

Contents

1 Introduction to the book	1
1.1 Overview.....	1
1.2 Aims of the book, and who will benefit from it?	3
1.3 Structure of the book.....	4
1.3.1 Motivation for applying Semantic Web technologies to the Social Web	5
1.3.2 Introduction to the Social Web (Web 2.0, social media, social software).....	5
1.3.3 Adding semantics to the Web.....	6
1.3.4 Discussions.....	6
1.3.5 Knowledge and information sharing	6
1.3.6 Multimedia sharing.....	7
1.3.7 Social tagging	7
1.3.8 Social sharing of software	7
1.3.9 Social networks	8
1.3.10 Interlinking online communities.....	8
1.3.11 Social Web applications in enterprise	8
1.3.12 Towards the Social Semantic Web.....	9
2 Motivation for applying Semantic Web technologies to the Social Web	11
2.1 Web 2.0 and the Social Web.....	11
2.2 Addressing limitations in the Social Web with semantics	13
2.3 The Social Semantic Web: more than the sum of its parts.....	15
2.4 A food chain of applications for the Social Semantic Web	17
2.5 A practical Social Semantic Web	19
3 Introduction to the Social Web (Web 2.0, social media, social software)	21
3.1 From the Web to a Social Web.....	21
3.2 Common technologies and trends.....	25
3.2.1 RSS.....	25
3.2.2 AJAX.....	27
3.2.3 Mashups	28
3.2.4 Advertising	30
3.2.5 The Web on any device	32
3.2.6 Content delivery	34
3.2.7 Cloud computing	35
3.2.8 Folksonomies	38
3.3 Object-centred sociality	39

- 3.4 Licensing content..... 42
- 3.5 Be careful before you post..... 42
- 3.6 Disconnects in the Social Web 44
- 4 Adding semantics to the Web 45**
 - 4.1 A brief history..... 45
 - 4.2 The need for semantics 47
 - 4.3 Metadata 51
 - 4.3.1 Resource Description Framework (RDF)..... 52
 - 4.3.2 The RDF syntax 54
 - 4.4 Ontologies..... 56
 - 4.4.1 RDF Schema 59
 - 4.4.2 Web Ontology Language (OWL)..... 61
 - 4.5 SPARQL..... 62
 - 4.6 The ‘lowercase’ semantic web, including microformats 64
 - 4.7 Semantic search..... 66
 - 4.8 Linking Open Data 67
 - 4.9 Semantic mashups 69
 - 4.10 Addressing the Semantic Web ‘chicken-and-egg’ problem..... 71
- 5 Discussions 75**
 - 5.1 The world of boards, blogs and now microblogs..... 75
 - 5.2 Blogging 76
 - 5.2.1 The growth of blogs 77
 - 5.2.2 Structured blogging 79
 - 5.2.3 Semantic blogging..... 81
 - 5.3 Microblogging 85
 - 5.3.1 The Twitter phenomenon 88
 - 5.3.2 Semantic microblogging 89
 - 5.4 Message boards..... 91
 - 5.4.1 Categories and tags on message boards..... 92
 - 5.4.2 Characteristics of forums 94
 - 5.4.3 Social networks on message boards 97
 - 5.5 Mailing lists and IRC..... 100
- 6 Knowledge and information sharing 103**
 - 6.1 Wikis..... 103
 - 6.1.1 The Wikipedia..... 105
 - 6.1.2 Semantic wikis 105
 - 6.1.3 DBpedia 110
 - 6.1.4 Semantics-based reputation in the Wikipedia 111

6.2 Other knowledge services leveraging semantics.....	112
6.2.1 Twine.....	112
6.2.2 The Internet Archive	115
6.2.3 Powerset	117
6.2.4 OpenLink Data Spaces	119
6.2.5 Freebase.....	119
7 Multimedia sharing	121
7.1 Multimedia management	121
7.2 Photo-sharing services	122
7.2.1 Modelling RDF data from Flickr.....	123
7.2.3 Annotating images using Semantic Web technologies.....	125
7.3 Podcasts	126
7.3.1 Audio podcasts	127
7.3.2 Video podcasts	129
7.3.3 Adding semantics to podcasts	131
7.4 Music-related content	133
7.4.1 DBTune and the Music Ontology.....	133
7.4.2 Combining social music and the Semantic Web	134
8 Social tagging.....	137
8.1 Tags, tagging and folksonomies	137
8.1.1 Overview of tagging.....	137
8.1.2 Issues with free-form tagging systems	140
8.2 Tags and the Semantic Web.....	142
8.2.1 Mining taxonomies and ontologies from folksonomies	143
8.2.2 Modelling folksonomies using Semantic Web technologies.....	144
8.3 Tagging applications using Semantic Web technologies	148
8.3.1 Annotea	148
8.3.2 Revyu.com.....	149
8.3.3 SweetWiki	151
8.3.4 int.ere.st.....	151
8.3.5 LODr	152
8.3.6 Atom Interface.....	153
8.3.7 Faviki.....	154
8.4 Advanced querying capabilities thanks to semantic tagging	155
8.4.1 Show items with the tag ‘semanticweb’ on any platform.....	155
8.4.2 List the ten latest items tagged by Alexandre on SlideShare.....	155
8.4.3 List the tags used by Alex on SlideShare and by John on Flickr.....	157
8.4.4 Retrieve any content tagged with something relevant to the Semantic Web field	158

9 Social sharing of software	159
9.1. Software widgets, applications and projects	159
9.2 Description of a Project (DOAP).....	160
9.2.1 Examples of DOAP use.....	161
9.3 Crawling and browsing software descriptions.....	164
9.4 Querying project descriptions and related data.....	166
9.4.1 Locating software projects from people you trust.....	166
9.4.2 Locating a software project related to a particular topic	167
10 Social networks	169
10.1 Overview of social networks	169
10.2 Online social networking services	173
10.3 Some psychology behind SNS usage.....	175
10.4 Niche social networks.....	177
10.5 Addressing some limitations of social networks.....	179
10.6 Friend-of-a-Friend (FOAF).....	181
10.6.1 Consolidation of people objects	184
10.6.2 Aggregating a person's web contributions	186
10.6.3 Inferring relationships from aggregated data.....	187
10.7 hCard and XFN.....	189
10.8 The Social Graph API and OpenSocial	190
10.8.1 The Social Graph API	190
10.8.2 OpenSocial	192
10.9 The Facebook Platform.....	193
10.10 Some social networking initiatives from the W3C	194
10.11 A social networking stack.....	194
11 Interlinking online communities	197
11.1 The need for semantics in online communities.....	197
11.2 Semantically-Interlinked Online Communities (SIOC).....	198
11.2.1 The SIOC ontology	201
11.2.2 SIOC metadata format.....	203
11.2.3 SIOC modules	205
11.3 Expert finding in online communities.....	206
11.3.1 FOAF for expert finding	208
11.3.2 SIOC for expert finding.....	209
11.4 Connections between community description formats	211
11.5 Distributed conversations and channels.....	212
11.6 SIOC applications	215
11.7 A food chain for SIOC data	216
11.7.1 SIOC producers	218
11.7.2 SIOC collectors	223
11.7.3 SIOC consumers.....	224
11.8 RDFa for interlinking online communities.....	231

- 11.9 Argumentative discussions in online communities 234
- 11.10 Object-centred sociality in online communities 236
- 11.11 Data portability in online communities 238
 - 11.11.1 The DataPortability working group 238
 - 11.11.2 Data portability with FOAF and SIOC 240
 - 11.11.3 Connections between portability efforts 241
- 11.12 Online communities for health care and life sciences 242
 - 11.12.1 Semantic Web Applications in Neuromedicine 243
 - 11.12.2 Science Collaboration Framework 244
 - 11.12.3 bio-zen and the art of scientific community maintenance 246
- 11.13 Online presence 246
- 11.14 Online attention 247
- 11.15 The SIOC data competition 247

- 12 Social Web applications in enterprise 251**
 - 12.1 Overview of Enterprise 2.0 251
 - 12.2 Issues with Enterprise 2.0 255
 - 12.2.1 Social and philosophical issues with Enterprise 2.0 255
 - 12.2.2 Technical issues with Enterprise 2.0 258
 - 12.3 Improving Enterprise 2.0 ecosystems with semantic technologies 262
 - 12.3.1 Introducing SemSLATES 262
 - 12.3.2 Implementing semantics in Enterprise 2.0 ecosystems 263
 - 12.3.3 SIOC for collaborative work environments 266

- 13 Towards the Social Semantic Web 269**
 - 13.1 Possibilities for the Social Semantic Web 269
 - 13.2 A community-guided Social Semantic Web 271
 - 13.2.1 Wisdom of the crowds and the Semantic Web 272
 - 13.2.2 A grassroots approach 273
 - 13.2.3 The vocabulary onion 275
 - 13.3 Integrating with the Social Semantic Desktop 278
 - 13.4 Privacy and identity on the Social Semantic Web 279
 - 13.4.1 Keeping privacy in mind 279
 - 13.4.2 Identity fragmentation 280
 - 13.5 The vision of a Social Semantic Web 281
