Contents

Preface . . . . . **xiii**

1 Introduction **1**
1.1 Motivation 3
1.2 Layout 14

2 Basic Settings and Spherical Nomenclature **19**
2.1 Scalars, Vectors, and Tensors 19
2.2 Differential Operators 24
2.3 Spherical Notation 30
2.4 Function Spaces 32
2.5 Differential Calculus 35
2.6 Integral Calculus 39
2.7 Orthogonal Invariance 48

3 Scalar Spherical Harmonics **57**
3.1 Homogeneous Harmonic Polynomials 58
3.2 Addition Theorem 65
3.3 Exact Computation of Basis Systems 71
3.4 Definition of Scalar Spherical Harmonics 81
3.5 Legendre Polynomials 87
3.6 Orthogonal (Fourier) Expansions 97
3.7 Legendre (Spherical) Harmonics 110
3.8 Funk–Hecke Formula 115
3.9 Eigenfunctions of the Beltrami Operator 117
3.10 Irreducibility of Scalar Harmonics 119
3.11 Degree and Order Variances 122
3.12 Associated Legendre Polynomials 129
3.13 Associated Legendre (Spherical) Harmonics 138
3.14 Exact Computation of Legendre Basis Systems 153
3.15 Bibliographical Notes 158

4 Green's Functions and Integral Formulas **159**
4.1 Green's Function with Respect to the Beltrami Operator . . 159
4.2 Space Regularized Green Function with Respect to the Beltrami Operator 162

Bibliografische Informationen
http://d-nb.info/989384292

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

4.3 Frequency Regularized Green Function with Respect to the Beltrami Operator . . . 170
4.4 Modified Green Functions . . . 173
4.5 Integral Formulas . . . 176
4.6 Differential Equations . . . 181
4.7 Approximate Integration and Spline Interpolation . . . 183
4.8 Integral Formulas with Respect to Iterated Beltrami Operators 189
4.9 Differential Equations Respect to Iterated Beltrami Operators 198
4.10 Bibliographical Notes . . . 200

5 Vector Spherical Harmonics . . . 201
5.1 Normal and Tangential Fields . . . 202
5.2 Definition of Vector Spherical Harmonics . . . 203
5.3 Helmholtz Decomposition Theorem for Spherical Vector Fields . . . 208
5.4 Orthogonal (Fourier) Expansions . . . 212
5.5 Homogeneous Harmonic Vector Polynomials . . . 220
5.6 Exact Computation of Orthonormal Systems . . . 223
5.7 Orthogonal Invariance . . . 228
5.8 Vectorial Beltrami Operator . . . 236
5.9 Vectorial Addition Theorem . . . 238
5.10 Vectorial Funk–Hecke Formulas . . . 244
5.11 Counterparts of the Legendre Polynomial . . . 248
5.12 Degree and Order Variances . . . 252
5.13 Vector Homogeneous Harmonic Polynomials . . . 257
5.14 Alternative Systems of Vector Spherical Harmonics . . . 260
5.15 Vector Legendre Kernels . . . 266
5.16 Bibliographical Notes . . . 271

6 Tensor Spherical Harmonics . . . 273
6.1 Some Nomenclature . . . 274
6.2 Normal and Tangential Fields . . . 275
6.3 Integral Theorems . . . 278
6.4 Definition of Tensor Spherical Harmonics . . . 283
6.5 Helmholtz Decomposition Theorem . . . 289
6.6 Orthogonal (Fourier) Expansions . . . 293
6.7 Homogeneous Harmonic Tensor Polynomials . . . 301
6.8 Tensorial Beltrami Operator . . . 306
6.9 Tensorial Addition Theorem . . . 309
6.10 Tensorial Funk–Hecke Formulas . . . 318
6.11 Counterparts to the Legendre Polynomials . . . 323
6.12 Tensor Homogeneous Harmonic Polynomials . . . 325
6.13 Alternative Systems of Tensor Spherical Harmonics . . . 328

6.14 Tensor Legendre Kernels 334
6.15 Bibliographical Notes 337

7 Scalar Zonal Kernel Functions 339
7.1 Zonal Kernel Functions in Scalar Context 339
7.2 Convolutions Involving Scalar Zonal Kernel Functions 341
7.3 Classification of Zonal Kernel Functions 343
7.4 Dirac Families of Zonal Scalar Kernel Functions 357
7.5 Examples of Dirac Families 366
7.6 Bibliographical Notes 386

8 Vector Zonal Kernel Functions 389
8.1 Preparatory Material 390
8.2 Tensor Zonal Kernel Functions of Rank Two in Vectorial Context 391
8.3 Vector Zonal Kernel Functions in Vectorial Context 396
8.4 Convolutions Involving Vector Zonal Kernel Functions . . . 399
8.5 Dirac Families of Zonal Vector Kernel Functions 401
8.6 Bibliographical Notes 403

9 Tensorial Zonal Kernel Functions 405
9.1 Preparatory Material 406
9.2 Tensor Zonal Kernel Functions of Rank Four in Tensorial Context 406
9.3 Convolutions Involving Zonal Tensor Kernel Functions . . . 408
9.4 Tensor Zonal Kernel Functions of Rank Two in Tensorial Context 410
9.5 Dirac Families of Zonal Tensor Kernel Functions 414
9.6 Bibliographical Notes 415

10 Zonal Function Modeling of Earth's Mass Distribution 417
10.1 Key Observables 418
10.2 Gravity Potential 428
10.3 Inner/Outer Harmonics 435
10.4 Limit Formulas and Jump Relations 454
10.5 Gravity Anomalies and Deflections of the Vertical 458
10.6 Geostrophic Ocean Flow and Dynamic Ocean Topography . 482
10.7 Elastic Field 496
10.8 Density Distribution 515
10.9 Vector Outer Harmonics and the Gravitational Gradient . . 542
10.10 Tensor Outer Harmonics and the Gravitational Tensor . . . 551
10.11 Gravity Quantities in Spherical Nomenclature 560
10.12 Pseudodifferential Operators and Geomathematics 564
10.13 Bibliographical Notes 568

Concluding Remarks **571**

List of Symbols **573**

Bibliography **579**

Index **597**
