors and Poincaré–Birkhoff–Witt Theorem	175
6.2.4	Representations with Highest Weights	177
6.2.5	Verma Modules	179

6.2.6	Irreducible Representations with Highest Weights	180
6.2.7	The Left Adjoint Action of $U_q(\mathfrak{g})$	181
6.3	The Quantum Killing Form and the Center of $U_q(\mathfrak{g})$	184
6.3.1	A Dual Pairing of the Hopf Algebras $U_q(\mathfrak{b}_+)$ and $U_q(\mathfrak{b}_-)^{\text{op}}$	184
6.3.2	The Quantum Killing Form on $U_q(\mathfrak{g})$	187
6.3.3	A Quantum Casimir Element	189
6.3.4	The Center of $U_q(\mathfrak{g})$ and the Harish-Chandra Homomorphism	192
6.3.5	The Center of $U_q(\mathfrak{g})$ for q a Root of Unity	194
6.4	Notes	196
7.	Finite-Dimensional Representations of Drinfeld–Jimbo Algebras	197
7.1	General Properties of Finite-Dimensional Representations of $U_q(\mathfrak{g})$	197
7.1.1	Weight Structure and Classification	197
7.1.2	Properties of Representations	200
7.1.3	Representations of \hbar -Adic Drinfeld–Jimbo Algebras	202
7.1.4	Characters of Representations and Multiplicities of Weights	203
7.1.5	Separation of Elements of $U_q(\mathfrak{g})$	204
7.1.6	The Quantum Trace of Finite-Dimensional Representations	205
7.2	Tensor Products of Representations	207
7.2.1	Multiplicities in Tensor Products of Representations	208
7.2.2	Clebsch–Gordan Coefficients	211
7.3	Representations of $\check{U}_q(\mathfrak{gl}_n)$ for q not a Root of Unity	212
7.3.1	The Hopf Algebra $\check{U}_q(\mathfrak{gl}_n)$	212
7.3.2	Finite-Dimensional Representations of $\check{U}_q(\mathfrak{gl}_n)$	213
7.3.3	Gel'fand–Tsetlin Bases and Explicit Formulas for Representations	214
7.3.4	Representations of Class 1	217
7.3.5	Tensor Products of Representations	218
7.3.6	Tensor Operators and the Wigner–Eckart Theorem	219
7.3.7	Clebsch–Gordan Coefficients for the Tensor Product $T_{\mathfrak{m}} \otimes T_1$	220
7.3.8	Clebsch–Gordan Coefficients for the Tensor Product $T_{\mathfrak{m}} \otimes T_p$	221
7.3.9	The Tensor Product $T_{\mathfrak{m}} \otimes T_1$ for $q^{\pm 1} \rightarrow 0$	224
7.4	Crystal Bases	225
7.4.1	Crystal Bases of Finite-Dimensional Modules	226
7.4.2	Existence and Uniqueness of Crystal Bases	227
7.4.3	Crystal Bases of Tensor Product Modules	228

7.4.4	Globalization of Crystal Bases	229
7.4.5	Crystal Bases of $U'_q(\mathfrak{n}_-)$	230
7.5	Representations of $U_q(\mathfrak{g})$ for q a Root of Unity	232
7.5.1	General Results	232
7.5.2	Cyclic Representations	234
7.5.3	Cyclic Representations of the Algebra $U_\epsilon(\mathfrak{sl}_{l+1})$	235
7.5.4	Representations of Minimal Dimensions	237
7.5.5	Representations of $U_\epsilon(\mathfrak{sl}_{l+1})$ in Gel'fand–Tsetlin Bases	238
7.6	Applications	240
7.7	Notes	242
8.	Quasitriangularity and Universal R-Matrices	243
8.1	Quasitriangular Hopf Algebras	243
8.1.1	Definition and Basic Properties	243
8.1.2	R -Matrices for Representations	246
8.1.3	Square and Inverse of the Antipode	247
8.2	The Quantum Double and Universal R -Matrices	250
8.2.1	The Quantum Double of Skew-Paired Bialgebras	250
8.2.2	Quasitriangularity of Quantum Doubles of Finite-Dimensional Hopf Algebras	254
8.2.3	The Rosso Form of the Quantum Double	257
8.2.4	Drinfeld–Jimbo Algebras as Quotients of Quantum Doubles	258
8.3	Explicit Form of Universal R -Matrices	259
8.3.1	The Universal R -Matrix for $U_h(\mathfrak{sl}_2)$	259
8.3.2	The Universal R -Matrix for $U_h(\mathfrak{g})$	261
8.3.3	R -Matrices for Representations of $U_q(\mathfrak{g})$	264
8.4	Vector Representations and R -Matrices	267
8.4.1	Vector Representations of Drinfeld–Jimbo Algebras	267
8.4.2	R -Matrices for Vector Representations	269
8.4.3	Spectral Decompositions of R -Matrices for Vector Representations	272
8.5	L -Operators and L -Functionals	275
8.5.1	L -Operators and L -Functionals	275
8.5.2	L -Functionals for Vector Representations	277
8.5.3	The Extended Hopf Algebras $U_q^{\text{ext}}(\mathfrak{g})$	281
8.5.4	L -Functionals for Vector Representations of $U_q(\mathfrak{g})$	283
8.5.5	The Hopf Algebras $\mathcal{U}(\mathbb{R})$ and $U_q^L(\mathfrak{g})$	285
8.6	An Analog of the Brauer–Schur–Weyl Duality	288
8.6.1	The Algebras $\tilde{U}_q(\mathfrak{so}_N)$	288
8.6.2	Tensor Products of Vector Representations	289
8.6.3	The Brauer–Schur–Weyl Duality for Drinfeld–Jimbo Algebras	291
8.6.4	Hecke and Birman–Wenzl–Murakami Algebras	293
8.7	Applications	294

8.7.1	Baxterization	295
8.7.2	Elliptic Solutions of the Quantum Yang–Baxter Equation	297
8.7.3	R -Matrices and Integrable Systems	298
8.8	Notes	300

Part III. Quantized Algebras of Functions

9.	Coordinate Algebras of Quantum Groups and Quantum Vector Spaces	303
9.1	The Approach of Faddeev–Reshetikhin–Takhtajan	303
9.1.1	The FRT Bialgebra $\mathcal{A}(R)$	303
9.1.2	The Quantum Vector Spaces $\mathcal{X}_L(f; R)$ and $\mathcal{X}_R(f; R)$..	307
9.2	The Quantum Groups $GL_q(N)$ and $SL_q(N)$	309
9.2.1	The Quantum Matrix Space $M_q(N)$ and the Quantum Vector Space \mathbb{C}_q^N	310
9.2.2	Quantum Determinants	311
9.2.3	The Quantum Groups $GL_q(N)$ and $SL_q(N)$	313
9.2.4	Real Forms of $GL_q(N)$ and $SL_q(N)$ and $*$ -Quantum Spaces	316
9.3	The Quantum Groups $O_q(N)$ and $Sp_q(N)$	317
9.3.1	The Hopf Algebras $\mathcal{O}(O_q(N))$ and $\mathcal{O}(Sp_q(N))$	318
9.3.2	The Quantum Vector Space for the Quantum Group $O_q(N)$	320
9.3.3	The Quantum Group $SO_q(N)$	323
9.3.4	The Quantum Vector Space for the Quantum Group $Sp_q(N)$	324
9.3.5	Real Forms of $O_q(N)$ and $Sp_q(N)$ and $*$ -Quantum Spaces	325
9.4	Dual Pairings of Drinfeld–Jimbo Algebras and Coordinate Hopf Algebras	327
9.5	Notes	330
10.	Coquasitriangularity and Crossed Product Constructions .	331
10.1	Coquasitriangular Hopf Algebras	331
10.1.1	Definition and Basic Properties	331
10.1.2	Coquasitriangularity of FRT Bialgebras $\mathcal{A}(R)$ and Coordinate Hopf Algebras $\mathcal{O}(G_q)$	337
10.1.3	L -Functionals of Coquasitriangular Hopf Algebras ...	342
10.2	Crossed Product Constructions of Hopf Algebras	349
10.2.1	Crossed Product Algebras	349
10.2.2	Crossed Coproduct Coalgebras	352
10.2.3	Twisting of Algebra Structures by 2-Cocycles and Quantum Doubles	354

10.2.4	Twisting of Coalgebra Structures by 2-Cocycles and Quantum Codoubles	357
10.2.5	Double Crossed Product Bialgebras and Quantum Doubles	359
10.2.6	Double Crossed Coproduct Bialgebras and Quantum Codoubles	362
10.2.7	Realifications of Quantum Groups	363
10.3	Braided Hopf Algebras	365
10.3.1	Covariantized Products for Coquasitriangular Bialgebras	365
10.3.2	Braided Hopf Algebras Associated with Coquasitriangular Hopf Algebras	370
10.3.3	Braided Hopf Algebras Associated with Quasitriangular Hopf Algebras	376
10.3.4	Braided Tensor Categories and Braided Hopf Algebras	377
10.3.5	Braided Vector Algebras	380
10.3.6	Bosonization of Braided Hopf Algebras	382
10.3.7	*-Structures on Bosonized Hopf Algebras	386
10.3.8	Inhomogeneous Quantum Groups	388
10.3.9	*-Structures for Inhomogeneous Quantum Groups	390
10.4	Notes	394
11.	Corepresentation Theory and Compact Quantum Groups	395
11.1	Corepresentations of Hopf Algebras	395
11.1.1	Corepresentations	395
11.1.2	Intertwiners	397
11.1.3	Constructions of New Corepresentations	397
11.1.4	Irreducible Corepresentations	398
11.1.5	Unitary Corepresentations	401
11.2	Cosemisimple Hopf Algebras	402
11.2.1	Definition and Characterizations	402
11.2.2	The Haar Functional of a Cosemisimple Hopf Algebra .	404
11.2.3	Peter–Weyl Decomposition of Coordinate Hopf Algebras	408
11.3	Compact Quantum Group Algebras	415
11.3.1	Definitions and Characterizations of CQG Algebras ...	415
11.3.2	The Haar State of a CQG Algebra	419
11.3.3	C^* -Algebra Completions of CQG Algebras	420
11.3.4	Modular Properties of the Haar State	422
11.3.5	Polar Decomposition of the Antipode	426
11.3.6	Multiplicative Unitaries of CQG Algebras	427
11.4	Compact Quantum Group C^* -Algebras	429
11.4.1	CQG C^* -Algebras and Their CQG Algebras	429
11.4.2	Existence of the Haar State of a CQG C^* -Algebra	431
11.4.3	Proof of Theorem 39	433

11.4.4	Another Definition of CQG C^* -Algebras	434
11.5	Finite-Dimensional Representations of $GL_q(N)$	435
11.5.1	Some Quantum Subgroups of $GL_q(N)$	435
11.5.2	Submodules of Relative Invariant Elements	436
11.5.3	Irreducible Representations of $GL_q(N)$	437
11.5.4	Peter–Weyl Decomposition of $\mathcal{O}(GL_q(N))$	439
11.5.5	Representations of the Quantum Group $U_q(N)$	441
11.6	Quantum Homogeneous Spaces	442
11.6.1	Definition of a Quantum Homogeneous Space	442
11.6.2	Quantum Homogeneous Spaces Associated with Quantum Subgroups	443
11.6.3	Quantum Gel'fand Pairs	445
11.6.4	The Quantum Homogeneous Space $U_q(N-1)\backslash U_q(N)$	447
11.6.5	Quantum Homogeneous Spaces of Infinitesimally Invariant Elements	451
11.6.6	Quantum Projective Spaces	452
11.7	Notes	454

Part IV. Noncommutative Differential Calculus

12.	Covariant Differential Calculus on Quantum Spaces	457
12.1	Covariant First Order Differential Calculus	457
12.1.1	First Order Differential Calculi on Algebras	457
12.1.2	Covariant First Order Calculi on Quantum Spaces	459
12.2	Covariant Higher Order Differential Calculus	461
12.2.1	Differential Calculi on Algebras	461
12.2.2	The Differential Envelope of an Algebra	462
12.2.3	Covariant Differential Calculi on Quantum Spaces	463
12.3	Construction of Covariant Differential Calculi on Quantum Spaces	464
12.3.1	General Method	464
12.3.2	Covariant Differential Calculi on Quantum Vector Spaces	467
12.3.3	Covariant Differential Calculus on \mathbb{C}_q^N and the Quantum Weyl Algebra	468
12.3.4	Covariant Differential Calculi on the Quantum Hyperboloid	471
12.4	Notes	472
13.	Hopf Bimodules and Exterior Algebras	473
13.1	Covariant Bimodules	473
13.1.1	Left-Covariant Bimodules	473
13.1.2	Right-Covariant Bimodules	477
13.1.3	Bicovariant Bimodules (Hopf Bimodules)	477

13.1.4	Woronowicz' Braiding of Bicovariant Bimodules	480
13.1.5	Bicovariant Bimodules and Representations of the Quantum Double	483
13.2	Tensor Algebras and Exterior Algebras of Bicovariant Bimodules	485
13.2.1	The Tensor Algebra of a Bicovariant Bimodule	485
13.2.2	The Exterior Algebra of a Bicovariant Bimodule	488
13.3	Notes	490
14.	Covariant Differential Calculus on Quantum Groups	491
14.1	Left-Covariant First Order Differential Calculi	491
14.1.1	Left-Covariant First Order Calculi and Their Right Ideals	491
14.1.2	The Quantum Tangent Space	494
14.1.3	An Example: The 3D-Calculus on $SL_q(2)$	496
14.1.4	Another Left-Covariant Differential Calculus on $SL_q(2)$	498
14.2	Bicovariant First Order Differential Calculi	498
14.2.1	Right-Covariant First Order Differential Calculi	498
14.2.2	Bicovariant First Order Differential Calculi	499
14.2.3	Quantum Lie Algebras of Bicovariant First Order Calculi	500
14.2.4	The $4D_+$ - and the $4D_-$ -Calculus on $SL_q(2)$	504
14.2.5	Examples of Bicovariant First Order Calculi on Simple Lie Groups	505
14.3	Higher Order Left-Covariant Differential Calculi	506
14.3.1	The Maurer–Cartan Formula	506
14.3.2	The Differential Envelope of a Hopf Algebra	507
14.3.3	The Universal DC of a Left-Covariant FODC	508
14.4	Higher Order Bicovariant Differential Calculi	511
14.4.1	Bicovariant Differential Calculi and Differential Hopf Algebras	511
14.4.2	Quantum Lie Derivatives and Contraction Operators	514
14.5	Bicovariant Differential Calculi on Coquasitriangular Hopf Algebras	517
14.6	Bicovariant Differential Calculi on Quantized Simple Lie Groups	521
14.6.1	A Family of Bicovariant First Order Differential Calculi	521
14.6.2	Braiding and Structure Constants of the FODC $\Gamma_{\pm,z}$	524
14.6.3	A Canonical Basis for the Left-Invariant 1-Forms	525
14.6.4	Classification of Bicovariant First Order Differential Calculi	527
14.7	Notes	528

Bibliography	529
Index	545
