

# Table of Contents of Volume I

Preface.....	xiii
History and Significance.....	xiv
Committees.....	xvi
Congress Programme.....	xvii
Acknowledgements.....	xxi
EMS Prize Winners.....	xxiii
Felix Klein Prize Winner.....	xxviii
Opening Ceremony	
Address by Sebastià Xambó.....	xxix
Address by Ramón Marimón.....	xxxiii
Address by Andreu Mas-Colell.....	xxxiv
Address by Joan Clos.....	xxxv
Address by Rolf Jeltsch.....	xxxvii
Address by Manuel Castellet.....	xxxix
Closing Ceremony	
Address by Sebastià Xambó.....	xl
Address by Rolf Jeltsch.....	xlviii
<b>Articles by Plenary Speakers</b>	
Robbert Dijkgraaf	
<i>The Mathematics of M-Theory</i> .....	1
Hans Föllmer	
<i>Probabilistic Aspects of Financial Risk</i> .....	21
Hendrik W. Lenstra, Jr.	
<i>Flags and Lattice Basis Reduction</i> .....	37

Yuri I. Manin	
<i>Moduli, Motives, Mirrors</i> .....	53
Yves Meyer	
<i>The Role of Oscillations in Some Nonlinear Problems</i> .....	75
Carles Simó	
<i>New Families of Solutions in N-Body Problems</i> .....	101
Marie-France Vignéras	
<i>Irreducible Modular Representations of a Reductive p-Adic Group and Simple Modules for Hecke Algebras</i> .....	117
Oleg Viro	
<i>Dequantization of Real Algebraic Geometry on Logarithmic Paper</i> .....	135

### Articles by Parallel Speakers

Rudolf Ahlswede	
<i>Advances on Extremal Problems in Number Theory and Combinatorics</i> .....	147
Volker Bach	
<i>Spectral Analysis of Nonrelativistic Quantum Electrodynamics</i> .....	177
Viviane Baladi	
<i>Spectrum and Statistical Properties of Chaotic Dynamics</i> .....	203
Joaquim Bruna	
<i>Sampling in Complex and Harmonic Analysis</i> .....	225
Nicolas Burq	
<i>Lower Bounds for Shape Resonance Widths of Schrödinger Operators</i> .....	247
Xavier Cabré	
<i>A Conjecture of De Giorgi on Symmetry for Elliptic Equations in <math>\mathbb{R}^n</math></i> .....	259
Peter J. Cameron	
<i>The Random Graph Revisited</i> .....	267
Zoé Chatzidakis	
<i>Difference Fields: Model Theory and Applications to Number Theory</i> .....	275
Ciro Ciliberto	
<i>Geometric Aspects of Polynomial Interpolation in More Variables and of Waring's Problem</i> .....	289
Gianni Dal Maso	
<i>The Calibration Method for Free Discontinuity Problems</i> .....	317
Jan Denef and François Loeser	
<i>Geometry on Arc Spaces of Algebraic Varieties</i> .....	327
Barbara Fantechi	
<i>Stacks for Everybody</i> .....	349

Alexander B. Goncharov	
<i>Multiple <math>\zeta</math>-Values, Galois Groups, and Geometry of Modular Varieties</i> . . . . .	361
Alexander Grigor'yan	
<i>Heat Kernels on Manifolds, Graphs and Fractals</i> . . . . .	393
Michael Harris	
<i>Local Langlands Correspondences and Vanishing Cycles on Shimura Varieties</i> . . . . .	407
Renato Iturriaga and Konstantin Khanin	
<i>Burgers Turbulence and Dynamical Systems</i> . . . . .	429
Kurt Johansson	
<i>Random Growth and Random Matrices</i> . . . . .	445
Pekka Koskela	
<i>Sobolev Spaces and Quasiconformal Mappings on Metric Spaces</i> . . . . .	457
Nicholas S. Manton and Bernard M. A. G. Piette	
<i>Understanding Skyrmions Using Rational Maps</i> . . . . .	469
Ieke Moerdijk	
<i>Models for the Leaf Space of a Foliation</i> . . . . .	481
Eric M. Opdam	
<i>Multivariable Hypergeometric Functions</i> . . . . .	491
Thomas Peternell	
<i>Contact Structures, Rational Curves and Mori Theory</i> . . . . .	509
Alexander Reznikov	
<i>Analytic Topology</i> . . . . .	519
Bernhard Schmidt	
<i>Towards Ryser's Conjecture</i> . . . . .	533
Klaus Schmidt	
<i>The Dynamics of Algebraic <math>\mathbb{Z}^d</math>-Actions</i> . . . . .	543
Bálint Tóth	
<i>Self-Interacting Random Motions</i> . . . . .	555
Erik van den Ban and Henrik Schlichtkrull	
<i>Harmonic Analysis on Reductive Symmetric Spaces</i> . . . . .	565

# Table of Contents of Volume II

## Articles by Prize Winners

Semyon Alesker <i>Classification Results on Valuations on Convex Sets</i> .....	1
Raphaël Cerf <i>Towards a Microscopic Theory of Phase Coexistence</i> .....	9
Dominic Joyce <i>Constructing Compact 8-Manifolds with Holonomy Spin(7) from Calabi-Yau Orbifolds</i> .....	21
Vincent Lafforgue <i>Banach KK-Theory and the Baum-Connes Conjecture</i> .....	31
Michael McQuillan <i>An Introduction to Non-Commutative Mori Theory</i> .....	47
Stefan Nemirovski <i>Geometric Methods in Complex Analysis</i> .....	55
Paul Seidel <i>Vanishing Cycles and Mutation</i> .....	65
Wendelin Werner <i>Critical Exponents, Conformal Invariance and Planar Brownian Motion</i> .....	87

## Mini-Symposium on Computer Algebra

Manuel Bronstein <i>Computer Algebra Algorithms for Linear Ordinary Differential and Difference Equations</i> .....	105
Wolfram Decker <i>Some Introductory Remarks on Computer Algebra</i> .....	121
Gaston H. Gonnet <i>A Study of Iteration Formulas for Root Finding, Where Mathematics, Computer Algebra and Software Engineering Meet</i> .....	143
Laureano González-Vega and Tomás Recio <i>Industrial Applications of Computer Algebra: Climbing Up a Mountain, Going Down a Hill</i> .....	157
Gert-Martin Greuel <i>Applications of Computer Algebra to Algebraic Geometry, Singularity Theory and Symbolic-Numerical Solving</i> .....	169

### Mini-Symposium on Curves over Finite Fields and Codes

Noam D. Elkies	
<i>Explicit Towers of Drinfeld Modular Curves</i> .....	189
Arnaldo Garcia	
<i>Curves over Finite Fields Attaining the Hasse-Weil Upper Bound</i> .....	199
Farshid Hajir and Christian Maire	
<i>Asymptotically Good Towers of Global Fields</i> .....	207
Henning Stichtenoth	
<i>Explicit Constructions of Towers of Function Fields with Many Rational Places</i> .....	219
Gerard van der Geer	
<i>Curves over Finite Fields and Codes</i> .....	225
Chaoping Xing	
<i>Authentication Codes and Algebraic Curves</i> .....	239

### Mini-Symposium on Free Boundary Problems

Giovanni Bellettini	
<i>Some Aspects of Mean Curvature Flow in Presence of Nonsmooth Anisotropies</i> .....	245
Klaus Deckelnick	
<i>A Phase-Field Model for Diffusion-Induced Grain Boundary Motion</i> .....	255
Irina V. Denisova	
<i>Evolution of a Closed Interface between Two Liquids of Different Types</i> ....	263
Gonzalo Galiano	
<i>Applications of a Local Energy Method to Systems of PDE's Involving Free Boundaries</i> .....	273
Harald Garcke	
<i>Phase Boundaries in Alloys with Elastic Misfit</i> .....	281
Josephus Hulshof	
<i>Some Aspects of the Thin Film Equation</i> .....	291
Regis Monneau	
<i>A Brief Overview on the Obstacle Problem</i> .....	303
Henrik Shahgholian	
<i>The Impact of Monotonicity Formulas in Regularity of Free Boundaries</i> ....	313
José Miguel Urbano	
<i>A Free Boundary Problem: Contributions from Modern Analysis</i> .....	319

## Mini-Symposium on Mathematical Finance: Theory and Practice

Tomasz R. Bielecki and Stanley R. Pliska <i>Risk Sensitive Control with Applications to Fixed Income Portfolio Management</i> .....	331
M. A. H. Dempster and A. Eswaran <i>Wavelet Based PDE Valuation of Derivatives</i> .....	347
Ernst Eberlein and Sebastian Raible <i>Some Analytic Facts on the Generalized Hyperbolic Model</i> .....	367
Hélyette Geman <i>Functionals of Brownian Motion in Path-Dependent Option Valuation</i> .....	379
Ton Vorst <i>Optimal Portfolios under a Value at Risk Constraint</i> .....	391

## Mini-Symposium on Quantum Chaology

Eugene Bogomolny <i>Trace Formulas and Spectral Statistics of Diffractive Systems</i> .....	399
Monique Combescure and Didier Robert <i>Semiclassical Results in the Linear Response Theory</i> .....	413
Jens Marklof <i>The Berry-Tabor Conjecture</i> .....	421
Zeév Rudnick <i>On Quantum Unique Ergodicity for Linear Maps of the Torus</i> .....	429

## Mini-Symposium on Quantum Computing

Nicolas Gisin, Renato Renner and Stefan Wolf <i>Bound Information: The Classical Analog to Bound Quantum Entanglement</i> .....	439
--	-----

## Mini-Symposium on String Theory and M-Theory

Michael R. Douglas <i>D-Branes on Calabi-Yau Manifolds</i> .....	449
José M. F. Labastida <i>Knot Invariants and Chern-Simons Theory</i> .....	467
Marcos Mariño <i>Topological Quantum Field Theory and Four-Manifolds</i> .....	479
Christoph Schweigert and Jürgen Fuchs <i>D-Brane Conformal Field Theory and Bundles of Conformal Blocks</i> .....	489
Angel M. Uranga <i>From Quiver Diagrams to Particle Physics</i> .....	499

## Mini-Symposium on Symplectic and Contact Geometry and Hamiltonian Dynamics

Paul Biran	
<i>From Symplectic Packing to Algebraic Geometry and Back</i> .....	507
Yuri Chekanov	
<i>New Invariants of Legendrian Knots</i> .....	525
Hansjörg Geiges	
<i>Contact Topology in Dimension Greater than Three</i> .....	535
Viktor L. Ginzburg	
<i>The Hamiltonian Seifert Conjecture: Examples and Open Problems</i> .....	547
Àngel Jorba and Jordi Villanueva	
<i>The Fine Geometry of the Cantor Families of Invariant Tori in Hamiltonian Systems</i> .....	557
Mikhail B. Sevryuk	
<i>Symplectic and Contact Geometry and Hamiltonian Dynamics</i> .....	565
Vladimir Zakalyukin	
<i>Simple Coisotropic Projections and Caustics</i> .....	575

## Mini-Symposium on Wavelet Applications in Signal Processing

Eric Chassande-Mottin and Patrick Flandrin	
<i>Reassigned Scalograms and Singularities</i> .....	583
Peter F. Craigmile, Donald B. Percival and Peter Guttorp	
<i>The Impact of Wavelet Coefficient Correlations on Fractionally Differenced Process Estimation</i> .....	591
Emma J. McCoy	
<i>Wavelet-Based Modelling of Persistent Periodicities</i> .....	601
Rudolf H. Riedi, Vinay J. Ribeiro, Matthew S. Crouse and Richard G. Baraniuk	
<i>Network Traffic Modeling Using a Multifractal Wavelet Model</i> .....	609
Vasily Strela	
<i>Denoising Via Block Wiener Filtering in Wavelet Domain</i> .....	619
Andrew T. Walden	
<i>Wavelet Analysis of Discrete Time Series</i> .....	627
