|          |   |    |
|----------|---|----|
| <b>0</b> | <b>Introduction</b>                                       | 1  |
| <b>1</b> | <b>Algebraically Closed Fields</b>                        | 9  |
| 1.1      | Definitions and First Properties                          | 9  |
| 1.2      | Euclidean Division and Greatest Common Divisor            | 12 |
| 1.3      | Projection Theorem for Constructible Sets                 | 16 |
| 1.4      | Quantifier Elimination and the Transfer Principle         | 22 |
| 1.5      | Bibliographical Notes                                     | 24 |
| <b>2</b> | <b>Real Closed Fields</b>                                 | 25 |
| 2.1      | Definitions and First Properties                          | 25 |
| 2.2      | Real Root Counting  | 37 |
| 2.2.1    | Descartes's Law of Signs and<br>the Budan-Fourier Theorem | 37 |
| 2.2.2    | The Cauchy Index  | 43 |
| 2.2.3    | Sign Determination  | 50 |
| 2.3      | Projection Theorem for Semi-Algebraic Sets                | 54 |
| 2.4      | Applications  | 60 |
| 2.4.1    | Quantifier Elimination and the Transfer Principle         | 60 |
| 2.4.2    | Semi-Algebraic Functions                                  | 62 |
| 2.4.3    | Extension of Semi-Algebraic Sets and Functions            | 63 |
| 2.5      | Puiseux Series  | 64 |
| 2.6      | Bibliographical Notes                                     | 72 |
| <b>3</b> | <b>Semi-Algebraic Sets</b>                                | 73 |
| 3.1      | Topology  | 73 |
| 3.2      | Semi-algebraically Connected Sets                         | 76 |
| 3.3      | Semi-algebraic Germs                                      | 77 |
| 3.4      | Closed and Bounded Semi-algebraic Sets                    | 82 |
| 3.5      | Implicit Function Theorem                                 | 83 |
| 3.6      | Bibliographical Notes                                     | 89 |

|          |  |     |
|----------|--|-----|
| <b>4</b> | <b>Algebra</b>   | 91  |
| 4.1      | Quadratic Forms and Root Counting                                    | 91  |
| 4.1.1    | Quadratic Forms  | 91  |
| 4.1.2    | Hermite's Quadratic Form and the Discriminant                        | 96  |
| 4.2      | Resultant and Subresultant Coefficients                              | 103 |
| 4.3      | Hilbert's Nullstellensatz  | 111 |
| 4.4      | Zero-dimensional Systems   | 121 |
| 4.5      | Multivariate Hermite's Quadratic Form                                | 127 |
| 4.6      | Projective Space and a Weak Bézout's Theorem                         | 131 |
| 4.7      | Bibliographical Notes  | 136 |
| <b>5</b> | <b>Decomposition of Semi-Algebraic Sets</b>                          | 137 |
| 5.1      | Cylindrical Decomposition  | 137 |
| 5.2      | Semi-algebraically Connected Components                              | 147 |
| 5.3      | Dimension  | 148 |
| 5.4      | Semi-algebraic Description of Cells                                  | 150 |
| 5.5      | Stratification   | 152 |
| 5.6      | Simplicial Complexes   | 158 |
| 5.7      | Triangulation  | 160 |
| 5.8      | Hardt's Triviality Theorem and Consequences                          | 164 |
| 5.9      | Semi-algebraic Sard's Theorem  | 169 |
| 5.10     | Bibliographical Notes  | 172 |
| <b>6</b> | <b>Elements of Topology</b>  | 173 |
| 6.1      | Simplicial Homology Theory   | 173 |
| 6.1.1    | The Homology Groups of a Simplicial Complex                          | 173 |
| 6.1.2    | The Mayer-Vietoris Theorem   | 177 |
| 6.1.3    | Chain Homotopy   | 179 |
| 6.1.4    | The Simplicial Homology Groups Are Invariant Under Homeomorphism     | 182 |
| 6.2      | Simplicial Homology of Closed and Bounded Semi-algebraic Sets        | 190 |
| 6.2.1    | Definitions and First Properties                                     | 190 |
| 6.2.2    | Homotopy   | 193 |
| 6.2.3    | Homology Groups of Closed Semi-algebraic Sets and of Sign Conditions | 195 |
| 6.3      | Euler-Poincaré Characteristic  | 197 |
| 6.4      | Bibliographical Notes  | 200 |
| <b>7</b> | <b>Quantitative Semi-algebraic Geometry</b>                          | 201 |
| 7.1      | Morse Theory   | 201 |
| 7.2      | Sum of the Betti Numbers of Real Algebraic Sets                      | 220 |
| 7.3      | Bounding the Betti Numbers of Realizations of Sign Conditions        | 228 |
| 7.4      | Sum of the Betti Numbers of Closed Semi-algebraic Sets               | 235 |
| 7.5      | Bibliographical Notes  | 239 |

|   |     |
|---|-----|
| <b>8 Complexity of Basic Algorithms</b>                                 | 241 |
| 8.1 Definition of Complexity  | 241 |
| 8.2 Linear Algebra  | 252 |
| 8.2.1 Size of Determinants  | 252 |
| 8.2.2 Evaluation of Determinants  | 254 |
| 8.2.3 Characteristic Polynomial   | 259 |
| 8.2.4 Signature of Quadratic Forms                                      | 262 |
| 8.3 Remainder Sequences and Subresultants                               | 263 |
| 8.3.1 Remainder Sequences   | 263 |
| 8.3.2 Signed Subresultant Polynomials                                   | 265 |
| 8.3.3 Size of Remainders and Subresultants                              | 276 |
| 8.3.4 Subresultant Computation  | 279 |
| 8.4 Bibliographical Notes   | 282 |
| <b>9 Cauchy Index and Applications</b>                                  | 283 |
| 9.1 Cauchy Index  | 283 |
| 9.1.1 Signed Remainder Sequence and Cauchy Index                        | 283 |
| 9.1.2 Signed Subresultant Coefficients and Cauchy Index                 | 284 |
| 9.1.3 Bezoutian and Cauchy Index  | 290 |
| 9.1.4 Cauchy Index Computation  | 297 |
| 9.1.5 Signed Subresultant Sequence and Cauchy Index on<br>an Interval   | 298 |
| 9.2 Hankel Matrices   | 301 |
| 9.2.1 Hankel Matrices and Rational Functions                            | 302 |
| 9.2.2 Signature of Hankel Quadratic Forms                               | 305 |
| 9.3 Number of Complex Roots with Negative Real Part                     | 313 |
| 9.4 Bibliographical Notes   | 319 |
| <b>10 Real Roots</b>  | 321 |
| 10.1 Bounds on Roots  | 321 |
| 10.2 Isolating Real Roots   | 329 |
| 10.3 Sign Determination   | 346 |
| 10.4 Roots in a Real Closed Field                                       | 358 |
| 10.5 Bibliographical Notes  | 363 |
| <b>11 Polynomial System Solving</b>                                     | 365 |
| 11.1 A Few Results on Gröbner Bases                                     | 365 |
| 11.2 Multiplication Tables  | 372 |
| 11.3 Special Multiplication Table                                       | 375 |
| 11.4 Univariate Representation  | 382 |
| 11.5 Limits of the Solutions of a Polynomial System                     | 389 |
| 11.6 Finding Points in Connected Components of Algebraic Sets           | 402 |
| 11.7 Computing the Euler-Poincaré Characteristic of an Algebraic<br>Set | 414 |
| 11.8 Bibliographical Notes  | 419 |

|  |     |
|--|-----|
| <b>12 Cylindrical Decomposition Algorithm</b> . . . . .                                | 421 |
| 12.1 Computing the Cylindrical Decomposition . . . . .                                 | 422 |
| 12.1.1 Outline of the Method . . . . .   | 422 |
| 12.1.2 Details of the Lifting Phase . . . . .  | 428 |
| 12.2 Decision Problem . . . . .  | 435 |
| 12.3 Quantifier Elimination . . . . .  | 443 |
| 12.4 Computation of Stratifying Families . . . . .                                     | 447 |
| 12.5 Topology of Curves . . . . .  | 449 |
| 12.6 Restricted Elimination . . . . .  | 459 |
| 12.7 Bibliographical Notes . . . . .   | 463 |
| <b>13 Existential Theory of the Reals</b> . . . . .                                    | 465 |
| 13.1 Finding Realizable Sign Conditions . . . . .                                      | 466 |
| 13.2 A Few Applications . . . . .  | 476 |
| 13.3 Sample Points on an Algebraic Set . . . . .                                       | 479 |
| 13.4 Computing the Euler-Poincaré Characteristic of Sign Conditions . . . . .          | 488 |
| 13.5 Bibliographical Notes . . . . .   | 492 |
| <b>14 Quantifier Elimination</b> . . . . .   | 493 |
| 14.1 Algorithm for the General Decision Problem . . . . .                              | 494 |
| 14.2 Quantifier Elimination . . . . .  | 507 |
| 14.3 Local Quantifier Elimination . . . . .  | 512 |
| 14.4 Dimension and Closure Semi-algebraic Sets . . . . .                               | 517 |
| 14.5 Bibliographical Notes . . . . .   | 521 |
