|--|------------------|
| <i>Preface</i> | <i>page xiii</i> |
| 1 Algorithms and Computers | 1 |
| 1.1 Introduction | 1 |
| 1.2 Computers | 3 |
| 1.3 Software and Computer Languages | 5 |
| 1.4 Data Structures | 8 |
| 1.5 Programming Practice | 9 |
| References | 10 |
| 2 Computer Arithmetic | 11 |
| 2.1 Introduction | 11 |
| 2.2 Positional Number Systems | 12 |
| 2.3 Fixed Point Arithmetic | 15 |
| 2.4 Floating Point Representations | 18 |
| 2.5 Living with Floating Point Inaccuracies | 21 |
| 2.6 The Pale and Beyond | 26 |
| 2.7 Conditioned Problems and Stable Algorithms | 30 |
| Programs and Demonstrations | 32 |
| Exercises | 33 |
| References | 35 |
| 3 Matrices and Linear Equations | 37 |
| 3.1 Introduction | 37 |
| 3.2 Matrix Operations | 38 |
| 3.3 Solving Triangular Systems | 40 |
| 3.4 Gaussian Elimination | 41 |
| 3.5 Cholesky Decomposition | 47 |
| 3.6 Matrix Norms | 50 |
| 3.7 Accuracy and Conditioning | 52 |
| Programs and Demonstrations | 56 |
| Exercises | 58 |
| References | 59 |
| 4 More Methods for Solving Linear Equations | 61 |
| 4.1 Introduction | 61 |
| 4.2 Full Elimination with Complete Pivoting | 61 |

| | | |
|----------|---|------------|
| 4.3 | Banded Matrices | 65 |
| 4.4 | Applications to ARMA Time-Series Models | 67 |
| 4.5 | Toeplitz Systems | 70 |
| 4.6 | Sparse Matrices | 73 |
| 4.7 | Iterative Methods | 76 |
| | Programs and Demonstrations | 78 |
| | Exercises | 78 |
| | References | 80 |
| 5 | Regression Computations | 82 |
| 5.1 | Introduction | 82 |
| 5.2 | Condition of the Regression Problem | 84 |
| 5.3 | Solving the Normal Equations | 87 |
| 5.4 | Gram–Schmidt Orthogonalization | 88 |
| 5.5 | Householder Transformations | 91 |
| 5.6 | Householder Transformations for Least Squares | 92 |
| 5.7 | Givens Transformations | 95 |
| 5.8 | Givens Transformations for Least Squares | 95 |
| 5.9 | Regression Diagnostics | 98 |
| 5.10 | Hypothesis Tests | 100 |
| 5.11 | Conjugate Gradient Methods | 103 |
| 5.12 | Doolittle, the Sweep, and All Possible Regressions | 106 |
| 5.13 | Comments | 108 |
| | Programs and Demonstrations | 108 |
| | Exercises | 109 |
| | References | 111 |
| 6 | Eigenproblems | 114 |
| 6.1 | Introduction | 114 |
| 6.2 | Theory | 114 |
| 6.3 | Power Methods | 116 |
| 6.4 | The Symmetric Eigenproblem and Tridiagonalization | 119 |
| 6.5 | The QR Algorithm | 121 |
| 6.6 | Singular Value Decomposition | 123 |
| 6.7 | Applications | 126 |
| 6.8 | Complex Singular Value Decomposition | 130 |
| | Programs and Demonstrations | 132 |
| | Exercises | 133 |
| | References | 136 |
| 7 | Functions: Interpolation, Smoothing, and Approximation | 137 |
| 7.1 | Introduction | 137 |
| 7.2 | Interpolation | 139 |
| 7.3 | Interpolating Splines | 142 |
| 7.4 | Curve Fitting with Splines: Smoothing and Regression | 145 |
| 7.5 | Mathematical Approximation | 148 |

| | | |
|-----------|---|------------|
| 7.6 | Practical Approximation Techniques | 152 |
| 7.7 | Computing Probability Functions | 155 |
| | Programs and Demonstrations | 162 |
| | Exercises | 164 |
| | References | 168 |
| 8 | Introduction to Optimization and Nonlinear Equations | 170 |
| 8.1 | Introduction | 170 |
| 8.2 | Safe Univariate Methods: Lattice Search, Golden Section, and Bisection | 172 |
| 8.3 | Root Finding | 175 |
| 8.4 | First Digression: Stopping and Condition | 181 |
| 8.5 | Multivariate Newton's Methods | 183 |
| 8.6 | Second Digression: Numerical Differentiation | 184 |
| 8.7 | Minimization and Nonlinear Equations | 187 |
| 8.8 | Condition and Scaling | 192 |
| 8.9 | Implementation | 193 |
| | Programs and Demonstrations | 194 |
| | Exercises | 196 |
| | References | 198 |
| 9 | Maximum Likelihood and Nonlinear Regression | 199 |
| 9.1 | Introduction | 199 |
| 9.2 | Notation and Asymptotic Theory of Maximum Likelihood | 200 |
| 9.3 | Information, Scoring, and Variance Estimates | 206 |
| 9.4 | An Extended Example | 208 |
| 9.5 | Concentration, Iteration, and the EM Algorithm | 210 |
| 9.6 | Multiple Regression in the Context of Maximum Likelihood | 216 |
| 9.7 | Generalized Linear Models | 217 |
| 9.8 | Nonlinear Regression | 221 |
| 9.9 | Parameterizations and Constraints | 225 |
| | Programs and Demonstrations | 229 |
| | Exercises | 231 |
| | References | 233 |
| 10 | Numerical Integration and Monte Carlo Methods | 235 |
| 10.1 | Introduction | 235 |
| 10.2 | Motivating Problems | 236 |
| 10.3 | One-Dimensional Quadrature | 242 |
| 10.4 | Numerical Integration in Two or More Variables | 249 |
| 10.5 | Uniform Pseudorandom Variables | 256 |
| 10.6 | Quasi-Monte Carlo Integration | 263 |
| 10.7 | Strategy and Tactics | 268 |
| | Programs and Demonstrations | 272 |
| | Exercises | 274 |
| | References | 276 |

| | | |
|-----------|---|------------|
| 11 | Generating Random Variables from Other Distributions | 279 |
| | 11.1 Introduction | 279 |
| | 11.2 General Methods for Continuous Distributions | 280 |
| | 11.3 Algorithms for Continuous Distributions | 284 |
| | 11.4 General Methods for Discrete Distributions | 297 |
| | 11.5 Algorithms for Discrete Distributions | 301 |
| | 11.6 Other Randomizations | 306 |
| | 11.7 Accuracy in Random Number Generation | 310 |
| | Programs and Demonstrations | 313 |
| | Exercises | 314 |
| | References | 317 |
| 12 | Statistical Methods for Integration and Monte Carlo | 319 |
| | 12.1 Introduction | 319 |
| | 12.2 Distribution and Density Estimation | 319 |
| | 12.3 Distributional Tests | 326 |
| | 12.4 Importance Sampling and Weighted Observations | 329 |
| | 12.5 Testing Importance Sampling Weights | 335 |
| | 12.6 Laplace Approximations | 337 |
| | 12.7 Randomized Quadrature | 339 |
| | 12.8 Spherical–Radial Methods | 341 |
| | Programs and Demonstrations | 346 |
| | Exercises | 348 |
| | References | 349 |
| 13 | Markov Chain Monte Carlo Methods | 351 |
| | 13.1 Introduction | 351 |
| | 13.2 Markov Chains | 353 |
| | 13.3 Gibbs Sampling | 354 |
| | 13.4 Metropolis–Hastings Algorithm | 359 |
| | 13.5 Time-Series Analysis | 362 |
| | 13.6 Adaptive Acceptance/Rejection | 366 |
| | 13.7 Diagnostics | 370 |
| | Programs and Demonstrations | 374 |
| | Exercises | 374 |
| | References | 376 |
| 14 | Sorting and Fast Algorithms | 379 |
| | 14.1 Introduction | 379 |
| | 14.2 Divide and Conquer | 379 |
| | 14.3 Sorting Algorithms | 381 |
| | 14.4 Fast Order Statistics and Related Problems | 384 |
| | 14.5 Fast Fourier Transform | 385 |
| | 14.6 Convolutions and the Chirp- z Transform | 389 |
| | 14.7 Statistical Applications of the FFT | 391 |
| | 14.8 Combinatorial Problems | 401 |

| | |
|---|-----|
| Programs and Demonstrations | 405 |
| Exercises | 409 |
| References | 412 |
| <i>Table of Programs and Demonstrations</i> | 415 |
| <i>Author Index</i> | 419 |
| <i>Subject Index</i> | 425 |
