Preface	xi
---------------	----

Part I General Theory

A. Basic Theory	3
A.1 Overview	3
A.2 The Generator	5
A.3 Type and Spectrum	9
A.4 Uniform Continuity	10
A.5 Core for the Generator	11
A.6 The Resolvent	13
A.7 Pseudo-Resolvents	15
A.8 The Laplace Transform	17
A.9 Abstract Potentials	18
A.10 The Hille–Yosida Theorem	20
A.11 The Hille–Yosida Space	22
A.12 Dissipative Operators	25
A.13 The Trotter–Kato Convergence Theorem	28
A.14 Exponential Formulas	32
A.15 Perturbation of Generators	36
A.16 Groups of Operators	42
A.17 Bounded Groups of Operators	43
A.18 Stone’s Theorem	44
A.19 Bochner’s Theorem	47
B. The Semi-Simplicity Space for Groups	49
B.1 The Bochner Norm	49
B.2 The Semi-Simplicity Space	53
B.3 Scalar-Type Spectral Operators	59

C. Analyticity	63
C.1 Analytic Semigroups	63
C.2 The Generator of an Analytic Semigroup	65
D. The Semigroup as a Function of its Generator	71
D.1 Noncommutative Taylor Formula	71
D.2 Analytic Families of Semigroups	79
E. Large Parameter	87
E.1 Analytic Semigroups	87
E.2 Resolvent Iterates	90
E.3 Mean Stability	94
E.4 The Asymptotic Space	103
E.5 Semigroups of Isometries	107
E.6 The ABLV Stability Theorem	109
F. Boundary Values	113
F.1 Regular Semigroups and Boundary Values	113
F.2 The Generator of a Regular Semigroup	118
F.3 Examples of Regular Semigroups	121
G. Pre-Semigroups	131
G.1 The Abstract Cauchy Problem	132
G.2 The Exponentially Tamed Case	136

Part II Integral Representations

A. The Semi-Simplicity Space	141
A.1 The Real Spectrum Case	141
A.2 The Case $\mathbb{R}^+ \subset \rho(-A)$	154
B. The Laplace–Stieltjes Space	161
B.1 The Laplace–Stieltjes Space	161
B.2 Semigroups of Closed Operators	166
B.3 The Integrated Laplace Space	169
B.4 Integrated Semigroups	173
C. Families of Unbounded Symmetric Operators	177
C.1 Local Symmetric Semigroups	177
C.2 Nelson’s Analytic Vectors Theorem	181
C.3 Local Bounded Below Cosine Families	183
C.4 Local Symmetric Cosine Families	187

Part III A Taste of Applications

A. Analytic Families of Evolution Systems	195
A.1 Coefficients Analyticity and Solutions Analyticity.....	195
A.2 Kato's Conditions	196
A.3 Tanabe's Conditions	198
B. Similarity	203
B.1 Overview	203
B.2 Similarity Within the Family $S + \zeta V$	203
B.3 Similarity of Certain Perturbations	217
Miscellaneous Exercises	219
Notes and References	249
Bibliography	253
Index	263
