

Table of Contents

Part I Overview

The Development of Discontinuous Galerkin Methods <i>Bernardo Cockburn, George E. Karniadakis, and Chi-Wang Shu</i>	3
--	---

Part II Invited Papers

Steps Toward a Robust High-Order Simulation Tool for Aerospace Applications <i>Harold L. Atkins</i>	53
Simplified Discontinuous Galerkin Methods for Systems of Conservation Laws with Convex Extension <i>Timothy J. Barth</i>	63
A High Order Discontinuous Galerkin Method for Compressible Turbulent Flows <i>Francesco Bassi and Stefano Rebay</i>	77
Discontinuous Galerkin Methods for Elliptic Problems <i>Douglas N. Arnold, Franco Brezzi, Bernardo Cockburn, and Donatella Marini</i>	89
Analysis of Finite Element Methods for Linear Hyperbolic Problems <i>Richard S. Falk</i>	103
Software for the Parallel Adaptive Solution of Conservation Laws by Discontinuous Galerkin Methods <i>Joseph E. Flaherty, Raymond M. Loy, Mark S. Shephard, and Jim D. Teresco</i>	113
Simulation of Gravity Flow of Granular Materials in Silos <i>Pierre A. Gremaud and John V. Matthews</i>	125

A Comparison of Discontinuous and Continuous Galerkin Methods Based on Error Estimates, Conservation, Robustness and Efficiency <i>Thomas J.R. Hughes, Gerald Engel, Luca Mazzei, and Mats G. Larson</i>	135
The Utility of Modeling and Simulation in Determining Transport Performance Properties of Semiconductors <i>Bernardo Cockburn, Joseph W. Jerome, and Chi-Wang Shu</i>	147
A Discontinuous Galerkin Method for the Incompressible Navier-Stokes Equations <i>Ohannes Karakashian and Theodoros Katsaounis</i>	157
Full Convergence for Hyperbolic Finite Elements <i>Qun Lin</i>	167
A Conservative DGM for Convection-Diffusion and Navier-Stokes Problems <i>J. Tinsley Oden and Carlos Erik Baumann</i>	179
GMRES Discontinuous Galerkin Solution of the Compressible Navier-Stokes Equations <i>Francesco Bassi and Stefano Rebay</i>	197
Explicit Finite Element Methods for Linear Hyperbolic Systems <i>Richard S. Falk and Gerard R. Richter</i>	209
hp-DGFEM for Partial Differential Equations with Nonnegative Characteristic Form <i>Endre Süli, Christoph Schwab, and Paul Houston</i>	221
A Discontinuous Galerkin Method Applied to Nonlinear Parabolic Equations <i>Béatrice Rivière and Mary F. Wheeler</i>	231
<hr/>	
Part III Contributed Papers	
<hr/>	
Parallel Iterative Discontinuous Galerkin Finite-Element Methods <i>Dan Aharoni and Amnon Barak</i>	247
A Discontinuous Projection Algorithm for Hamilton Jacobi Equations <i>Steeve Augoula and Rémi Abgrall</i>	255

Successes and Failures of Discontinuous Galerkin Methods in Viscoelastic Fluid Analysis <i>Arjen C.B. Bogaerds, Wilco M.H. Verbeeten, and Frank P.T. Baaijens</i>	263
High Order Current Basis Functions for Electromagnetic Scattering of Curved Surfaces <i>Wei Cai</i>	271
An Adaptive Discontinuous Galerkin Model for Coupled Viscoplastic Crack Growth and Chemical Transport <i>Fernando L. Carranza and R.B. Haber</i>	277
An Optimal Estimate for the Local Discontinuous Galerkin Method <i>Paul Castillo</i>	285
Post-Processing of Galerkin Methods for Hyperbolic Problems <i>Bernardo Cockburn, Mitchell Luskin, Chi-Wang Shu, and Endre Süli</i> . .	291
Introduction to Discontinuous Wavelets <i>Nicholas Coult</i>	301
The Local Discontinuous Galerkin Method for Contaminant Transport Problems <i>Clint Dawson, Vadym Aizinger, and Bernardo Cockburn</i>	309
Discontinuous Galerkin Method for the Numerical Solution of Euler Equations in Axisymmetric Geometry <i>Bruno Despres</i>	315
Ten Years Using Discontinuous Galerkin Methods for Polymer Processing Problems <i>André Fortin, Alain Béliveau, Marie-Claude Heuzey, and Alain Lioret</i>	321
Using Krylov-Subspace Iterations in Discontinuous Galerkin Methods for Nonlinear Reaction-Diffusion Systems <i>Donald J. Estep and Roland W. Freund</i>	327
An Abridged History of Cell Discretization <i>John Greenstadt</i>	337
The Effect of the Least Square Procedure for Discontinuous Galerkin Methods for Hamilton-Jacobi Equations <i>Changqing Hu, Olga Lepsky, and Chi-Wang Shu</i>	343

A Posteriori Error Estimate in the Case of Insufficient Regularity of the Discrete Space <i>Guido Kanschat and Franz-Theo Suttmeier</i>	349
Discontinuous Spectral Element Approximation of Maxwell's Equations <i>David A. Kopriva, Stephen L. Woodruff, and M.Y. Hussaini</i>	355
A Posteriori Error Estimation for Adaptive Discontinuous Galerkin Approximations of Hyperbolic Systems <i>Mats G. Larson and Timothy J. Barth</i>	363
A Numerical Example on the Performance of High Order Discontinuous Galerkin Method for 2D Incompressible Flows <i>Jian-Guo Liu and Chi-Wang Shu</i>	369
A Discontinuous Galerkin Method in Moving Domains <i>Igor Lomtev, Robert M. Kirby, and George E. Karniadakis</i>	375
Discontinuous Galerkin for Hyperbolic Systems with Stiff Relaxation <i>Robert B. Lowrie and Jim E. Morel</i>	385
Finite Element Output Bounds for Parabolic Equations: Application to Heat Conduction Problems <i>Luc Machiels</i>	391
3D Unstructured Mesh ALE Hydrodynamics with the Upwind Discontinuous Galerkin Method <i>Manoj K. Prasad, Jose L. Milovich, Aleksei I. Shestakov, David S. Kershaw and Michael J. Shaw</i>	397
Some Remarks on the Accuracy of a Discontinuous Galerkin Method <i>Patrick Rasetarinera, Mohammed Y. Hussaini, and Fang Q. Hu</i>	407
Coupling Continuous and Discontinuous Techniques: An Adaptive Approach <i>Mirko Sardella</i>	413
A Discontinuous Galerkin Method for the Shallow Water Equations with Source Terms <i>Dirk Schwanenberg and Jürgen Köngeter</i>	419
Dispersion Analysis of the Continuous and Discontinuous Galerkin Formulations <i>Spencer Sherwin</i>	425

The Cell Discretization Algorithm; An Overview <i>Howard Swann</i>	433
Accuracy, Resolution, and Computational Complexity of a Discontinuous Galerkin Finite Element Method <i>Harmen van der Ven and J.J.W. van der Vegt</i>	439
An ELLAM Scheme for Porous Medium Flows <i>Hong Wang</i>	445
Application of the Discontinuous Galerkin Method to Maxwell's Equations Using Unstructured Polymorphic hp-Finite Elements <i>Tim Warburton</i>	451
A Space-Time Discontinuous Galerkin Method for Elastodynamic Analysis <i>Lin Yin, Amit Acharya, Nahil Sobh, Robert B. Haber, and Daniel A. Tortorelli</i>	459
Nonconforming, Enhanced Strain, and Mixed Finite Element Methods – A Unified Approach <i>Zhimin Zhang</i>	465
