

# Table of Contents

<b>Preface</b> .....	VII
<b>1. Preliminaries</b> .....	1
<b>2. The Ehrenfeucht-Fraïssé Method</b> .....	13
2.1 Elementary Classes .....	13
2.2 Ehrenfeucht's Theorem .....	15
2.3 Examples and Fraïssé's Theorem .....	20
2.4 Hanf's Theorem .....	26
2.5 Gaifman's Theorem .....	30
<b>3. More on Games</b> .....	37
3.1 Second-Order Logic .....	37
3.2 Infinitary Logic: The Logics $L_{\infty\omega}$ and $L_{\omega_1\omega}$ .....	40
3.3 The Logics $FO^s$ and $L_{\infty\omega}^s$ .....	46
3.3.1 Pebble Games .....	49
3.3.2 The $s$ -Invariant of a Structure .....	54
3.3.3 Scott Formulas .....	56
3.4 Logics with Counting Quantifiers .....	58
3.5 Failure of Classical Theorems in the Finite .....	62
<b>4. 0-1 Laws</b> .....	71
4.1 0-1 Laws for FO and $L_{\infty\omega}^w$ .....	71
4.2 Parametric Classes .....	74
4.3 Unlabeled 0-1 Laws .....	77
4.3.1 Appendix .....	82
4.4 Examples and Consequences .....	84
4.5 Probabilities of Monadic Second Order Properties .....	88
<b>5. Satisfiability in the Finite</b> .....	95
5.1 Finite Model Property of $FO^2$ .....	95
5.2 Finite Model Property of $\forall^2\exists^*$ -Sentences .....	99

<b>6. Finite Automata and Logic: A Microcosm of Finite Model Theory</b> .....	105
6.1 Languages Accepted by Automata .....	105
6.2 Word Models .....	108
6.3 Examples and Applications .....	111
6.4 First-Order Definability .....	114
<b>7. Descriptive Complexity Theory</b> .....	119
7.1 Some Extensions of First-Order Logic .....	120
7.2 Turing Machines and Complexity Classes .....	124
7.2.1 Digression: Trahtenbrot's Theorem .....	127
7.2.2 Structures as Inputs .....	129
7.3 Logical Descriptions of Computations .....	133
7.4 The Complexity of the Satisfaction Relation .....	147
7.5 The Main Theorem and Some Consequences .....	151
7.5.1 Appendix .....	162
<b>8. Logics with Fixed-Point Operators</b> .....	165
8.1 Inflationary and Least Fixed-Points .....	165
8.2 Simultaneous Induction and Transitivity .....	177
8.3 Partial Fixed-Point Logic .....	191
8.4 Fixed-Point Logics and $L_{\infty\omega}^w$ .....	198
8.4.1 The Logic $\text{FO}(\text{PFP}_{\text{PTIME}})$ .....	205
8.4.2 Fixed-Point Logic with Counting .....	207
8.5 Fixed-Point Logics and Second-Order Logic .....	210
8.5.1 Digression: Implicit Definability .....	217
8.6 Transitive Closure Logic .....	220
8.6.1 $\text{FO}(\text{DTC}) < \text{FO}(\text{TC})$ .....	221
8.6.2 $\text{FO}(\text{posTC})$ and Normal Forms .....	224
8.6.3 $\text{FO}(\text{TC}) < \text{FO}(\text{LFP})$ .....	229
8.7 Bounded Fixed-Point Logic .....	235
<b>9. Logic Programs</b> .....	239
9.1 DATALOG .....	239
9.2 I-DATALOG and P-DATALOG .....	245
9.3 A Preservation Theorem .....	250
9.4 Normal Forms for Fixed-Point Logics .....	253
9.5 An Application of Negative Fixed-Point Logic .....	263
9.6 Hierarchies of Fixed-Point Logics .....	268
<b>10. Optimization Problems</b> .....	275
10.1 Polynomially Bounded Optimization Problems .....	275
10.2 Approximable Optimization Problems .....	280

<b>11. Logics for PTIME</b> .....	287
11.1 Logics and Invariants .....	288
11.2 PTIME on Classes of Structures .....	295
<b>12. Quantifiers and Logical Reductions</b> .....	307
12.1 Lindström Quantifiers .....	308
12.2 PTIME and Quantifiers .....	314
12.3 Logical Reductions .....	320
12.4 Quantifiers and Oracles .....	330
<b>References</b> .....	339
<b>Index</b> .....	349
