Preface to the third edition	ix

## **Section 1: Clinical** **1**

1. Principles of allergy diagnosis	3
2. Asthma	17
3. Extrinsic allergic alveolitis	37
4. Rhinitis	55
5. Conjunctivitis	77
6. Urticaria	95
7. Atopic dermatitis and allergic contact dermatitis	107
8. Gastrointestinal allergy	129
9. Occupational allergy	143
10. Drug allergy	157
11. Anaphylaxis	167
12. Immunotherapy	179
13. Pediatric allergy	189

## **Section 2: Basic Mechanisms** **203**

---

14. The genetic basis of allergic disease	205
15. Early life origins of allergy and asthma	223
16. Epidemiology of allergic disease	233
17. Allergens and pollutants	247
18. IgE structure, receptors, and signaling	289
19. Antigen presentation and IgE synthesis	309
20. Cytokines, chemokines, and adhesion proteins	329
21. Effector cells of allergy	351
22. Cellular and mediator mechanisms of the early-phase response	375
23. Cellular and mediator mechanisms of allergic inflammation	389
24. Drugs for the treatment of allergic disease	407
Glossary	429
Index	433
