Preface vii

Some Standard Notations and Conventions ix

Part I: Normed spaces 1

Chapter 1. Open, closed, and bounded sets in normed spaces 3

1.1 Exercises 4
1.2 Solutions 11

Chapter 2. Linear and continuous operators on normed spaces 36

2.1 Exercises 37
2.2 Solutions 42

Chapter 3. Linear and continuous functionals. Reflexive spaces 68

3.1 Exercises 68
3.2 Solutions 72

Chapter 4. The distance between sets in Banach spaces 86

4.1 Exercises 86
4.2 Solutions 92

Chapter 5. Compactness in Banach spaces. Compact operators 107

5.1 Exercises 108
5.2 Solutions 115

Chapter 6. The Uniform Boundedness Principle 147

6.1 Exercises 147
6.2 Solutions 155

Chapter 7. The Hahn–Banach theorem 175

7.1 Exercises 175
7.2 Solutions 180

Chapter 8. Applications for the Hahn–Banach theorem 195

8.1 Exercises 196
8.2 Solutions 199

Chapter 9. Baire's category. The open mapping and closed graph theorems . . . 213
9.1 Exercises . . . 214
9.2 Solutions . . . 220

Part II: Hilbert spaces . . . 241

Chapter 10. Hilbert spaces, general theory . . . 243
10.1 Exercises . . . 245
10.2 Solutions . . . 250
Chapter 11. The projection in Hilbert spaces . . . 271
11.1 Exercises . . . 271
11.2 Solutions . . . 281
Chapter 12. Linear and continuous operators on Hilbert spaces . . . 305
12.1 Exercises . . . 306
12.2 Solutions . . . 318

Part III: General topological spaces . . . 366

Chapter 13. Linear topological and locally convex spaces . . . 368
13.1 Exercises . . . 369
13.2 Solutions . . . 377
Chapter 14. The weak topologies . . . 403
14.1 Exercises . . . 405
14.2 Solutions . . . 412
Bibliography . . . 444
List of Symbols . . . 447
Index . . . 449
