

Contents

<i>Foreword</i> P. Wakker	vii
<i>Preface</i> M. Grabisch, T. Murofushi and M. Sugeno	ix
PART 1: THEORY	
<i>Fuzzy Measures and Fuzzy Integrals</i> T. Murofushi and M. Sugeno	3
<i>Non-additive Measure and Integral, Basic Concepts and Their Role for Applications</i> D. Denneberg	42
<i>The Interaction and Möbius Representations of Fuzzy Measures on Finite Spaces, k-Additive Measures: A Survey</i> M. Grabisch	70
<i>Hierarchical Decomposition of the Choquet Integral</i> K. Fujimoto and T. Murofushi	94
<i>Towards Generalized Belief Functions</i> I. Kramosil	104
<i>Integration in Possibility Theory</i> G. De Cooman	124
<i>On the Autocontinuity of Set Functions</i> Z. Wang and K. Xu	161
<i>Pseudo-convolution and Its Applications</i> E. Pap	171
<i>Integrals with Respect to a General Fuzzy Measure</i> P. Benvenuti and R. Mesiar	205

<i>Measures on Triangular Norm-based Tribes: Properties and Integral Representations</i>	233
D. Butnariu and E.P. Klement	
<i>On Choquet and Sugeno Integrals as Aggregation Functions</i>	247
J.-L. Marichal	
<i>Comparison between Three Fuzzy Integrals</i>	273
H. Imaoka	
PART 2: APPLICATIONS	
<i>Choquet Expected Utility Model: A New Approach to Individual Behavior under Uncertainty and to Social Welfare</i>	289
A. Chateauneuf and M. Cohen	
<i>Qualitative Decision Theory with Sugeno Integrals</i>	314
D. Dubois, H. Prade and R. Sabbadin	
<i>The Choquet Integral in Multiattribute Decision Making</i>	333
T. Murofushi and M. Sugeno	
<i>Application of the Choquet Integral in Multicriteria Decision Making</i>	348
M. Grabisch and M. Roubens	
<i>A Hierarchical Subjective Evaluation Model Using Non-monotonic Fuzzy Measures and the Choquet Integral</i>	375
S.H. Kwon and M. Sugeno	
<i>The Choquet Integral in a Rough Software Cost Decision System</i>	392
J.F. Peters III, L. Han and S. Ramanna	
<i>Fuzzy Integral for Classification and Feature Extraction</i>	415
M. Grabisch	
<i>Fuzzy Integrals in Image Processing and Recognition</i>	435
J.M. Keller, P.D. Gader and A.K. Hocaoglu	
<i>An Algorithm for Calculating Natural Extensions with Respect to Lower Probabilities</i>	467
Z. Wang, G.J. Klir, J. Swan-Stone and K. Xu
