

# Table of Contents

<i>Foreword</i> .....	VII
<b>Marian Florin Anton</b>	
Etale approximations and the mod $l$ cohomology of $GL_n$ .....	1
<b>Christian Ausoni</b>	
On the Hurewicz map and Postnikov invariants of $K\mathbb{Z}$ .....	11
<b>Bernard Badzioch</b>	
Recognition principle for generalized Eilenberg–Mac Lane spaces .....	21
<b>A. J. Berrick and P. H. Kropholler</b>	
Groups with infinite homology .....	27
<b>J. Michael Boardman and W. Stephen Wilson</b>	
Unstable splittings related to Brown–Peterson cohomology .....	35
<b>Carl-Friedrich Bödigheimer and Ulrike Tillmann</b>	
Stripping and splitting decorated mapping class groups .....	47
<b>F. R. Cohen and S. Gitler</b>	
Loop spaces of configuration spaces, braid-like groups, and knots .....	59
<b>F. R. Cohen and Ran Levi</b>	
On the homotopy type of infinite stunted projective spaces .....	79
<b>M. C. Crabb and J. R. Hubbuck</b>	
Stable splittings of $\Omega SU(n)$ .....	91
<b>Juan A. Crespo</b>	
Structure of mod $p$ $H$ -spaces with finiteness conditions .....	103
<b>Brayton Gray</b>	
Composition methods in the homotopy groups of ring spectra .....	131
<b>J. P. C. Greenlees</b>	
Tate cohomology in axiomatic stable homotopy theory .....	149
<b>Jesper Grodal</b>	
Serre’s theorem and the $Nil_l$ filtration of Lionel Schwartz .....	177

<b>Nicholas J. Kuhn</b>	New relationships among loopspaces, symmetric products, and Eilenberg MacLane spaces .....	185
<b>Wolfgang Lück and Bob Oliver</b>	Chern characters for the equivariant $K$ -theory of proper $G$ -CW-complexes .....	217
<b>Mark Mahowald, Douglas C. Ravenel and Paul Shick</b>	The Thomified Eilenberg–Moore spectral sequence .....	249
<b>Guido Mislin</b>	On the classifying space for proper actions .....	263
<b>Jesper M. Møller</b>	Toric morphisms between $p$ -compact groups .....	271
<b>Hans Jørgen Munkholm and Stratos Prassidis</b>	On the vanishing of certain $K$ -theory Nil-groups .....	307
<b>Aniceto Murillo and Antonio Viruel</b>	Lusternik–Schnirelmann cocategory: A Whitehead dual approach ....	323
<b>Salvina Piccarreta</b>	Rational self-equivalences for $H$ -spaces .....	349
<b>José L. Rodríguez and Jérôme Scherer</b>	Cellular approximations using Moore spaces .....	357
<b>Paolo Salvatore</b>	Configuration spaces with summable labels .....	375
<b>Hans Scheerer and Daniel Tanré</b>	Kaleidoscoping Lusternik–Schnirelmann category type invariants ....	397
<b>Jeffrey Strom</b>	Essential category weight and phantom maps .....	407
