<b>Preface</b> .....	<b>ix</b>
<b>Introduction</b> .....	<b>xiii</b>
<b>I Methods</b> .....	<b>1</b>
<b>1. Preliminaries</b> .....	<b>3</b>
1.1 The formal inverse function theorem and its applications.....	3
1.2 Derivations.....	14
1.3 Locally finite derivations.....	22
1.4 Algorithms for locally nilpotent derivations.....	37
<b>2 Derivations and polynomial automorphisms</b> .....	<b>43</b>
2.1 Locally nilpotent derivations and polynomial automorphisms.....	43
2.2 Derivations and the Jacobian Condition.....	50
2.3 The degree of the inverse of a polynomial automorphism.....	55
<b>3 Invertibility criteria and inversion formulae</b> .....	<b>61</b>
3.1 A formula for the formal inverse.....	61
3.2 An invertibility algorithm for morphisms between finitely generated $k$ -algebras.....	63
3.3 A resultant criterion and formula for the inversion of a polynomial map in two variables.....	70
<b>4 Injective morphisms</b> .....	<b>77</b>
4.1 Injective endomorphisms are surjective.....	77
4.2 Injective endomorphisms of affine algebraic sets are automorphisms.....	79
4.3 A short proof of theorem 4.2.1 in case $V = k^n$ and an application to the Jacobian Conjecture.....	82
4.4 Injective morphisms between irreducible affine varieties of the same dimension.....	83
<b>5 The tame automorphism group of a polynomial ring</b> .....	<b>83</b>
5.1 The tame automorphism group of $R[X, Y]$ .....	86
5.2 The tame automorphism group in dimension $\geq 3$ .....	99
5.3 Embeddings of affine algebraic varieties and tame automorphisms.....	99
5.4 The Abhyankar-Moh theorem.....	106
<b>6 Stabilization Methods</b> .....	<b>117</b>
6.1 The stabilization principle: some instructive examples.....	117
6.2 Stable equivalence.....	119
6.3 Applications to the Jacobian Conjecture.....	125
6.4 Gorni-Zampieri pairing.....	131

<b>7 Polynomial maps with nilpotent Jacobian</b> .....	<b>143</b>
7.1 Hubbers' theorem and a dependence problem .....	143
7.2 The class $H(n, A)$ .....	148
7.3 $H(n, A)$ , $D(n, A)$ and stable tameness .....	155
7.4 Strongly nilpotent Jacobian matrices .....	164
<b>II Applications</b> .....	<b>173</b>
<b>8 Applications of polynomial mappings to dynamical systems</b> .....	<b>175</b>
8.1 The Markus-Yamabe Conjecture and a problem of LaSalle; some background .....	175
8.2 The Markus-Yamabe Conjecture and the LaSalle problem in dimension two .....	180
8.3 The story of the solution of the Markus-Yamabe Conjecture .....	185
8.4 Meisters' cubic-linear linearization conjecture and the MYC revisited .....	195
<b>9 Group actions</b> .....	<b>203</b>
9.1 Algebraic group actions: an introduction .....	203
9.2 Hilbert's finiteness theorem .....	208
9.3 Constructive invariant theory: Derksen's algorithm to compute the invariants for reductive groups .....	211
9.4 A linearization conjecture for reductive group actions .....	215
9.5 $G_a$ -actions .....	219
9.6 $G_a$ -actions and Hilbert's fourteenth problem .....	228
<b>10 The Jacobian Conjecture</b> .....	<b>239</b>
10.1 Injectivity and invertibility of differentiable maps and the real Jacobian Conjecture .....	239
10.2 The two-dimensional Jacobian Conjecture .....	245
10.3 Polynomial maps with integer coefficients and the Jacobian Conjecture in positive characteristic .....	257
10.4 $\mathfrak{D}$ -modules and the Jacobian Conjecture .....	263
10.5 Endomorphisms sending coordinates to coordinates .....	269
<b>III Appendices</b> .....	<b>275</b>
<b>A Some commutative algebra</b> .....	<b>277</b>
A.1 Rings .....	277
A.2 Modules .....	277
A.3 Localization .....	278
A.4 Completions .....	279
A.5 Finiteness conditions and integral extensions .....	279
A.6 The universal coefficients method .....	280
<b>B Some basic results from algebraic geometry</b> .....	<b>283</b>
B.1 Algebraic sets .....	283
B.2 Morphisms of irreducible affine algebraic varieties .....	284

<b>C</b>	<b>Some results from Gröbner basis theory</b> .....	<b>287</b>
C.1	Definitions and basic properties .....	287
C.2	Applications: several algorithms .....	287
<b>D</b>	<b>Flatness</b> .....	<b>291</b>
D.1	Flat modules and algebras .....	291
D.2	Flat morphisms between affine algebraic varieties .....	292
<b>E</b>	<b><math>\mathcal{D}</math>-modules</b> .....	<b>295</b>
E.1	$A_n$ -modules .....	295
E.2	Direct and inverse images .....	297
<b>F</b>	<b>Special examples and counterexamples</b> .....	<b>299</b>
	<b>Bibliography</b> .....	<b>307</b>
	<b>Authors Index</b> .....	<b>321</b>
	<b>Index</b> .....	<b>325</b>
