1	Introduction	1
2	Why Does Germany Need a Reform of Capital Income Taxation?	5
2.1	The German Tax System of Corporate Taxation	5
2.2	The German Tax Reform 2000	7
2.3	Theoretical and Empirical Arguments for Lower Capital Income Taxation	10
2.4	Germany's Declining Economy and the Increasing Tax Competition in the EU	11
2.5	The Non-Transparent and Complicated German Tax System ..	16
2.6	Decreasing Revenues From Corporate Taxes	19
2.7	Summary	21
3	The Dual Income Tax	23
3.1	Definition and Main Features of the Dual Income Tax	23
3.2	The Case for a Dual Income Tax	25
3.2.1	The DIT and the Basic Principles of Taxation: Efficiency and Equity	26
3.2.2	Administrative Simplicity	33
3.2.3	Revenue Aspects	34
3.3	The Experience of Nordic Countries	35
3.3.1	Denmark	39
3.3.2	Finland	39
3.3.3	Norway	40
3.3.4	Sweden	42
3.4	Problems Related to the DIT Implementation	45
3.4.1	Difficulties Arising from the Separation of Labor and Capital Income	45
3.4.2	Solutions Applied by the Nordic Countries	45
3.5	Concrete Proposals for Germany	47

3.5.1	Main Features of a DIT System as Proposed by the GCEA (2003)	47
3.5.2	The DIT Proposal of Sinn (2003a)	48
3.6	Summary	51
	Appendix - A Reform Proposal for Switzerland	53
4	The Model	55
4.1	Overview of Different CGE Models and Their Characteristics ..	55
4.2	The Model	59
4.2.1	Business Sector	59
4.2.2	Stylized Analysis of Tax Policy and Effective Marginal Tax Rates	76
4.2.3	Households and General Equilibrium	78
4.2.4	General Macroeconomic Equilibrium	86
4.2.5	Welfare Analysis and the Marginal Excess Burden of Taxes	88
4.2.6	Rest of the World	91
5	Simulation Results	93
5.1	Model Calibration	93
5.1.1	Production Technology Parameters	94
5.1.2	Macroeconomic Data	96
5.2	The Marginal Excess Burden	97
5.3	Implementing a DIT as Suggested by the GCEA (2003)	98
5.3.1	Partial Analysis of the Effects of Each Individual Tax Rate Change	100
5.3.2	Steady State Comparisons of the Overall Reform Package	105
5.3.3	Transition Paths	112
5.4	Implementing a DIT as Suggested by Sinn (2003a)	119
5.4.1	Steady State Comparisons	120
5.4.2	Transition Paths	125
5.5	The Two Proposals Compared	129
5.6	Sensitivity Analysis	133
6	Conclusion	137
	Appendix A	141
	Appendix B	143
	Appendix B.1 Hayashi's Proof	143
	Appendix B.2 Intertemporal Optimization of Domestic Households	145

Appendix B.3 Walras Law	147
Appendix B.4 Savings Investment Identity	150
Appendix C – Functional Forms	153
Appendix C.1 Trend Growth	153
Appendix C.2 Factor Demands	155
Appendix C.3 Adjustment Cost Function	156
Appendix C.4 Agency Cost Function	157
Appendix D – Computational Strategy	159
