

# Contents

<b>1</b>	<b>Introduction</b> .....	1
<b>2</b>	<b>The Metaplectic and Anaplectic Representations</b> .....	11
	2.1 The Metaplectic Representation .....	11
	2.2 Anaplectic Analysis .....	16
<b>3</b>	<b>The One-Dimensional Alternative Pseudodifferential Analysis</b> .....	27
	3.1 Ascending Pseudodifferential Analysis .....	28
	3.2 Classes of Operators .....	38
	3.3 The Resolvent of the Lowering Operator .....	57
	3.4 The Composition Formula .....	64
<b>4</b>	<b>From Anaplectic Analysis to Usual Analysis</b> .....	75
	4.1 The $\nu$ -Anaplectic Representation .....	75
	4.2 Ascending Pseudodifferential Calculus in $\nu$ -Anaplectic Analysis ...	83
<b>5</b>	<b>Pseudodifferential Analysis and Modular Forms</b> .....	93
	5.1 The Eisenstein, Theta, Poincaré, and Alternative Poincaré Distributions .....	93
	5.2 Moyal Brackets and Rankin–Cohen Brackets .....	106
	<b>References</b> .....	115
	<b>Index</b> .....	117
	<b>Subject Index</b> .....	118
