

Contents

1 Information Technologies for Education and Training	1
<i>Betty Collis</i>	
1.1 Introduction	1
1.2 Categories Relating to Technologies	2
1.3 Perspectives on Technology Levels: Micro, Meso, Macro	15
1.4 Convergence	16
1.5 Conclusion	19

Part I. Technologies

2 WWW in Education	23
<i>David Mioduser, Rafi Nachmias</i>	
2.1 Introduction	23
2.2 WWW in Education: Precedents and Landmarks	24
2.3 Main Educational Functions of WWW	25
2.4 Models of Implementation of the WWW in Education	27
2.5 Current Technological and Pedagogical State	32
2.6 Emerging Trends	37
2.7 Final Remarks	41
3 Communication Techniques	45
<i>Chee-Kit Looi</i>	
3.1 Introduction	45
3.2 Emails	46
3.3 Newsgroups or Discussion Groups	46
3.4 Annotations	48
3.5 Chat Groups	48
3.6 MUDs and MOOs	50
3.7 WOOs: Web-based MOOs	52
3.8 3D Virtual Space	53
3.9 Conclusion	54

4 Management Systems	57
<i>Ann E. Barron, Catherine Rickelman</i>	
4.1 Introduction	57
4.2 The Move to Web-Based Systems	58
4.3 Course Management Systems	58
4.4 Learning Management Systems	61
4.5 Options and Opportunities	62
5 Authoring Systems	63
<i>Philip Barker</i>	
5.1 Introduction	63
5.2 Historical Perspective	64
5.3 Current Trends	67
5.4 Case Studies: Web-based Teaching and Learning	69
5.5 Future Directions	73
5.6 Conclusion	75
6 Intelligent and Adaptive Systems	79
<i>Kinshuk, Ashok Patel, David Russell</i>	
6.1 Introduction	79
6.2 Background	81
6.3 Granular Interface Design	82
6.4 Feedback from an Independent Evaluation	85
6.5 Teacher: An Important Environmental Context	86
6.6 Adapting to the Teacher	88
6.7 Hyper-IES: A Granular Tutoring System	89
6.8 Conclusion	90
7 Performance-Support Systems	93
<i>Thomas C. Reeves, Arjan Raven</i>	
7.1 Introduction	93
7.2 Online Help	94
7.3 EPSS	96
7.4 Knowledge Management	102
7.5 The Future of Performance-Support	109
8 Web-Based 3D	113
<i>Stephan Diehl</i>	
8.1 Introduction	113
8.2 3D Technologies for the WWW	113
8.3 3D Learning Content on the WWW	115
8.4 Multiuser Worlds	117
8.5 The Role of the Teacher	117
8.6 Conclusion	118

9 Electronic Note-Taking	121
<i>Rainer Müller, Thomas Ottmann</i>	
9.1 Introduction	121
9.2 System Requirements	122
9.3 A Review of Existing Systems	124
9.4 Authoring on the Fly	132
9.5 Conclusion	134
10 Digital TV and Video	139
<i>Peter J. Bates</i>	
10.1 Introduction	139
10.2 Towards Video-enriched Interactive Learning Experiences	140
10.3 Distribution of Video-enriched Learning Experiences to the Home	140
10.4 Personalized TV – the new Killer Application?	144
10.5 Convergence of Technologies and Home Networking	146
10.6 Trends in Learning Resource Provision	146
10.7 Implications for Traditional Learning Institutions	148
10.8 Conclusions	149

Part II. Design and Development Lifecycle

11 Design Methodology	153
<i>Jef Moonen</i>	
11.1 Introduction	153
11.2 Traditional Design and Development Methodology for Digital Learning Material	154
11.3 Perspectives for Design and Development Methodologies	156
11.4 Methodologies from an Instructional-design Perspective	157
11.5 Methodologies from a Multimedia Perspective	159
11.6 Methodologies from a Web-based Resource Perspective	160
11.7 Lessons Learned and Future Developments	163
11.8 Issues Involving Design and Development Methodologies	164
11.9 The 3-Space Design Strategy	167
11.10 A New Approach: The 3-Space Design Strategy	170
11.11 Conclusion	175
12 Development Approaches	181
<i>Trevor Doerksen</i>	
12.1 Introduction	181
12.2 An Overview of Development Approaches	182
12.3 Focuses for Development Methodologies	187
12.4 Uncoupled Content as a Basis for Methodology	190
12.5 Summary	196

13 Pedagogical Design	199
<i>Joost Lowyck</i>	
13.1 Definition of the Pedagogical Design	199
13.2 History of Pedagogical Design of Computer-related Resources	199
13.3 Implications of Instructional Design Models on Learners and Designers of Computer-related Learning Resources	202
13.4 Characteristics of Instructional Design Models	209
13.5 Conclusion	212
14 Learning Settings and Activities	219
<i>Ron Oliver</i>	
14.1 Introduction	219
14.2 Exploring Contemporary Learning Environments	220
14.3 Designing Web-based Learning Environments	221
14.4 Designing Learning Activities	222
14.5 Learning Supports	225
14.6 The Learning Resources	227
14.7 Summary and Conclusions	229
15 User-interface Design	233
<i>Reinhard Oppermann</i>	
15.1 Introduction	233
15.2 General Requirements for User-Interface Design	234
15.3 Specific User-Interface Design for Learning Software	236
15.4 Conclusion	246
16 Designing Virtual Learning Centers	249
<i>Gilbert Paquette</i>	
16.1 Introduction	249
16.2 Distributed Models for a VLC	250
16.3 The Virtual Learning Center Model	255
16.4 Basis for a Design Strategy	262
16.5 Outline of an Instructional Engineering Method	266
16.6 Conclusion	269
17 Metadata Specifications	273
<i>Julia Innes, Rory McGreal</i>	
17.1 Introduction and Definitions	273
17.2 Metadata: Basic Aspects	274
17.3 Alternative Approaches	277
17.4 Implementation Case	286
17.5 Conclusion	288

18 Adoption Factors and Processes	293
<i>Brent Wilson, Lorraine Sherry, Jackie Dobrovolny, Mike Batty, Martin Ryder</i>	
18.1 Introduction	293
18.2 Facilitating Conditions	296
18.3 The Adoption Process	299
18.4 Concluding Thought: Continuing the Value Conversation	303
19 Evaluation	309
<i>Heiner Rindermann</i>	
19.1 Introduction	309
19.2 Special Attributes of Communication Technologies for Education and Teaching	316
19.3 Evaluation of Communication Technologies for Education and Teaching	319
19.4 Conclusion and Future Developments	324
<hr/>	
Part III. Human Actors	
<hr/>	
20 Developments in Learning	333
<i>Greg Kearsley</i>	
20.1 Background	333
20.2 Telelearning	334
20.3 Engagement Theory	335
20.4 Organizational Learning and Knowledge Management	337
20.5 Measurement of Learning	338
20.6 Discussion and Conclusions	339
21 Role of the Teacher	343
<i>Kwok-Wing Lai</i>	
21.1 Introduction	343
21.2 Professional Development and the Custodial Role	345
21.3 Teacher as Custodian	346
21.4 How did Students Respond to these Strategies?	350
21.5 Conclusion	352
22 Ethical Considerations	355
<i>Keith W. Miller</i>	
22.1 Introduction	355
22.2 Teaching with Technology: Five Ethical Issues	356
22.3 Concluding Remarks	361
23 Teacher Training	365
<i>Claudio Dondi, Michaela Moretti</i>	
23.1 Introduction	365
23.2 ICT and new ODL Scenarios	366
23.3 Teachers' and Trainers' Attitudes Towards ODL	370

23.4	European Experiences Compared	373
23.5	Conclusions	376
24	Competencies for Educators	381
	<i>Michael Szabo</i>	
24.1	Introduction	381
24.2	Competencies for the Educational Professional	386
24.3	Summary	395
25	The IT Specialist	399
	<i>Paul E. Resta</i>	
25.1	Introduction	399
25.2	The Changing Role of the Information Technology Professional	400
25.3	The Changing Skill Sets of the Information Technology Professional	402
25.4	The Growing Demand for Information Technology Support in Educational Organizations	404
25.5	Recruiting and Retaining Information Technology Staff	406
25.6	Continuing Professional Development of the Information Technology Staff	408
25.7	Conclusions	409
26	Cultural Perspectives	411
	<i>Sabine Seufert</i>	
26.1	Introduction	411
26.2	Definitions	412
26.3	Cultural Levels	414
26.4	Dimensions of Culture-related Differences	414
26.5	Design Guidelines for Culture-related Flexibility in Online Learning Environments	418
26.6	Conclusion	420

Part IV. Subject Areas

27	Computer Science	425
	<i>David Marshall</i>	
27.1	Introduction	425
27.2	Developing Courseware	426
27.3	Overview of Current Implementations	429
27.4	Using Movies to Illustrate Algorithms	431
27.5	Automated Coursework Assessment	440
27.6	Conclusions	445

28 Mathematics and Statistics	449
<i>Jari A. Multisilta</i>	
28.1 Introduction	449
28.2 The Learning Process	450
28.3 Classification of Educational Tools for Mathematics and Statistics	451
28.4 Technical Issues	451
28.5 Examples	452
28.6 Conclusions	455
29 Physics	459
<i>Dean A. Zollman</i>	
29.1 Underlying Instructional Principles	459
29.2 Data Collection with Video	461
29.3 Computer-Based Laboratories	463
29.4 Portable Laboratory Measurements	466
29.5 Expanding the Topics Which Can Be Taught	467
29.6 IT for Large Classes	468
29.7 Advanced Level Instruction	469
29.8 Conclusions	470
30 Engineering	475
<i>Rachelle S. Heller</i>	
30.1 Introduction	475
30.2 Environments of Higher Education	475
30.3 Technology Use for Engineering Education	478
30.4 Discussion	481
31 Business	485
<i>Susan Stoney</i>	
31.1 Introduction	485
31.2 Designing an Alternate Delivery Option	485
31.3 Conclusion	492
32 Humanities	495
<i>Koenraad de Smedt, William J. Black</i>	
32.1 Introduction	495
32.2 Large-scale Resources	498
32.3 Tools for Processing and Simulation	503
32.4 Courseware, Multimedia, and Hypermedia	508
32.5 Discussion and Conclusion	516
33 Languages	523
<i>Bernd Rüschoff</i>	
33.1 Introduction	523
33.2 The Knowledge Society	524
33.3 Language Learning and Constructivism	525

33.4	Constructivism and Constructionism	527
33.5	Current Materials	529
33.6	Technology-Enhanced Materials for Language Learning: a Typology ...	530
33.7	Perspectives	535
33.8	Summary	537

Part V. Learning Settings

34	Elementary/Secondary Education	543
	<i>Glen Bull, Randy Bell, Cheryl Mason, Joe Garofalo</i>	
34.1	Introduction	543
34.2	Computer Literacy	544
34.3	Computer-Assisted Instruction	546
34.4	School Reform	548
34.5	Discipline-Based Reforms	551
34.6	Summary	554
35	Network Services for Education	557
	<i>Kwok Lai-kuen, Tony R. Eastham</i>	
35.1	Background	557
35.2	Introduction to Networks in Education	557
35.3	Architecture	559
35.4	Technical Support, User Training, and Services	560
35.5	Common Services Provided by Networks in Education	563
35.6	Specific Services Provided by Networks in Education	569
35.7	Recommendations for an Education-Specific Network	572
35.8	Conclusions	575
35.9	Acknowledgment	575
36	The University	577
	<i>Stephen Brown</i>	
36.1	Introduction	577
36.2	Developments in Higher Education	578
36.3	Pros and Cons of IT in Learning and Teaching	584
36.4	Barriers to Successful Implementation	586
36.5	A New Paradigm: the WWW	590
36.6	Curriculum vs. Culture Change	592
37	Virtual Corporate Universities	599
	<i>Wolfgang Kraemer, Peter Sprenger, August-Wilhelm Scheer</i>	
37.1	From Information Society to Knowledge Society	599
37.2	Characteristics of Virtual Corporate Universities	601
37.3	Case Study: The DaimlerChrysler Corporate University	609

38 The Global Classroom	615
<i>Robin Mason</i>	
38.1 Definitions	615
38.2 Global Education as a Research Field	616
38.3 Online Tutoring	617
38.4 Online Course Design	617
38.5 Going Global	618
38.6 The Student on a Global Course	619
38.7 The Institution with a Global Spread	620
38.8 Conclusions	621
39 Digital Libraries	623
<i>Edward A. Fox, Marcos A. Gonçalves, Neill A. Kipp</i>	
39.1 Background	623
39.2 Theory	625
39.3 Case Studies	631
39.4 Prospects	633
40 Online Settings	643
<i>Claudia Lemke, Norbert Jesse, Walter Brenner</i>	
40.1 Introduction	643
40.2 Examples of Online Learning Systems	644
40.3 Conclusion	650
41 Electronic Business and Education	653
<i>Jan M. Pawlowski, Heimo H. Adelsberger</i>	
41.1 Introduction	653
41.2 Electronic Business	654
41.3 E-Markets for Education	660
41.4 Scenario for Electronic Education Markets	662
41.5 Conclusion	669
Index	673
List of Contributors	685
