

---

# Contents

---

## Part I Basic Concepts

---

### Introduction to Model Order Reduction

*Wil Schilders* ..... 3

### Linear Systems, Eigenvalues, and Projection

*Henk van der Vorst* ..... 33

---

## Part II Theory

---

### Structure-Preserving Model Order Reduction of RCL Circuit Equations

*Roland W. Freund* ..... 49

### A Unified Krylov Projection Framework for Structure-Preserving Model Reduction

*Zhaojun Bai, Ren-cang Li, and Yangfeng Su* ..... 75

### Model Reduction via Proper Orthogonal Decomposition

*René Pinnau* ..... 95

### PMTBR: A Family of Approximate Principal-components-like Reduction Algorithms

*Joel R. Phillips, Zhenhai Zhu, and L. Miguel Silveira* ..... 111

### A Survey on Model Reduction of Coupled Systems

*Timo Reis and Tatjana Stykel* ..... 133

### Space Mapping and Defect Correction

*David Echeverría, Domenico Lahaye, and Piet W. Hemker* ..... 157

### Modal Approximation and Computation of Dominant Poles

*Joost Rommes* ..... 177

<b>Some Preconditioning Techniques for Saddle Point Problems</b> <i>Michele Benzi and Andrew J. Wathen</i> .....	195
<b>Time Variant Balancing and Nonlinear Balanced Realizations</b> <i>E.I. Verriest</i> .....	213
<b>Singular Value Analysis and Balanced Realizations for Nonlinear Systems</b> <i>Kenji Fujimoto and Jacquelin M.A. Scherpen</i> .....	251
<hr/>	
<b>Part III Research Aspects and Applications</b>	
<hr/>	
<b>Matrix Functions</b> <i>Andreas Frommer and Valeria Simoncini</i> .....	275
<b>Model Reduction of Interconnected Systems</b> <i>Antoine Vandendorpe and Paul Van Dooren</i> .....	305
<b>Quadratic Inverse Eigenvalue Problem and Its Applications to Model Updating — An Overview</b> <i>Moody T. Chu**</i> .....	323
<b>Data-Driven Model Order Reduction Using Orthonormal Vector Fitting</b> <i>Dirk Deschrijver and Tom Dhaene</i> .....	341
<b>Model-Order Reduction of High-Speed Interconnects Using Integrated Congruence Transform</b> <i>Emad Gad, Michel Nakhla, and Ram Achar</i> .....	361
<b>Model Order Reduction for MEMS: Methodology and Computational Environment for Electro-Thermal Models</b> <i>Tamara Bechtold, Evgenii B. Rudnyi, and Jan G. Korvink</i> .....	403
<b>Model Order Reduction of Large RC Circuits</b> <i>Nick P. van der Meijs</i> .....	421
<b>Reduced Order Models of On-Chip Passive Components and Interconnects, Workbench and Test Structures</b> <i>Daniel Ioan and Gabriela Ciuprina</i> .....	447
<b>Index</b> .....	469
