

# Contents

<b>1</b>	<b>Introduction</b> .....	1
1.1	First-Principle Hamiltonian .....	1
1.2	Local Density Approximation .....	2
1.3	Electron-Phonon Interaction in the Bloch Representation .....	3
1.4	Electron-Phonon Interaction in the Wannier (Site) Representation .....	5
<b>2</b>	<b>Continuum Polaron</b> .....	11
2.1	Pekar's Polaron .....	12
2.1.1	Ground State .....	12
2.1.2	Effective Mass of Pekar's Polaron .....	13
2.2	Fröhlich Large Polaron .....	15
2.2.1	Weak-Coupling Regime .....	15
2.2.2	Lee-Low-Pines Transformation .....	16
2.3	All-Coupling Fröhlich Polaron .....	18
2.3.1	Feynman Theory .....	18
2.3.2	Diagrammatic Monte Carlo Algorithm .....	22
2.4	Response of Continuum Polarons .....	27
2.4.1	Mobility .....	27
2.4.2	Optical Absorption at Weak Coupling .....	32
2.4.3	Optical Absorption at Strong Coupling .....	34
2.4.4	Optical Absorption at Arbitrary Coupling .....	37
2.4.5	Main Peak Line and Strong-Coupling Expansion .....	41
2.4.6	Comparison Between Optical Conductivity Spectra Obtained by Different Methods .....	45
2.4.7	Sum Rules for the Optical Conductivity Spectra of Fröhlich Polarons .....	46
2.5	Polaron Scaling Relations .....	50

<b>3</b>	<b>Lattice Polaron</b> .....	53
3.1	Holstein Model .....	53
3.1.1	Nonadiabatic Holstein Polaron .....	55
3.1.2	Adiabatic Holstein Polaron .....	56
3.2	Lang-Firsov Canonical Transformation .....	58
3.2.1	" $1/\lambda$ " Expansion and Polaron Band .....	59
3.2.2	Temperature Effect on the Polaron Band .....	61
3.3	Effect of EPI Range and Phonon Dispersion on Lattice Polaron Dynamics .....	63
3.4	All-Coupling Lattice Polaron .....	66
3.4.1	Holstein Model at Any Coupling .....	66
3.4.2	Short-Range EPI in Infinite Lattices .....	68
3.4.3	Finite-Range EPI: Mobile Small Polaron .....	71
3.5	Isotope Effect on the Polaron Mass .....	77
3.6	Jahn-Teller Polaron .....	78
3.7	Trapping of Lattice Polarons by Impurities .....	81
3.8	Response of Lattice Polarons .....	83
3.8.1	Hopping Mobility .....	83
3.8.2	Optical Conductivity .....	86
3.8.3	Spectral and Green's Functions .....	90
<b>4</b>	<b>Bipolaron</b> .....	97
4.1	Polaron-Polaron Interaction .....	97
4.2	Holstein Bipolaron .....	99
4.3	Continuum Fröhlich Bipolaron .....	104
4.4	Discrete Superlight Fröhlich Bipolaron .....	106
4.5	Discrete All-Coupling Fröhlich Bipolaron .....	111
4.6	Polaronic Exciton .....	113
<b>5</b>	<b>Multipolaron Problem</b> .....	115
5.1	Ground State of a Large-Polaron Gas, Polaron Wigner Crystals, and Ripplon-polarons .....	115
5.2	Breakdown of the Migdal-Eliashberg Theory in the Strong-Coupling Regime .....	121
5.3	Polaronic Superconductivity .....	124
5.4	Lattice Bipolarons and Competing Orders .....	126
5.5	Bipolaronic Superconductivity .....	129
5.6	Polarons and Spin Effects .....	131
<b>6</b>	<b>Polarons and Bipolarons in Advanced Materials</b> .....	135
6.1	Polarons in High-Temperature Superconductors .....	135
6.2	Polarons in Colossal Magnetoresistance Oxides .....	139
6.3	Polarons in Nanostructures .....	141
6.3.1	Polaron Effects in Semiconductor Quantum Dots .....	141

6.3.2 Correlated Polaron Transport Through Molecular Quantum Dots .....	143
<b>7 Current Status of Polarons and Open Problems .....</b>	<b>145</b>
<b>References .....</b>	<b>149</b>
<b>Index .....</b>	<b>165</b>
