Introductory preface	1
How I have (re-)written this book.....	1
Acknowledgements.....	2
What I have written in this book.....	3
I. Smooth Lie group actions on manifolds	9
I.1. Generalities.....	9
I.2. Equivariant tubular neighborhoods and orbit types decomposition....	13
I.3. Examples: S^1 -actions on manifolds of dimension 2 and 3.....	18
I.4. Appendix: Lie groups, Lie algebras, homogeneous spaces.....	32
Exercises.....	37
II. Symplectic manifolds	43
II.1. What is a symplectic manifold?.....	43
II.2. Calibrated almost complex structures.....	52
II.3. Hamiltonian vector fields and Poisson brackets.....	58
Exercises.....	62
III. Symplectic and Hamiltonian group actions	71
III.1. Hamiltonian group actions.....	71
III.2. Properties of momentum mappings.....	77
III.3. Torus actions and integrable systems.....	87
Exercises.....	97
IV. Morse theory for Hamiltonians	105
IV.1. Critical points of almost periodic Hamiltonians.....	105
IV.2. Morse functions (in the sense of Bott).....	108
IV.3. Connectedness of the fibers of the momentum mapping.....	111
IV.4. Application to convexity theorems.....	113
IV.5. Appendix: compact symplectic $SU(2)$ -manifolds of dimension 4....	131
Exercises.....	136
V. Moduli spaces of flat connections	147
V.1. The moduli space of flat connections.....	147
V.2. A Poisson structure on the moduli space of flat connections.....	154
V.3. Construction of commuting functions on \mathcal{M}	162
V.4. Appendix: connections on principal bundles.....	170
Exercises.....	175

VI. Equivariant cohomology and the Duistermaat–Heckman theorem	177
VI.1. Milnor joins, Borel construction and equivariant cohomology.....	178
VI.2. Hamiltonian actions and the Duistermaat–Heckman theorem.....	189
VI.3. Localization at fixed points and the Duistermaat–Heckman formula.....	201
VI.4. Appendix: some algebraic topology.....	212
VI.5. Appendix: various notions of Euler classes.....	218
Exercises.....	220
VII. Toric manifolds	225
VII.1. Fans and toric varieties.....	226
VII.2. Symplectic reduction and convex polyhedra.....	244
VII.3. Cohomology of X_Σ	257
VII.4. Complex toric surfaces.....	262
Exercises.....	266
VIII. Hamiltonian circle actions on manifolds of dimension 4	271
VIII.1. Symplectic S^1 -actions, generalities.....	272
VIII.2. Periodic Hamiltonians on 4-dimensional manifolds.....	279
Exercises.....	305
Bibliography	311
Index	321
