

Contents

Preface	vii
<i>A Principle of Variations in Representation Theory</i> A. Alekseev and F. Petrov	1
<i>Finite Group Actions on Poisson Algebras</i> Jacques Alev and Daniel R. Farkas	9
<i>Representations of Quantum Tori and G-bundles on Elliptic Curves</i> Vladimir Baranovsky, Sam Evens, and Victor Ginzburg	29
<i>Dixmier Algebras for Classical Complex Nilpotent Orbits via Kraft–Procesi Models I</i> Ranee Brylinski	49
<i>Brèves remarques sur l'oeuvre de A. A. Kirillov</i> Jacques Dixmier	69
<i>Gerbes of Chiral Differential Operators. III</i> Vassily Gorbounov, Fyodor Malikov, and Vadim Schechtman	73
<i>Defining Relations for the Exceptional Lie Superalgebras of Vector Fields</i> Pavel Grozman, Dmitry Leites, Irina Shchepochkina	101
<i>Schur–Weyl Duality and Representations of Permutation Groups</i> Eugene Gutkin	147
<i>Quantization of Hypersurface Orbital Varieties in \mathfrak{sl}_n</i> Anthony Joseph and Anna Melnikov	165
<i>Generalization of a Theorem of Waldspurger to Nice Representations</i> D. Kazhdan and A. Polishchuk	197
<i>Two More Variations on the Triangular Theme</i> A. A. Kirillov	243
<i>The Generalized Cayley Map from an Algebraic Group to its Lie Algebra</i> Bertram Kostant and Peter W. Michor	259
<i>Geometry of $GL_n(\mathbb{C})$ at Infinity: Hinges, Complete Collineations, Projective Compactifications, and Universal Boundary</i> Yurii A. Neretin	297

Why Would Multiplicities be Log-Concave?
Andrei Okounkov **329**

Point Processes Related to the Infinite Symmetric Group
Grigori Olshanski **349**

Some Toric Manifolds and a Path Integral
W. Rossmann **395**

*Projective Schur Functions as Bispherical Functions
on Certain Homogeneous Superspaces*
Alexander Sergeev **421**

Maximal Subalgebras of the Classical Linear Lie Superalgebras
Irina Shchepochkina **445**
