

Table of Contents

<i>{P, Q, I, J} - Preference Structures</i>	1
Philippe Vincke	
<i>Multi-Objective Fuzzy Linear Programming: The MOFAC Method</i>	11
Philippe Fortemps and Jacques Teghem	
<i>An Extension of the Axioms of Utility Theory Based on Fuzzy Rationality Measures</i>	33
Vincenzo Cutello and Javier Montero	
<i>Hybrid Probabilistic-Possibilistic Mixtures and Utility Functions</i>	51
Didier Dubois, Endre Pap and Henri Prade	
<i>Additive Recursive Rules</i>	75
Javier Montero, Ana del Amo and Elisenda Molina	
<i>Maximizing the Information Obtained from Data Fusion</i>	89
Ronald R. Yager	
<i>Social Choice under Fuzziness: A Perspective</i>	107
Hannu Nurmi and Janusz Kacprzyk	
<i>Fuzzy Extension of the Rough Set Approach to Multicriteria and Multiattribute Sorting</i>	131
Salvatore Greco, Benedetto Matarazzo and Roman Slowinski	
<i>Behavioral Analysis of Aggregation in Multicriteria Decision Aid</i>	153
Jean-Luc Marichal	
<i>To be Symmetric or Asymmetric? A Dilemma in Decision Making</i>	179
Michel Grabisch and Christophe Labreuche	
<i>Monotone Functions on Finite Lattices: An Ordinal Approach to Capacities, Belief and Necessity Functions</i>	195
Jean-Pierre Barthélemy
