

# Contents

<b>Chapter I. Domains of Positivity</b> .....	1
§1. Some notions and notations .....	1
§2. The notion of a domain of positivity .....	5
§3. The automorphisms of a domain of positivity .....	9
§4. Norms of a domain of positivity .....	12
§5. Examples .....	14
§6. Differential operators .....	17
§7. An invariant line element .....	21
§8. The map $y \mapsto y^\sharp$ .....	23
§9. Homogeneous domains of positivity .....	29
Notes .....	32
Editors' Notes .....	32
<b>Chapter II. Omega Domains</b> .....	35
§1. The notion of an $\omega$ -domain .....	35
§2. Some examples .....	38
§3. The geodesics of an $\omega$ -domain .....	40
§4. Non-associative algebras .....	45
§5. $\omega$ -domains and Jordan algebras .....	48
Notes .....	50
Editors' Notes .....	51

<b>Chapter III. Jordan Algebras</b> .....	53
§1. Jordan algebras .....	53
§2. The radical of a Jordan algebra. ....	58
§3. The unit element of a Jordan algebra .....	61
§4. The decomposition theorem .....	64
§5. The inverse .....	66
§6. Constructions of Jordan algebras .....	68
Notes .....	71
Editors' Notes .....	71
 <b>Chapter IV. Real and Complex Jordan Algebras</b> .....	 73
§1. The quadratic representation .....	73
§2. Mutations .....	76
§3. A generalization of the fundamental formula .....	78
§4. The exponential .....	82
§5. The associated Lie algebra .....	85
§6. Direct sums .....	89
Notes .....	90
Editors' Notes .....	91
 <b>Chapter V. Complex Jordan Algebras</b> .....	 93
§1. Minimal polynomial and eigenvalues .....	93
§2. Minimal relations .....	95
§3. The minimal decomposition .....	97
§4. Applications of the minimal decomposition .....	99
§5. The eigenvalues of $L(u)$ and $P(u)$ .....	102
§6. The embedding of real Jordan algebras .....	105
Notes .....	107
Editors' Notes .....	108

<b>Chapter VI. Jordan Algebras and Omega Domains</b> .....	109
§1. The $\omega$ -domain of a Jordan algebra .....	109
§2. The Jordan algebra of an $\omega$ -domain .....	113
§3. Jordan algebras with equivalent $\omega$ -domains .....	115
§4. Formally real Jordan algebras .....	117
§5. Homogeneous domains of positivity .....	119
§6. Elementary functions on formally real Jordan algebras .....	122
§7. Direct sums .....	124
Notes .....	125
Editors' notes .....	126
<b>Chapter VII. Half-Spaces</b> .....	127
§1. The half-space of a semisimple Jordan algebra .....	127
§2. The isotropy group $\tilde{H}_0$ .....	131
§3. Application to the set $H$ .....	135
§4. Biholomorphic automorphisms of half-spaces .....	140
§5. Formally real Jordan algebras .....	142
§6. The bounded symmetric domain $\tilde{Z}$ .....	145
§7. Remarks on classification .....	147
§8. One typical example .....	148
Notes .....	153
Editors' Notes .....	153
<b>Appendix: The Bergman kernel function</b> .....	157
§1. Reproducing kernels .....	157
§2. Domains in complex number space .....	159
Notes .....	161
Editors' Notes .....	161
<b>Bibliography</b> .....	163
<b>Index</b> .....	171
<b>Biography</b> .....	175
