Part I Markowitz for the Masses: Portfolio Construction Techniques

1	Markowitz for the Masses: The Risk and Return of Equity and Portfolio Construction Techniques	3
	John B. Guerard, Jr.	
2	Markowitz and the Expanding Definition of Risk: Applications of Multi-factor Risk Models	31
	John B. Guerard, Jr.	
3	Markowitz Applications in the 1990s and the New Century: Data Mining Corrections and the 130/30	61
	John B. Guerard, Jr.	
4	Markowitz's Mean-Variance Rule and the Talmudic Diversification Recommendation	97
	Haim Levy and Ran Duchin	
5	On the Himalayan Shoulders of Harry Markowitz	125
	Paul A. Samuelson	
6	Models for Portfolio Revision with Transaction Costs in the Mean-Variance Framework	133
	Andrew H. Chen, Frank J. Fabozzi, and Dashan Huang	
7	Principles for Lifetime Portfolio Selection: Lessons from Portfolio Theory	153
	James H. Vander Weide	
8	Harry Markowitz and the Early History of Quadratic Programming	179
	Richard W. Cottle and Gerd Infanger	

**9 Ideas in Asset and Asset–Liability Management
in the Tradition of H.M. Markowitz213**
William T. Ziemba

**10 Methodologies for Isolating and Assessing the Portfolio
Performance Potential of Stock Return Forecast Models
with an Illustration259**
Bernell K. Stone and John B. Guerard, Jr.

11 Robust Portfolio Construction337
R. Douglas Martin, Andrew Clark, and Christopher G. Green

**Part II Owitz and the Expanding Definition of Risk: Applications
of Multi-Factor Risk Models**

12 Applying Markowitz’s Critical Line Algorithm.....383
Andras Niedermayer and Daniel Niedermayer

13 Factor Models in Portfolio and Asset Pricing Theory401
Gregory Connor and Robert A. Korajczyk

**14 Applications of Markowitz Portfolio
Theory To Pension Fund Design419**
Edwin J. Elton, Martin J. Gruber, and Christopher R. Blake

15 Global Equity Risk Modeling439
Jose Menchero, Andrei Morozov, and Peter Shepard

16 What Matters Most in Portfolio Construction?481
Dean M. Petrich and Ronald N. Kahn

**17 Risk Management and Portfolio Optimization for Volatile
Markets493**
Svetlozar T. Rachev, Borjana Racheva-Iotova, Stoyan
V. Stoyanov, and Frank J. Fabozzi

**Part III Applications of Portfolio Construction, Performance
Measurement, and Markowitz Data Mining Corrections Tests**

**18 Linking Momentum Strategies with Single-Period
Portfolio Models511**
John M. Mulvey, Woo Chang Kim, and Mehmet Bilgili

**19 Reflections on Portfolio Insurance, Portfolio Theory,
and Market Simulation with Harry Markowitz.....529**
Bruce I. Jacobs and Kenneth N. Levy

20 Evaluating Hedge Fund Performance: A Stochastic Dominance Approach	551
Sheng Li and Oliver Linton	
21 Multiportfolio Optimization: A Natural Next Step	565
Martin W.P. Savelsbergh, Robert A. Stubbs, and Dieter Vandenbussche	
22 Alternative Model to Evaluate Selectivity and Timing Performance of Mutual Fund Managers: Theory and Evidence	583
Cheng-few Lee, Alice C. Lee, and Nathan Liu	
23 Case Closed	601
Robert A. Haugen and Nardin L. Baker	
24 Stock-Selection Modeling and Data Mining Corrections: Long-Only Versus 130/30 Models	621
John B. Guerard, Jr., Sundaram Chettiappan, and GanLin Xu	
25 Distortion Risk Measures in Portfolio Optimization	649
Ekaterina N. Sereda, Efim M. Bronshtein, Svetozar T. Rachev, Frank J. Fabozzi, Wei Sun, and Stoyan V. Stoyanov	
26 A Benefit from the Modern Portfolio Theory for Japanese Pension Investment	675
Makoto Suzuki	
27 Private Valuation of Contingent Claims in a Discrete Time/State Model	691
Alan J. King, Olga Streltchenko, and Yelena Yesha	
28 Volatility Timing and Portfolio Construction Using Realized Volatility for the S&P500 Futures Index	711
Dimitrios D. Thomakos and Tao Wang	
29 The Application of Modern Portfolio Theory to Real Estate: A Brief Survey	733
Timothy W. Viezer
