

# Table of Contents

<b>In Memory of Professor Chris Jensen-Butler .....</b>	<b>v</b>
<b>1. Introduction .....</b>	<b>1</b>
<i>Birgitte Sloth</i>	
<b>2. Road Pricing in Europe – A Review of Research and Practice .....</b>	<b>5</b>
<i>Esko Niskanen and Chris Nash</i>	
2.1 Introduction .....	5
2.2 The Current Situation .....	6
2.2.1 Background .....	6
2.2.2 Current Pricing Policies at National Level .....	7
2.2.3 EU Pricing Policy .....	8
2.2.4 The Need for Pricing Policy Reform .....	9
2.3 Key Issues, Concepts and Approaches .....	10
2.3.1 The Goals of Road Pricing .....	10
2.3.2 Theoretical Approaches to Road Pricing .....	11
2.3.3 Practical Approaches and Instruments .....	12
2.4 Road Pricing in Practice in Urban Transport .....	14
2.4.1 Current Schemes in Urban Transport Pricing .....	14
2.4.2 Barriers on Urban Road Pricing .....	15
2.4.3 The Next Steps in Urban Road Pricing .....	18
2.5 Road Pricing in Practice in Interurban Transport .....	19
2.5.1 Current Schemes in Interurban Transport .....	19
2.5.2 Barriers in Interurban Road Pricing .....	21
2.5.3 The Next Steps in Interurban Road Pricing .....	22
2.6 Conclusions .....	22
2.6.1 Lessons from Research .....	22
2.6.2 Lessons from Practical Experience: What Next? .....	24
<b>3. Road Pricing: Consequences for Traffic, Congestion and Location .....</b>	<b>29</b>
<i>Lars-Göran Mattsson</i>	
3.1 Introduction .....	29
3.2 Application of a Zone-Based Road Pricing System to Stockholm .....	31
3.2.1 Scenarios .....	31
3.2.2 Modelling Approach .....	32
3.2.3 Transport Effects .....	33
3.3 Application of a Distance-Based Road Pricing System to Stockholm .....	37

3.3.1	Scenarios .....	37
3.3.2	Modelling Approach .....	38
3.3.3	Transport Effects .....	38
3.4	Application of Optimal Congestion Pricing to a Generic City .....	40
3.4.1	Modelling Approach .....	40
3.4.2	Scenarios .....	42
3.4.3	Transport and Location Effects .....	43
3.5	Discussion and Conclusions.....	45
<b>4.</b>	<b>Implementation Paths for Marginal Cost-Based Pricing in Urban Transport: Theoretical Considerations and Case Study Results .....</b>	<b>49</b>
	<i>Erik T. Verhoef, C. Robin Lindsey, Esko Niskanen, André de Palma, Paavo Moilanen, Stef Proost and Arild Vold</i>	
4.1	Introduction.....	50
4.2	Implementation Paths: Motivation and Theory .....	50
4.2.1	Barriers.....	51
4.2.2	Constraints on Pricing.....	53
4.2.3	Correspondence Between Barriers and Constraints .....	54
4.3	Formulating Implementation Paths .....	56
4.4	Description of the MC-ICAM Urban Case Studies.....	58
4.4.1	The Paris Case Study.....	58
4.4.2	The Brussels Case Study .....	60
4.4.3	The Helsinki Case Study .....	61
4.4.4	The Greater Oslo Case Study .....	61
4.4.5	Assessment of the Case Studies .....	61
4.5	Implementation Paths in the Case Studies .....	62
4.5.1	Paris.....	65
4.5.2	Brussels .....	65
4.5.3	Helsinki .....	66
4.5.4	Greater Oslo .....	67
4.5.5	Role of Barriers and Constraints in the Case Study Implementation Paths.....	68
4.6	Case Study Findings.....	68
4.6.1	Main Results.....	68
4.6.2	Some Specific Issues.....	73
4.7	Concluding Remarks .....	75
4.7.1	Summary .....	75
4.7.2	Theoretical vs. Practical Approaches to the IPs .....	76
4.7.3	Questions of Priority and Timing.....	76
4.7.4	Other Limitations of the Case Studies.....	77
<b>5.</b>	<b>The London Congestion Charging Scheme: The Evidence .....</b>	<b>79</b>
	<i>John Peirson and Roger Vickerman</i>	
5.1	Introduction.....	79
5.2	Background to the LCCS .....	79

5.3	The Working of the LCCS .....	82
5.4	Theory of Area Pricing.....	83
5.5	Evidence on LCCS.....	84
5.6	Interpretation of the Evidence .....	85
5.7	Extension of LCCS Area.....	87
5.8	Relevance to Other Urban Road Pricing Schemes .....	87
5.9	Conclusions.....	88
<b>6.</b>	<b>The AKTA Road Pricing Experiment in Copenhagen.....</b>	<b>93</b>
	<i>Otto Anker Nielsen and Majken Vildrik Sørensen</i>	
6.1	Introduction.....	94
6.2	Design of the Experiment.....	94
6.2.1	Survey Setup .....	95
6.2.2	Pricing Schemes .....	96
6.3	Practical Issues.....	97
6.3.1	Problems with the GPS Technology .....	98
6.3.2	Adding a Third Round.....	99
6.4	General Results .....	100
6.4.1	Socioeconomic Variables for AKTA Participants.....	100
6.4.2	Experience and Attitudes Towards Road Pricing.....	101
6.4.3	The General Population Survey of Attitudes Towards Road Pricing.....	103
6.5	Behavioural Changes and AKTA: The Main Results .....	105
6.6	Discussion and Conclusions.....	107
6.6.1	GPS Technology .....	107
6.6.2	The Main Experimental Design .....	107
6.6.3	Changes in Behaviour and Evaluation of Different Pricing Schemes .....	108
6.6.4	Attitudes Towards Road Pricing .....	108
<b>7.</b>	<b>Experience with Measuring Equity and Efficiency: A Case from Oslo.....</b>	<b>111</b>
	<i>Farideh Ramjerdi, Knut Østmoe and Harald Minken</i>	
7.1	Introduction.....	111
7.2	Equity Measures.....	113
7.2.1	Properties of Equity Measures .....	114
7.2.2	Some Inequality Measures .....	115
7.3	Evaluation of Alternative Packages of Instruments for Oslo .....	117
7.4	A Sensitivity Analysis of MCF .....	122
7.5	An Evaluation of the Equity Implications of an "Optimal" Package .....	123
7.6	Some Conclusions.....	129
<b>8.</b>	<b>Transport Costs in a Multiregional Equilibrium Job Search Model... 133</b>	
	<i>Morten Marott Larsen, Ninette Pilegaard and Jos van Ommeren</i>	
8.1	Introduction.....	133

8.2	The Basic Model .....	136
8.2.1	The Matching Model.....	136
8.2.2	Job Destruction.....	137
8.2.3	Equilibrium Employment and Unemployment.....	137
8.2.4	Job Creation .....	138
8.2.5	Workers.....	138
8.2.6	The Spatial Wage Equation.....	138
8.2.7	Reservation Commuting Costs.....	139
8.3	Simulations with the Fundamental Model.....	140
8.4	Theoretical Extensions .....	141
8.4.1	Road Pricing and Regional Distributional Effects .....	144
8.4.2	The Case of Zealand.....	154
8.5	Conclusion .....	164
<b>9.</b>	<b>Evaluation of the Introduction of Road Pricing Using a Computable General Equilibrium Model .....</b>	<b>167</b>
	<i>Knud J. Munk</i>	
9.1	Introduction.....	167
9.2	The Theoretical Model.....	168
9.3	Application of the Theory of Public Economics to the Taxation of Transport and Investment in Transport Infrastructure .....	170
9.3.1	Taking into Account that Leisure Travel is Complementary to Leisure.....	171
9.3.2	Taking into Account that Transport is Associated with Externalities.....	172
9.3.3	Taking into Account that Leisure Travel is Predominately Consumed by Households with a Relatively High Income .....	172
9.3.4	Reasons for Taxing Transport Higher than Other Goods.....	173
9.3.5	The Optimal Size of the Transport Infrastructure .....	173
9.3.6	The Effect of the Introduction of Road Pricing on the Optimal Taxation of Transport and the Optimal Provision of Transport Infrastructure .....	173
9.3.7	The Introduction of Road Pricing will be Associated with a Double Dividend .....	174
9.4	The Parameterised Model .....	175
9.4.1	Specification of Functional Forms for Free Road Capacity and Environmental Externalities .....	175
9.4.2	Specification of Household Preferences.....	176
9.4.3	Real Income and Social Welfare .....	177
9.5	The Specification of the Parameterised Model .....	178
9.6	Presentation and Interpretation of Simulation Results .....	180
9.6.1	Consequence Analysis.....	180
9.6.2	Project Evaluation .....	183
9.6.3	Optimality Analysis.....	184
9.7	Conclusion .....	188

<b>10. Efficiency and Equity Considerations in Road Pricing</b> .....	193
<i>Harald Minken and Farideh Ramjerdi</i>	
10.1 Introduction .....	193
10.2 Aspects of Equity.....	195
10.3 Indicators of Equity .....	197
10.4 Equity, Efficiency and Modelling.....	201
10.5 Optimal Road Pricing Subject to Equity Constraints.....	203
10.6 Solving the Optimisation Problem.....	204
10.7 Conclusions .....	204
<b>11. Modelling the Economy, Transport and Environment Triangle, with an Application to Dutch Maglev Projects</b> .....	207
<i>Jan Oosterhaven and J. Paul Elhorst</i>	
11.1 Introduction .....	207
11.2 The Different Nature of the Three Types of Interaction .....	208
11.3 Modelling Environmental Impacts .....	210
11.4 Modelling Transport-Economy Interactions .....	211
11.5 An Application of Dutch Maglev Proposals .....	214
11.5.1 Introduction .....	214
11.5.2 Modelling the Interaction Between the Economy and the Transport System .....	217
11.5.3 A Welfare Evaluation of External Effects .....	221
11.6 Conclusion .....	223
<b>12. A Systems Approach to Modelling the Regional Economic Effects of Road Pricing</b> .....	229
<i>Bjarne Madsen, Chris Jensen-Butler, Jacob Kronbak and Steen Leleur</i>	
12.1 Introduction .....	229
12.2 A Systems Approach to Regional and Sub-Regional Economic Modelling.....	232
12.2.1 Data and Accounting Principles .....	232
12.2.2 Modelling Principles .....	232
12.2.3 Optimal Model Structure .....	235
12.2.4 A Loosely Coupled Model for Transport and Agriculture .....	235
12.3 The Linking Procedures.....	237
12.3.1 Linking the Models Within the Transport Sector .....	237
12.3.2 Linking the Transport and Regional Economic Models .....	240
12.4 LINE: the Full Model, a Graphical Presentation .....	242
12.4.1 The Dimensions of LINE .....	245
12.5 Road Pricing and Modelling its Impacts.....	247
12.5.1 Road Pricing .....	247
12.6 Results from the Danish Road Pricing Toll Study .....	247
12.6.1 Changes in Transport Costs.....	248
12.6.2 Changes in Commodity Prices and Disposable Incomes.....	251
12.6.3 Changes in Demand, Production and Income.....	253
12.6.4 Changes in Employment and Income .....	253

12.6.5	Recycling the Revenue from Road Pricing: a Balanced Budget .....	256
12.7	Limitations of the Model and Future Development Strategies .....	259
12.8	Conclusion .....	260
<b>13.</b>	<b>External Effects and Road Charging.....</b>	<b>267</b>
	<i>Jeppe Rich and Otto Anker Nielsen</i>	
13.1	Introduction .....	267
13.2	External Effects: Background .....	268
13.3	Demand Effect from Road Charging .....	270
13.3.1	Charging and Demand: Experience from London, Stockholm and Copenhagen .....	270
13.4	Internalisation of External Effects Through Road Charging .....	272
13.4.1	Road Safety .....	272
13.4.2	Traffic Noise.....	273
13.4.3	Emission.....	274
13.5	Summary and Conclusions .....	274
<b>14.</b>	<b>Assessing the Impacts of Traffic Air Pollution on Human Exposure and Health.....</b>	<b>277</b>
	<i>Ole Hertel, Steen Solvang Jensen, Martin Hvidberg, Matthias Ketzel, Ruwim Berkowicz, Finn Palmgren, Peter Wählin, Marianne Glasius, Steffen Loft, Peter Vinzents, Ole Raaschou-Nielsen, Mette Sørensen and Helle Bak</i>	
14.1	Introduction .....	277
14.2	Air Pollution in Urban Areas .....	278
14.2.1	Urban Background and Street Pollution .....	279
14.3	Air Pollution Exposure Assessment.....	280
14.4	Direct Methods for Exposure Assessment.....	280
14.5	Indirect Methods for Exposure Assessment.....	281
14.5.1	Monitoring Networks .....	281
14.5.2	Application of Models for Exposure Assessment.....	282
14.5.3	Modelling Long Range Transport of Pollution.....	282
14.5.4	Modelling Pollution in the Urban Background.....	284
14.5.5	Modelling Urban Street Pollution.....	285
14.5.6	Modelling Nitrogen Oxide Chemistry in Street and Urban Background.....	285
14.5.7	Determination of Emissions and Emission Factors .....	286
14.6	Particle Pollution .....	286
14.6.1	Source of Traffic Particles and Modelling.....	287
14.6.2	Other Particle Sources .....	289
14.7	Examples of Exposure Assessment in Danish Studies .....	290
14.7.1	Exposure of Bus Drivers and Postmen in Copenhagen .....	290
14.7.2	Exposure of Danish Children to Traffic Air Pollution.....	292
14.7.3	Personal Monitoring of Air Pollution Exposure in Copenhagen.....	292

14.7.4	Using GIS in Street Pollution Modelling for Exposure Assessment .....	293
14.8	Assessment of Health Effects of Air Pollution Exposure .....	296
14.9	Perspectives .....	297
<b>15.</b>	<b>Car Use Habits: An Obstacle to the Use of Public Transportation?....</b>	<b>301</b>
	<i>Berit Møller and John Thøgersen</i>	
15.1	Introduction .....	301
15.2	Method.....	304
15.3	Data.....	304
15.4	Results .....	307
15.5	Summary and Implications .....	308
<b>16.</b>	<b>Road Pricing in Denmark – User Attitudes and User Reactions.....</b>	<b>315</b>
	<i>Mai-Britt Herslund</i>	
16.1	Introduction .....	315
16.2	User Studies of the FORTRIN project.....	316
16.2.1	Pricing Strategy .....	316
16.2.2	Test Population.....	317
16.2.3	Focus-Group Meetings .....	317
16.2.4	The Study by Questionnaires.....	319
16.2.5	Trip Logs .....	320
16.2.6	Conclusions of the FORTRIN Study.....	320
16.3	AKTA – the Road Pricing Study of Copenhagen.....	321
16.3.1	Design of the Study .....	321
16.3.2	Different User Studies .....	321
16.3.3	Results from Telephone Interviews .....	322
16.3.4	Pricing Schemes .....	324
16.3.5	Focus Groups.....	326
16.3.6	Key Results from Questionnaires .....	327
16.4	Overall Conclusions of the Two User Studies .....	329
<b>17.</b>	<b>A Cost-Minimisation Principle of Adaptation of Private Car Use in Response to Road Pricing Schemes.....</b>	<b>331</b>
	<i>Peter Loukopoulos, Tommy Gärling, Cecilia Jakobsson and Satoshi Fujii</i>	
17.1	Introduction .....	331
17.2	Market-Based Travel Demand Management (TDM) Measures .....	332
17.3	Classification of Travel Demand Management (TDM) Measures.....	333
17.3.1	Coerciveness.....	334
17.3.2	Tow-Down vs. Bottom-Up Processes.....	335
17.3.3	Time Scale.....	335
17.3.4	Spatial Scale .....	336
17.3.5	Market-Based vs. Regulatory Mechanisms .....	336
17.3.6	Impacting Latent vs. Manifest Travel Demand .....	337
17.4	Theoretical Framework.....	338
17.5	Implications for the Effectiveness of TDM Measures .....	342

17.6	Summary and Discussion.....	343
<b>18.</b>	<b>Car Users' Trade-Offs Between Time, Trip Length, Cost and Road Pricing in Behavioural Models.....</b>	<b>351</b>
	<i>Otto Anker Nielsen and Goran Vuk</i>	
18.1	Introduction .....	352
18.2	SP Design .....	352
18.3	Awareness of Travel Distance and Travel Time.....	354
18.4	SP Model Estimation .....	357
	18.4.1 Model Formulation (Utility Functions) .....	357
	18.4.2 Income Effect Models .....	361
	18.4.3 Alternative Model Formulations .....	362
18.5	The RP Route Choice Model.....	362
	18.5.1 Utility Function .....	363
	18.5.2 Estimation.....	363
	18.5.3 Within Person Variation.....	364
	18.5.4 Between Person Variation .....	365
	18.5.5 Estimation of the Impact of Road Pricing on Traffic .....	367
	18.5.6 Income Effect .....	369
	18.5.7 Other Explanatory Variables .....	370
18.6	Comparison Between SP and RP Models.....	371
18.7	Summary and Conclusions .....	372
<b>19.</b>	<b>The Impacts of e-Work and e-Commerce on Transport, the Environment and the Economy.....</b>	<b>375</b>
	<i>Andy Lake</i>	
19.1	Being Active Without Moving .....	375
19.2	The UK Study .....	376
19.3	E-Work .....	377
19.4	E-Business and e-Commerce .....	380
19.5	Rebounds .....	383
19.6	Environment .....	385
19.7	Economic Growth, Transport Growth and European Policy .....	387
19.8	Future Research Directions.....	388
19.9	Conclusion .....	389
<b>20.</b>	<b>A Web-Based Study of the Propensity to Telework Based on Socio-Economic, Work Organisation and Spatial Factors.....</b>	<b>395</b>
	<i>Lasse Møller-Jensen, Chris Jensen-Butler, Bjarne Madsen, Jeremy Millard and Lars Schmidt</i>	
20.1	Introduction .....	395
20.2	Teleworking: Theoretical and Methodological Issues .....	396
	20.2.1 Defining Teleworking .....	396
	20.2.2 The Extent of Teleworking.....	397
	20.2.3 Teleworking and Savings in Transport Effort .....	397
	20.2.4 Modelling the Take-Up of Teleworking.....	398

20.2.5	Technology Issues .....	399
20.2.6	Long-Term Effects .....	399
20.3	The Determinants of Teleworking and Transport Substitution Effects .....	400
20.4	The Consequences for Travel of Working at Home .....	400
20.5	Determinants of Teleworking .....	401
20.5.1	Multivariate Relations .....	404
20.6	Long-Term Effects of Teleworking .....	406
20.7	Conclusion .....	408
<b>21.</b>	<b>The Impact of Telecommuting on Households' Travel Behaviour, Expenditures and Emissions.....</b>	<b>411</b>
	<i>Andrea F. Glogger, Thomas W. Zängler and Georg Karg</i>	
21.1	Introduction .....	411
21.2	Model.....	414
21.3	Method.....	416
21.4	Results .....	417
21.4.1	Sample Characteristics .....	417
21.4.2	Travel Behaviour.....	417
21.4.3	Expenditures.....	419
21.4.4	Emissions.....	420
21.5	Discussion and Conclusion.....	420
