<b>Preface</b>	<b>ix</b>
<b>A Lagrangian Submanifolds</b>	
<i>Michèle Audin</i>	<b>1</b>
<b>Introduction</b>	<b>3</b>
<b>I Lagrangian and special Lagrangian immersions in <math>\mathbf{C}^n</math></b>	<b>5</b>
I.1 Symplectic form on $\mathbf{C}^n$ , symplectic vector spaces . . . . .	5
I.1.a Symplectic vector spaces . . . . .	5
I.1.b Symplectic bases . . . . .	6
I.1.c The symplectic form as a differential form . . . . .	7
I.1.d The symplectic group . . . . .	8
I.1.e Orthogonality, isotropy . . . . .	9
I.2 Lagrangian subspaces . . . . .	9
I.2.a Definition of Lagrangian subspaces . . . . .	9
I.2.b The symplectic reduction . . . . .	10
I.3 The Lagrangian Grassmannian . . . . .	11
I.3.a The Grassmannian $\Lambda_n$ as a homogeneous space . . . . .	11
I.3.b The manifold $\Lambda_n$ . . . . .	11
I.3.c The tautological vector bundle . . . . .	13
I.3.d The tangent bundle to $\Lambda_n$ . . . . .	14
I.3.e The case of oriented Lagrangian subspaces . . . . .	15
I.3.f The determinant and the Maslov class . . . . .	15
I.4 Lagrangian submanifolds in $\mathbf{C}^n$ . . . . .	16
I.4.a Lagrangian submanifolds described by functions . . . . .	16
I.4.b Wave fronts . . . . .	20
I.4.c Other examples . . . . .	25
I.4.d The Gauss map . . . . .	28

I.5	Special Lagrangian submanifolds in $\mathbf{C}^n$ . . . . .	29
I.5.a	Special Lagrangian subspaces . . . . .	29
I.5.b	Special Lagrangian submanifolds . . . . .	32
I.5.c	Graphs of forms . . . . .	33
I.5.d	Normal bundles of surfaces . . . . .	35
I.5.e	From integrable systems . . . . .	36
I.5.f	Special Lagrangian submanifolds invariant under $\mathrm{SO}(n)$ . . . . .	38
I.6	Appendices . . . . .	39
I.6.a	The topology of the symplectic group . . . . .	39
I.6.b	Complex structures . . . . .	41
I.6.c	Hamiltonian vector fields, integrable systems . . . . .	41
	Exercises . . . . .	44
<b>II</b>	<b>Lagrangian and special Lagrangian submanifolds in symplectic and Calabi-Yau manifolds</b> . . . . .	<b>49</b>
II.1	Symplectic manifolds . . . . .	49
II.2	Lagrangian submanifolds and immersions . . . . .	51
II.2.a	In cotangent bundles . . . . .	51
II.3	Tubular neighborhoods of Lagrangian submanifolds . . . . .	53
II.3.a	Moser's method . . . . .	53
II.3.b	Tubular neighborhoods . . . . .	57
II.3.c	"Moduli space" of Lagrangian submanifolds . . . . .	59
II.4	Calabi-Yau manifolds . . . . .	60
II.4.a	Definition of the Calabi-Yau manifolds . . . . .	61
II.4.b	Yau's theorem . . . . .	62
II.4.c	Examples of Calabi-Yau manifolds . . . . .	63
II.4.d	Special Lagrangian submanifolds . . . . .	66
II.5	Special Lagrangians in real Calabi-Yau manifolds . . . . .	66
II.5.a	Real manifolds . . . . .	66
II.5.b	Real Calabi-Yau manifolds . . . . .	67
II.5.c	The example of elliptic curves . . . . .	68
II.5.d	Special Lagrangians in real Calabi-Yau manifolds . . . . .	68
II.6	Moduli space of special Lagrangian submanifolds . . . . .	70
II.7	Towards mirror symmetry? . . . . .	73
II.7.a	Fibrations in special Lagrangian submanifolds . . . . .	74
II.7.b	Mirror symmetry . . . . .	75
	Exercises . . . . .	76
	<b>Bibliography</b> . . . . .	<b>81</b>

<b>B Symplectic Toric Manifolds</b>	<b>85</b>
<i>Ana Cannas da Silva</i>	
<b>Foreword</b>	<b>87</b>
<b>I Symplectic Viewpoint</b>	<b>89</b>
I.1 Symplectic Toric Manifolds . . . . .	89
I.1.1 Symplectic Manifolds . . . . .	89
I.1.2 Hamiltonian Vector Fields . . . . .	90
I.1.3 Integrable Systems . . . . .	91
I.1.4 Hamiltonian Actions . . . . .	94
I.1.5 Hamiltonian Torus Actions . . . . .	96
I.1.6 Symplectic Toric Manifolds . . . . .	98
I.2 Classification . . . . .	101
I.2.1 Delzant's Theorem . . . . .	101
I.2.2 Orbit Spaces . . . . .	103
I.2.3 Symplectic Reduction . . . . .	104
I.2.4 Extensions of Symplectic Reduction . . . . .	106
I.2.5 Delzant's Construction . . . . .	109
I.2.6 Idea Behind Delzant's Construction . . . . .	113
I.3 Moment Polytopes . . . . .	118
I.3.1 Equivariant Darboux Theorem . . . . .	118
I.3.2 Morse Theory . . . . .	119
I.3.3 Homology of Symplectic Toric Manifolds . . . . .	120
I.3.4 Symplectic Blow-Up . . . . .	122
I.3.5 Blow-Up of Toric Manifolds . . . . .	124
I.3.6 Symplectic Cutting . . . . .	126
<b>II Algebraic Viewpoint</b>	<b>129</b>
II.1 Toric Varieties . . . . .	129
II.1.1 Affine Varieties . . . . .	129
II.1.2 Rational Maps on Affine Varieties . . . . .	131
II.1.3 Projective Varieties . . . . .	132
II.1.4 Rational Maps on Projective Varieties . . . . .	135
II.1.5 Quasiprojective Varieties . . . . .	136
II.1.6 Toric Varieties . . . . .	137
II.2 Classification . . . . .	140
II.2.1 Spectra . . . . .	140
II.2.2 Toric Varieties Associated to Semigroups . . . . .	142
II.2.3 Classification of Affine Toric Varieties . . . . .	143
II.2.4 Fans . . . . .	144
II.2.5 Toric Varieties Associated to Fans . . . . .	148
II.2.6 Classification of Normal Toric Varieties . . . . .	153

II.3	Moment Polytopes . . . . .	154
II.3.1	Equivariantly Projective Toric Varieties . . . . .	154
II.3.2	Weight Polytopes . . . . .	155
II.3.3	Orbit Decomposition . . . . .	156
II.3.4	Fans from Polytopes . . . . .	158
II.3.5	Classes of Toric Varieties . . . . .	160
II.3.6	Symplectic vs. Algebraic . . . . .	161
	<b>Bibliography</b>	<b>165</b>
	<b>Index</b>	<b>169</b>
<b>C</b>	<b>Geodesic Flows and Contact Toric Manifolds</b>	
	<i>Eugene Lerman</i>	<b>175</b>
	<b>Foreword</b>	<b>177</b>
<b>I</b>	<b>From toric integrable geodesic flows to contact toric manifolds</b>	<b>179</b>
I.1	Introduction . . . . .	179
I.2	Symplectic cones and contact manifolds . . . . .	184
<b>II</b>	<b>Contact group actions and contact moment maps</b>	<b>193</b>
<b>III</b>	<b>Proof of Theorem I.38</b>	<b>197</b>
III.1	Homogeneous vector bundles and slices . . . . .	198
III.2	The 3-dimensional case . . . . .	202
III.3	Uniqueness of symplectic toric manifolds . . . . .	205
III.3.1	Čech cohomology . . . . .	211
III.4	Proof of Theorem I.38, part three . . . . .	213
III.4.1	Morse theory on orbifolds . . . . .	216
	<b>Appendix Hypersurfaces of contact type</b>	<b>221</b>
	<b>Bibliography</b>	<b>223</b>
