TABLE OF CONTENTS

Introduction. Geometrical Structures in Field Theory 1

Chapter 1. Grassmannians, Connections, and Integrability 7

§ 1. Grassmannians and Flag Spaces 7
§ 2. Cohomology of Flag Spaces 17
§ 3. The Klein Quadric and Minkowski Space 23
§ 4. Distributions and Connections 35
§ 5. Integrability and Curvature 41
§ 6. Conic Structures and Conic Connections 45
§ 7. Grassmannian Spinors and Generalized Self-Duality Equations 51
References for Chapter 1 59

Chapter 2. The Radon-Penrose Transform 61

§ 1. Complex Space-Time 61
§ 2. The Self-Duality Diagram and the Radon-Penrose Transform .. 72
§ 3. The Theory of Instantons 81
§ 4. Instantons and Modules over a Grassmannian Algebra 99
§ 5. The Diagram of Null-Geodesics 106
§ 6. Extensions and Obstructions 113
§ 7. Curvature on the Space of Null-Geodesics 124
§ 8. Cohomological Computations 128
§ 9. The Flow of a Yang-Mills Field on the Space of Null-Geodesics 133
§ 10. Extension Problems and Dynamical Equations 141
§ 11. The Green's Function of the Laplace Operator 146
References for Chapter 2 150

Chapter 3. Introduction to Superalgebra 153

§ 1. The Rule of Signs 153
§ 2. The Tensor Algebra over a Supercommutative Ring 159
§ 3. The Supertrace and Superdeterminant 164
§ 4. Some Complexes in Superalgebra 168
§ 5. Scalar Products 173
§ 6. Real Structures 175
References for Chapter 3 180

Chapter 4. Introduction to Supergeometry 181

§ 1. Superspaces and Supermanifolds 181
§ 2. The Elementary Structure Theory of Supermanifolds 188

§ 3. Supergrassmannians and Flag Superspaces 192
§ 4. The Frobenius Theorem and Connections 204
§ 5. Right Connections and Integral Forms 206
§ 6. The Berezin Integral 213
§ 7. Densities 216
§ 8. The Stokes Formula and the Cohomology of Integral Forms ... 220
§ 9. Supermanifolds with Distinguished Volume Form. Pseudodifferential and Pseudointegral Forms 222
§ 10. Lie Superalgebras of Vector Fields and Finite-dimensional Simple Lie Superalgebras 225
References for Chapter 4 232

Chapter 5. Geometric Structures of Supersymmetry and Gravitation .. 233
§ 1. Supertwistors and Minkowski Superspace 233
§ 2. Scalar Superfields and Component Analysis 241
§ 3. Yang-Mills Fields and Integrability Equations along Light Supergeodesics 243
§ 4. Monads on Superspaces and YM-sheaves 253
§ 5. Some Coordinate Computations 263
§ 6. Flag Superspaces of Classical Type and Exotic Minkowski Superspaces 267
§ 7. The Geometry of Simple Supergravity 277
References for Chapter 5 286

Bibliography 287

Recent Developments (by Sergei A. Merkulov) 297
Chapter A. New Developments in Twistor Theory 299
Chapter B. Geometry on Supermanifolds 329
Notes 338
Bibliography 339
