

Contents

Preface to the Second Russian Edition	V
1. The General Theory for One First-Order Equation	1
Literature	10
2. The General Theory for One First-Order Equation (Continued)	11
Literature	20
3. Huygens' Principle in the Theory of Wave Propagation	21
4. The Vibrating String (d'Alembert's Method)	27
4.1. The General Solution	27
4.2. Boundary-Value Problems and the Cauchy Problem	28
4.3. The Cauchy Problem for an Infinite String. d'Alembert's Formula	29
4.4. The Semi-Infinite String	31
4.5. The Finite String. Resonance	31
4.6. The Fourier Method	32
5. The Fourier Method (for the Vibrating String)	35
5.1. Solution of the Problem in the Space of Trigonometric Polynomials	35
5.2. A Digression	36
5.3. Formulas for Solving the Problem of Section 5.1	36
5.4. The General Case	36
5.5. Fourier Series	37
5.6. Convergence of Fourier Series	37
5.7. Gibbs' Phenomenon	39

6.	The Theory of Oscillations. The Variational Principle	41
	Literature	50
7.	The Theory of Oscillations. The Variational Principle (Continued)	51
8.	Properties of Harmonic Functions	65
	8.1. Consequences of the Mean-Value Theorem	67
	8.2. The Mean-Value Theorem in the Multidimensional Case	73
9.	The Fundamental Solution for the Laplacian. Potentials	77
	9.1. Examples and Properties	78
	9.2. A Digression. The Principle of Superposition	79
	9.3. Appendix. An Estimate of the Single-Layer Potential	89
10.	The Double-Layer Potential	93
	10.1. Properties of the Double-Layer Potential	94
11.	Spherical Functions. Maxwell's Theorem. The Removable Singularities Theorem	105
12.	Boundary-Value Problems for Laplace's Equation. Theory of Linear Equations and Systems	121
	12.1. Four Boundary-Value Problems for Laplace's Equation	121
	12.2. Existence and Uniqueness of Solutions	125
	12.3. Linear Partial Differential Equations and Their Symbols	127
A.	The Topological Content of Maxwell's Theorem on the Multifield Representation of Spherical Functions	135
	A.1. The Basic Spaces and Groups	136
	A.2. Some Theorems of Real Algebraic Geometry	137
	A.3. From Algebraic Geometry to Spherical Functions	139
	A.4. Explicit Formulas	141
	A.5. Maxwell's Theorem and $\mathbb{C}P^2/\text{conj} \approx S^4$	144
	A.6. The History of Maxwell's Theorem	145
	Literature	146
B.	Problems	149
	B.1. Material from the Seminars	149
	B.2. Written Examination Problems	156
