Preface	xxiii
Introduction	xxiii
Key Features	xxiii
Chapter Outlines	xxiv
Supporting Materials	xxvi
Acknowledgments	xxvii
I Java Fundamentals	1
1 Bits, Bytes, and Java	2
1.1 The Challenge	2
1.2 A Simple Model of a Computer	2
1.2.1 Hardware	3
1.2.2 Look-and-Feel Software	3
1.3 Bits and Bytes	5
1.3.1 Bits	5
1.3.2 Using Bits to Model Real-Life Objects	5
1.3.3 Bytes	7
1.3.4 The Meaning of Data	9
1.4 The Central Processing Unit	10
1.4.1 The Fetch-Execute Cycle	10
1.4.2 Skipping and Repeating Instructions	11
1.5 Review	13
1.6 High Level Programming Languages	14
1.7 Program Translation	15
1.7.1 Program Portability	16
1.7.2 Java's Approach to Portability	16
1.7.3 The Java Virtual Machine	17
1.8 Review	19
2 Common Program Components	20
2.1 Getting Past the Compiler	20
2.2 Fundamental Language Elements	21

2.2.1	Reserved Words and Identifiers	21
2.2.2	Curly Brackets	22
2.2.3	The Simple Structure of a Method	23
2.2.4	The Main Method	23
2.2.5	White Space	24
2.2.6	Comments	25
2.3	Review	26
2.4	Compiling and Running Simple Programs	27
2.4.1	Compiling a Java Program	27
2.4.2	Running a Program	28
2.4.3	The Edit-Compile-Run Cycle	31
2.5	Review	32
3	Creating and Using Objects	34
3.1	Why So Much for So Little?	34
3.2	What are Object-Oriented Languages?	34
3.3	Modeling the Operation of a Port	35
3.4	Classes and Objects	36
3.5	Review	37
3.6	Creating and Using Objects	38
3.6.1	Creating an Object	39
3.6.2	Object Interactions—Message Passing	41
3.6.3	Sending Messages to a Ship Object	41
3.6.4	Moving a Ship	43
3.6.5	Passing Arguments with Messages	45
3.6.6	Receiving Replies from Messages	47
3.6.7	Variables and Objects	49
3.6.8	Uninitialized Variables	50
3.7	Review	50
3.8	Further Examples of Using Objects	51
3.8.1	The SimpleBank Class	51
3.8.2	The PennyBankAccount Class	53
3.8.3	Aliases for Objects	55
3.9	The Main Method's Class	57
3.10	Review	58
4	Defining Classes	59
4.1	Object State and Complexity	59
4.2	The Outline of a Class Definition	60
4.3	The SimpleNote Class	61
4.3.1	Defining Attributes	63
4.3.2	Methods of the SimpleNote Class	64
4.3.3	Method Headers	64
4.3.4	Method Results	66
4.3.5	Scope	67
4.3.6	Types	68
4.3.7	The Note Class	69
4.4	Review	71

4.5	The SimpleSwitch Class	72
4.5.1	A Boolean Attribute	73
4.5.2	The Public Interface of a Class	74
4.5.3	Bridging Methods	75
4.5.4	The Switch Class	76
4.6	Review	78
4.7	Encapsulation	80
4.7.1	Accessor Methods	81
4.7.2	Mutator Methods	82
4.8	Constructors—Initializing Object State	82
4.8.1	Constructors with Arguments	84
4.8.2	Overloaded Constructors—this	85
4.8.3	Object Integrity	89
4.9	Review	89
4.10	Identifiers and Name Resolution	90
4.11	Case Study: A Simple Card Game (I)	92
4.11.1	Identifying the Classes	93
4.11.2	Identifying the Methods	93
4.11.3	The Card Class	94
5	Adding Sequential Behavior	97
5.1	Introduction	97
5.2	Putting Things in Order	97
5.3	Arithmetic Expressions	100
5.3.1	The Addition Operator	101
5.3.2	Subtraction, Multiplication, and Division	102
5.3.3	Division by Zero	103
5.3.4	The Unary Negation Operator	103
5.3.5	Order of Precedence	104
5.3.6	The String Concatenation Operator	105
5.4	The Char Type	106
5.5	Type Conversion	107
5.5.1	Implicit Type Conversion	107
5.5.2	Primitive Type Checking	107
5.5.3	Primitive Type Casting	109
5.5.4	Combined Assignment Operators	110
5.6	Reading Input Using SimpleInput	111
5.6.1	Reading Numerical Values	111
5.6.2	Reading Strings	113
5.6.3	Reading Boolean Values	113
5.6.4	Reading Data from a File	113
5.7	Review	114
6	Adding Selective Behavior	116
6.1	Choice	116
6.1.1	The Simple Choice Statement	117
6.1.2	Boolean Expressions	118

6.1.3	Relational Operators	118
6.1.4	Precedence of Boolean Relational Operators	119
6.1.5	Comparing Object References	120
6.1.6	A Bar Chart Exercise	122
6.2	Alternative Actions	125
6.2.1	The If-Else Statement	125
6.2.2	Nested If Statements	128
6.2.3	Boolean Logical Operators	132
6.2.4	The Logical-And Operators	132
6.2.5	The Logical-Or Operators	134
6.2.6	The Logical Exclusive-Or Operator	134
6.2.7	The Logical-Not Operator	135
6.2.8	De Morgan's Theorem	135
6.2.9	Avoiding Boolean Literals	136
6.3	The Conditional Operator	137
6.4	Review	139
6.5	A Graph Exercise	141
7	Adding Repetitive Behavior	144
7.1	Repetition of Statements	144
7.2	The While Loop	145
7.2.1	Reading Input with a While Loop	147
7.3	The Do Loop	153
7.4	Review	155
7.5	The For Loop	156
7.5.1	The Increment and Decrement Operators	157
7.5.2	Using a For Loop to Print Numbers	159
7.5.3	Optional Header Expressions	161
7.5.4	The Comma Operator	162
7.6	Review	165
7.7	Code Blocks and Scope	166
7.8	Final Variables and Arguments	168
7.8.1	Final Fields and Constructors	170
7.9	Static Variables	170
7.10	Static Methods	172
7.11	Review	173
8	Packages and Utility Classes	176
8.1	Packages	176
8.1.1	Creating a Package	177
8.2	The Math Class	179
8.3	The String Class	180
8.3.1	String Comparisons	181
8.3.2	The <code>compareTo</code> Method	184
8.3.3	The Immutability of Strings	184
8.3.4	Parsing Strings	186
8.3.5	Converting Primitive Values to Strings	187
8.4	The <code>StringBuffer</code> Class	189

8.5	A Simplified Ship Class	193
8.6	Locale-Specific Processing	196
8.6.1	The Locale Class	197
8.6.2	Number Formatting	198
8.6.3	Date Formatting	201
8.7	Review	203
9	Arrays and Further Statements	205
9.1	Introduction	205
9.2	Problems That Arrays Solve	205
9.3	Creating Array Objects	207
9.3.1	Defining Arrays for Primitive-Type Values	207
9.3.2	Defining Arrays for Objects	208
9.3.3	The length Attribute	209
9.4	Indexing an Array	209
9.4.1	Use Final Variables for Index Names	210
9.5	Accessors for Array Attributes	211
9.6	Mutators for Array Attributes	212
9.7	Initializing Arrays	214
9.7.1	Anonymous Arrays	216
9.7.2	Use of final with Array Attributes	216
9.8	Using For Loops with Arrays	217
9.8.1	Iterating over an Array in Reverse	217
9.8.2	Initializer Blocks	219
9.9	Array Arguments	220
9.10	The Main Method Array Argument	221
9.11	Copying Arrays	222
9.11.1	Partially Occupied Arrays	223
9.12	Searching an Unsorted Array	224
9.13	Searching a Sorted Array	228
9.14	The Arrays Class	232
9.15	Review	233
9.16	Case Study: A Sports League	233
9.16.1	The TeamDetails Class	234
9.16.2	The League Class	234
9.17	Multi-Dimensional Arrays	238
9.17.1	Non-Rectangular Arrays	240
9.18	Review	241
9.19	Case Study: A Tic-Tac-Toe Game	242
9.19.1	The TTTGame Class	242
9.19.2	The TTTManager Class	245
9.19.3	The gameState Method	245
9.20	Further Control Statements	252
9.20.1	The Switch Statement	252
9.20.2	The Break Statement	256
9.20.3	The Continue Statement	257
9.20.4	Labeled Statements	257
9.21	Review	259

10	Collection Classes	262
10.1	Introduction	262
10.2	The Need for Flexible-Size Collections	262
10.2.1	The ArrayList Class	264
10.2.2	Collections and Object Identity	267
10.2.3	The LinkedList Class	270
10.2.4	The HashMap Class	273
10.2.5	The Legacy Collection Classes	277
10.3	Review	277
10.4	The Primitive Value Wrapper Classes	278
10.4.1	The Integer and Double Classes	278
10.4.2	The Boolean Class	281
10.4.3	The Character Class	281
10.5	Iterating over a Collection	282
10.6	Case Study: A Simple Card Game (II)	285
10.6.1	The Player Class	285
10.6.2	The Pile Class	286
10.6.3	The Pack Class	288
10.6.4	The Dealer Class	289
10.7	Queue and Stack Collections	293
10.7.1	A Queue for Cards	294
10.7.2	A Stack for Cards	296
10.8	Review	298
10.9	Passing <i>this</i> to Another Object	298
10.10	Introduction to Recursion	300
10.10.1	Avoiding Infinite Recursion	302
10.10.2	The Factorial Function	304
10.10.3	Divide and Conquer Problems	305
10.11	Review	308
II	Further Language Features	312
11	Exceptions	313
11.1	The Need for Exceptions	313
11.2	Throwing Exceptions	314
11.2.1	The Throw Statement	314
11.2.2	Exception Objects	315
11.2.3	The Throws Clause	316
11.2.4	Object Construction Failure	317
11.2.5	Checked and Unchecked Exceptions	317
11.3	Catching Exceptions	319
11.3.1	The Try Statement	319
11.3.2	Anticipating Multiple Exceptions	321
11.3.3	Exception Propagation	322
11.3.4	The Error Exception	325
11.4	The Finally Clause	325
11.5	Review	327

12 Input-Output	329
12.1 Input-Output	329
12.1.1 The Unicode Character Set	330
12.2 The File Class	330
12.2.1 A Directory Lister	334
12.2.2 A Recursive Directory Lister	337
12.3 Readers, Writers, and Streams	339
12.4 The FileReader and FileWriter Classes	339
12.4.1 Opening and Closing a File	340
12.4.2 Reading and Writing Text Files	342
12.4.3 Reading a Whole File	343
12.4.4 Reading Single Characters	345
12.5 The Buffered Reader and Writer Classes	346
12.5.1 The LineNumberReader Class	349
12.5.2 The CharArray Reader and Writer Classes	349
12.6 Review	350
12.7 The Stream Classes	351
12.8 The Data Stream Classes	353
12.9 The Stream Reader and Writer Classes	356
12.10 The RandomAccessFile Class	358
12.11 Readers and Writers for System Input-Output	359
12.12 Reading and Writing Objects	359
12.13 The StreamTokenizer Class	360
12.14 The StringTokenizer Class	362
12.15 Case Study: The SimpleInput Class	366
12.15.1 The Attributes	371
12.15.2 The nextToken Method	372
12.15.3 The nextNumber Method	372
12.16 Review	372
13 Interfaces	374
13.1 What is an Interface?	374
13.2 Interface Definitions	375
13.3 Implementing an Interface	377
13.3.1 Multiple Implementations of a Single Interface	380
13.3.2 Using Implementations of Interfaces	381
13.4 The instanceof Operator	384
13.5 Interfaces without Methods	385
13.6 Review	388
13.7 Common Interfaces	388
13.7.1 The Iterator Interface	388
13.7.2 Implementing an Iterator	389
13.7.3 The Enumeration Interface	392
13.7.4 The Comparable Interface	394
13.7.5 The Comparator Interface	396
13.7.6 The FileFilter and FilenameFilter Interfaces	398
13.8 Implementing Empty Interfaces	399

13.9	Implementing Multiple Interfaces	399
13.9.1	Conflict Resolution with Multiple Interfaces	401
13.10	The Serializable Interface	402
13.10.1	Controlling Serialization	407
13.10.2	The Externalizable Interface	408
13.11	Review	409
13.12	Case Study: A Stopwatch Interface	410
13.12.1	Argument and Result Types	410
13.12.2	Implementing the Stopwatch Interface	413
13.12.3	Testing the Stopwatch Implementation	418
14	Class Inheritance	421
14.1	The Need for Re-use	421
14.1.1	Alternatives to Inheritance	421
14.1.2	Delegation	422
14.1.3	Inheritance as a Solution	423
14.2	An Example of Inheritance	425
14.2.1	The HeaterController Class	425
14.2.2	Extending the HeaterController Class	428
14.3	The Is-A and Has-A Relationships	431
14.3.1	Inappropriate Inheritance	433
14.3.2	Multiple Inheritance	435
14.3.3	Downcasts and Upcasts	435
14.4	Inheritance for Specialization	436
14.4.1	Structural Similarity between Classes	440
14.5	Sub Class Initialization (I)	442
14.5.1	The Default No-Arg Constructor	443
14.5.2	Constructor Arguments and Order of Initialization	446
14.6	Creating Exception Sub Classes	446
14.7	Access Control	448
14.7.1	Protected Access	449
14.7.2	Class Visibility	450
14.7.3	Constructor Accessibility	451
14.7.4	Guidelines on Access Control	452
14.8	Review	453
14.9	The Object Class	454
14.10	Overriding Methods	458
14.10.1	Restrictions on Overriding	462
14.11	Styles of Method Overriding	463
14.11.1	Overriding for Breadth	464
14.11.2	Overriding for Chaining	466
14.11.3	Overriding for Restriction	466
14.12	Super Class Behavior and Overriding	468
14.12.1	Sub Classes and Attributes	472
14.12.2	Final Classes and Methods	472
14.13	Review	473

15 Abstract and Nested Classes	476
15.1 Abstract Classes	476
15.1.1 Incomplete Abstract Classes	476
15.1.2 Complete Abstract Classes	478
15.1.3 Abstract Class or Interface?	478
15.2 Sub Class Initialization (II)	479
15.3 Object Cloning	479
15.3.1 Deep and Shallow Copying	480
15.3.2 Preventing Cloning	486
15.4 Review	487
15.5 Top-Level Classes and Interfaces	487
15.5.1 Static Nested Classes	488
15.6 Inner Classes	490
15.6.1 Subordinate Inner Classes	491
15.6.2 Interpretational Inner Classes	494
15.6.3 Local Inner Classes	499
15.6.4 Anonymous Classes	499
15.6.5 Inner Classes and <code>this</code>	505
15.6.6 External Creation of Inner Class Objects	505
15.6.7 Linked Data Structures	507
15.7 The Class Class	510
15.8 Review	515
III GUI Packages	517
16 AWT Applications	518
16.1 The Abstract Windowing Toolkit	518
16.2 The Frame Class	519
16.2.1 The <code>paint</code> Method	520
16.2.2 The <code>repaint</code> Method	522
16.3 A Mechanism for Closing Windows	523
16.4 The Canvas Class	524
16.5 The Graphics Class	526
16.5.1 The <code>drawOval</code> Method	527
16.5.2 Drawing and Filling Shapes	528
16.5.3 Drawing Polygons	530
16.5.4 Clipping	532
16.6 Container Layout	534
16.6.1 The BorderLayout Class	535
16.7 Activating Buttons	537
16.7.1 The ActionListener Interface	538
16.7.2 Listening to Multiple Buttons	539
16.7.3 Determining the Event Source	542
16.8 Using Different Layouts	543
16.8.1 The FlowLayout Class	543
16.8.2 The GridLayout Class	545

16.9	The Panel Class	550
16.10	The Label Class	551
16.11	System-Dependent Details	552
16.11.1	The Toolkit Class	553
16.11.2	The GraphicsEnvironment Class	553
16.11.3	The Font Class	553
16.11.4	The Color Class	559
16.12	The RGB Color Model	561
16.12.1	The HSB Color Model	564
16.12.2	The Exclusive-Or Color Mode	564
16.13	The TextComponent Class	567
16.13.1	The TextField Class	568
16.13.2	The TextArea Class	569
16.13.3	A File Viewer using TextArea	572
16.13.4	The TextListener Interface	574
16.14	The GridBagLayout Class	575
16.15	The CardLayout Class	585
16.16	Adding and Removing Components	588
16.17	Listening for MouseEvents	591
16.18	MouseAdapter and MouseMotionAdapter	597
16.19	KeyListener and KeyAdapter	597
16.20	WindowListener and WindowAdapter	600
16.21	The Image Class	601
16.21.1	The MediaTracker Class	605
16.21.2	The Cursor Class	605
16.22	The Scrollbar Class	607
16.23	The ScrollPane Class	611
16.24	Animation	613
16.24.1	Avoiding Flicker in Animation	616
16.24.2	Double-Buffering in Animation	622
16.25	The Menu Classes	624
16.25.1	The MenuShortcut Class	628
16.26	The FileDialog Class	629
16.27	The PopupMenu Class	630
16.28	The CheckboxMenuItem Class	634
16.29	The Dialog Class	635
16.30	The Checkbox Class	640
16.30.1	The CheckboxGroup Class	641
16.31	The Choice Class	642
16.32	The List Class	645
16.33	Review	648
17	Swing	649
17.1	Introduction	649
17.2	The JFrame Class	650
17.2.1	A JFrame Oval Application	650
17.2.2	The JPanel Class	651

17.3	The JComponent Class	652
17.4	The JLabel Class	653
17.5	The Icon Interface	655
17.6	The Border Interface	657
17.7	The AbstractButton Class	659
17.7.1	The JButton Class	659
17.7.2	The JToggleButton Class	661
17.7.3	The JCheckBox Class	663
17.7.4	The JRadioButton Class	664
17.7.5	The ChangeListener Interface	666
17.8	Tool Tips	666
17.9	The KeyStroke Class	668
17.10	The JOptionPane Class	670
17.10.1	The showMessageDialog method	670
17.10.2	The showConfirmDialog method	672
17.10.3	The showInputDialog method	673
17.10.4	The showOptionDialog method	676
17.11	Swing Layout Managers	677
17.11.1	The BorderLayout Class	677
17.11.2	The Box Class	679
17.11.3	The OverlayLayout Class	682
17.11.4	The JLayeredPane Class	683
17.11.5	The JDesktopPane and JInternalFrame Classes	691
17.11.6	The JApplet Class	693
17.11.7	The JRootPane Class	693
17.12	The Swing Menu Classes	693
17.12.1	The JMenuBar Class	694
17.12.2	The JMenu and JMenuItem Classes	694
17.12.3	The JPopupMenu Class	700
17.13	The JToolBar Class	701
17.14	The JScrollPane Class	704
17.14.1	The JViewport Class	706
17.14.2	The Corner Components	706
17.14.3	The Header Components	706
17.15	The JTextComponent Class	706
17.15.1	The JTextField Class	707
17.15.2	The JPasswordField Class	708
17.15.3	The JTextArea Class	709
17.16	The JEditorPane Class	710
17.16.1	The JTextPane Class	713
17.17	The JSplitPane Class	713
17.18	The JTabbedPane Class	716
17.19	Pluggable Look-and-Feel	717
17.19.1	The UIDefaults Class	718
17.19.2	The UIManager Class	718
17.20	The JDialog Class	721
17.20.1	The JColorChooser Class	721

17.21	The JFileChooser Class	725
17.21.1	The FileFilter Class	728
17.22	The JList Class	730
17.22.1	List Selections	730
17.22.2	List Changes	732
17.23	The JComboBox Class	735
17.24	The JProgressBar Class	737
17.24.1	The Timer Class	739
17.25	The JSlider Class	740
17.26	The JTable Class	744
17.26.1	The AbstractTableModel Class	745
17.26.2	The TableModel Interface	748
17.27	The JTree Class	752
17.28	Review	756

IV Advanced Features

757

18 Threads

758

18.1	Multiprocessing	758
18.2	A Single Thread of Control	759
18.3	Thread Basics	761
18.3.1	Threads and Anonymous Classes	764
18.3.2	The Runnable Interface	764
18.3.3	Scheduling and Thread Priorities	767
18.4	Fair Threads	770
18.4.1	Yielding by Sleeping	770
18.4.2	The Join Method	775

VI Java for Simulation 905

- 21 Simulation 906**
 - 21.1 Using Simulation as a Modeling Tool 906
 - 21.2 Continuous and Discrete Simulation 906
 - 21.3 Events and the Simulation Scheduler 907
 - 21.4 Case Study—An Ice Cream Vendor 910
 - 21.4.1 Events in the Ice Cream Case Study 911
 - 21.4.2 The ArrivalEvent Class 912
 - 21.4.3 The Serve Event 914
 - 21.4.4 The FinishServing Event 915
 - 21.4.5 The Vendor and Customer Classes 916
 - 21.4.6 Running the Simulation 919
 - 21.5 Review 921
 - 21.5.1 Extended Case Study—A Gas Station 921
 - 21.6 The Gas Station’s Event Classes 923
 - 21.6.1 The StartPumping and StopPumping Events 924
 - 21.6.2 The DriverArrival and Refill Classes 925
 - 21.6.3 Prototyping the Simulation 928
 - 21.6.4 Discussion of the Primary Classes 930
 - 21.6.5 Lockable Resources 934
 - 21.6.6 Interactions Among the Primary Classes 934
 - 21.6.7 The Fuel and Payment Classes 941
 - 21.6.8 The FuelFactory Class 942
 - 21.6.9 The GasStation Class 945
 - 21.7 Review 951
- A The Primitive Data Types 952**
 - A.1 Introduction 952
 - A.2 The boolean Type 952
 - A.3 The Integer Types 952
 - A.3.1 Integer Ranges 953
 - A.3.2 Integer Literals 953

A.4	The Floating Point Types	953
A.4.1	Floating Point Ranges	954
A.4.2	Floating Point Literals	954
A.5	The Byte Type	954
A.6	The Char Type	955
A.6.1	Character Literals	955
A.6.2	Escape Sequences	955
A.6.3	Octal Character Literals	955
B	Number Representations	956
B.1	Introduction	956
B.2	Number Bases	956
B.2.1	Base 2 and Base 10 Notations	956
B.2.2	Twos-Complement Notation	957
B.2.3	Octal and Hexadecimal Representation	958
B.2.4	Octal and Hexadecimal Literals	959
C	Java Operators	961
C.1	Introduction	961
C.2	Operator Precedences	961
C.3	Arithmetic Operators	962
C.4	Relational Operators	962
C.5	Boolean Logical Operators	962
C.6	Bit Manipulation Operators	963
C.6.1	Bit Masks	965
C.6.2	Bit Manipulation Operators	965
D	Java Reserved Words	968
E	Common Design Patterns	969
E.1	Introduction	969
E.2	The Singleton Pattern	969
E.2.1	Enumerated Types	971
E.3	The Model-View Pattern	972
E.4	The Factory Pattern	974
