PART I. PROFESSIONAL TRAINING AND PRACTICE 1

Chapter 1. Relevance of Health Behavior Research to Training and Practice in the Health Professions: An Overview 7

John G. Bruhn

Health Behavior: The Basis for a Practice Paradigm	7
A Philosophy of Practice: Some Tenets	7
Educational Reform for Health Professionals	10
Health Behavior as a Relevant Vehicle for Teaching	11
Problem-Based and Value-Based Learning	13
Health Behavior Competencies for Future Health Practitioners	14
Understanding Psychological and Social Mediators of Health and Illness . .	14
Assessing Individual and Family Health Risks	15
Intervening to Modify Health Risks	16
Promoting Healthful Behaviors	17
Partnering Health Care	17
New Satisfaction and Priorities of Future Health Practitioners	19
Reasons for Choosing a Health Profession	19
Congruency between Personal and Professional Goals	19
Broader Ethic of Responsibility	20
References	21

Chapter 2. Health Behavior Research and Medical Training: A New Paradigm 25

Virginia A. Reed, Maggie L. Moore-West, G. Christian Jernstedt, and Joseph F. O'Donnell

Introduction	25
A Need for a New Paradigm of Health in Medical Education	26
Proposed Reform in Medical Education	26

External Forces	28
Internal Forces or Structural Impediments	29
Innovative Programs Influenced by Health Behavior Research	31
Patient Education and Community Health Promotion	32
Rational Decision-Making Models	32
Role of Communication Skills in Disseminating Health Behavior Information	33
Past Research	34
A Theoretical Model	34
Research and Methodological Issues for the Future: Role of Meta-Analysis ...	37
Foundations of Meta-Analysis	37
Meta-Analytical Methods	38
Recommendations for Future Research on Health Behavior	39
Implications of New Research Methods	39
Conclusion	40
References	40

Chapter 3. Health Behavior Research: What Physicians Must Know 43

Ann Randolph Flipse

Introduction	43
Relevance of Health Behavior	43
Future Directions in Medical Training	44
Relevant Knowledge	45
Relevant Conceptual Frameworks	46
Lessons from Health Behavior Research	47
Problems in Health Behavior Research	47
Complexity of the Issues	47
A Model Curriculum	49
Future Research Issues	50
References	50

Chapter 4. Health Behavior Research and Medical Training and Practice: A Social Context 53

H. Jean C. Wiese and Eugene B. Gallagher

Introduction	53
Social Context of Health Care and Training	53
The New Health Reality	54
Health Behavior Research and Medical Training	56
Health Behavior Research and Medical Practice	60
Physician Behavior in the Health Care System	65
Implications for Future Health Behavior Research	70
References	72

Chapter 5. Relevance of Health Behavior Research for Nursing	75
<i>Carolyn L. Blue and Jo A. Brooks</i>	
Relevance of Health Behavior Research for Nursing Practice	76
Health Behavior Research and Nursing Models	78
Health Promotion Model	78
Interaction Model of Client Health Behavior	80
Theory of Care-Seeking Behavior	82
Health-Promoting Self-Care System Model	83
Resource Model of Preventive Health Behavior	84
Nursing Priorities	85
Research and Methodological Issues	85
Instruments Developed by Nurse Researchers	85
Study Designs and Threats to Internal and External Validity	91
Summary	92
Relevance of Health Behavior Research for Nursing Education	92
Rationale for Specific Nursing Diagnoses	94
Didactic Focus for Nursing Students	97
Clinical Focus for Nursing Students	97
Graduate Nursing Education	98
Summary	99
References	100
Chapter 6. Health Behavior Research and Social Work	103
<i>Rona L. Levy</i>	
Social Work in Health Care	103
Settings for Social Work Practice	103
Practice and Research	104
Social Work Activities	104
Training of Social Workers	109
Overall Structure: Classroom and Practicum Experience	109
Course Content	110
Scholarly Activities in Social Work	111
Social Work Journals in Health Care	111
Selected Lines of Social Work Research in Health Behavior	113
Summary and Conclusion	115
References	115
Chapter 7. Health Behavior Research and Oral Health	121
<i>Helen C. Gift and B. Alexander White</i>	
Introduction	121
The Environment and Oral Health Care Delivery Systems:	
Contexts for Behaviors	122

Education of Oral Health Professionals: Foundations for Behaviors	124
Dental Student Characteristics	124
Dental School Education and Training	124
Oral Health Behaviors	126
Preventive Behaviors	126
Sick Role Behaviors, Anxiety and Fear, and Behavioral Responses to Chronic Conditions	132
Self-Destructive Behaviors	134
Special Populations	135
Medically Compromised Individuals	135
Older Adults	136
Disabled Patients	137
Young Children	137
Research Issues	138
References	139

Chapter 8. Relevance of Health Behavior Research to Health Promotion and Health Education 143

Karen Glanz and Brian Oldenburg

Introduction	143
Evolution of the Professional Practice of Health Promotion and Health Education	144
Interdisciplinary Scientific Foundations	145
Spectrum of Professional Training and Roles	145
Health Behavior Knowledge in Professional Training	146
Health Promotion and Health Education Practice	148
Theoretical and Empirical Foundations	149
A Multilevel Perspective on Health Behavior	151
Dominant Theoretical Models	151
Populations with Special Needs	152
Theory, Research, and Practice: Multiple Foundations and Applications	152
Changing Lifestyles: Dietary Practices and Physical Activity	152
Improving Adherence to Mammography at Worksites	154
Major Research and Methodological Issues	157
Future Directions	158
References	159

Chapter 9. Relevance of Health Behavior Research to Public Health Professionals 163

David R. Buchanan

Historical Context	163
Mid-1990s Context	165
Current Controversies	167

Organization of the Field of Public Health	169
Epidemiology and Biostatistics	170
Environmental Health Sciences	172
Nutrition	173
Exercise Science	174
Occupational Health	174
Maternal and Child Health	175
International Health	175
Summary and Conclusion: Research Issues	176
References	177
PART II. HEALTH MANAGEMENT AND HEALTH POLICY	180
Chapter 10. Health Services Management and Health Behavior	187
<i>Robert H. Daugherty</i>	
Introduction and Overview	187
Health Care Management and the Status of Health Behavior Research	189
Health Behavior and Health Management	189
Health Behavior and the Consumer	190
Health Behavior and Physicians	191
Health Behavior and Organizational Settings	192
Future Directions in Health Care Management	193
Continuum of Care	194
Managed Care	194
New Focus for Management	194
Health Behavior Research Needs of Health Care Managers	195
Paradigm Components	196
Consumer/Patient Research	196
Provider Behavior Research	197
Research in Health Care Management	198
References	199
Chapter 11. Paternalism and Health Behavior	203
<i>Tore Nilstun</i>	
Definitions of Paternalism	203
Different Types of Paternalism	204
Value Premises	206
Identification and Analysis of Ethical Conflicts	207
Balancing Ethical Costs and Benefits	209
Concluding Remarks	211
References	212

Chapter 12. Health Policy, Health Behavior, and Injury Control	215
<i>Leon S. Robertson</i>	
Introduction	215
Individual Behavior	216
Persuasion	216
Law	219
Corporate Behavior	220
Government Behavior	225
Conclusion	228
References	228
Chapter 13. Health Policy and Smoking and Tobacco Use	231
<i>K. Michael Cummings</i>	
Overview	231
The Tobacco Problem	231
Who Smokes?	232
Why Do People Smoke?	233
Cognitive Theories of Smoking Behavior	233
Noncognitive Theories of Smoking Behavior	234
Choice versus Addiction: Implications for Policy	234
Informed Choice	235
Smoking as an Addiction	235
Protection of Nonsmokers	235
History of Tobacco Control Policies	235
Information and Education	236
Economic Incentives	241
Restrictions on Tobacco	243
Methodological Issues Relevant to Tobacco Policy Research	247
Conclusions: Research and Policy Issues	248
References	248
PART III. PLANNED APPLICATIONS	253
Chapter 14. Health Behavior Research and School and Youth Health Promotion	263
<i>Steven H. Kelder, Elizabeth W. Edmundson, and Leslie A. Lytle</i>	
Introduction	263
Rationale for Youth Health Promotion	264
Social Cognitive Theory: A Model of Youth Health Promotion	265
Curriculum	265
Parent Education	266

Community Reinforcement	267
Effectiveness of Interventions	267
Substance Use Prevention	267
Nutrition and Physical Education	269
Sexuality Education	272
Violence Prevention	275
Recommendations for Future Research	278
Methodological Issues	278
Recommendations for Health Practitioners	279
References	280
Chapter 15. Contributions of Health Behavior Research to Community Health Promotion Programs	285
<i>Caroline Schooler and June A. Flora</i>	
Definition of Community	285
Community Health Promotion Programs	286
Process of Community Health Promotion	292
New Directions for Community Health Promotion Programs: Research Issues	294
Conclusion	296
References	296
Chapter 16. Health Behavior Interventions with Families	303
<i>Tom Baranowski and Marsha Davis Hearn</i>	
Introduction	303
Why Intervene with Families with Children?	305
Developmental Phases	305
Prenatal	305
Infancy	306
Toddler and Preschool Years	308
Elementary School Years	309
Adolescence	312
Adulthood	314
A Model of Family Dietary Change	315
Concluding Comments	318
References	319
Chapter 17. Stories to Live By: A Narrative Approach to Health Behavior Research and Injury Prevention	325
<i>Henry P. Cole</i>	
Introduction	325
The Exercises as Interactive Stories	326
Prior Research on Simulation Exercises	326

The Theory of Narrative Thinking	330
A Conceptual Model for Health Beliefs and Behavior	333
Problem Posing and Empowerment	337
The Exercises as Devices for Assessing Knowledge and Risk	339
Evaluation and Effectiveness	344
Conclusion	346
References	347

**Chapter 18. Health Behavior Research and Communication
Campaigns** 351

James W. Swinehart

Introduction: Methodological Issues	351
Setting Objectives	352
Choosing and Segmenting Target Audiences	355
Selecting Media and Vehicles	356
Formative or Background Research in Developing Campaigns and Materials	356
Campaign Evaluation	359
Research Problems	364
Topics That Need Further Research	365
Recommendations for Future Health Campaigns	367
Recommendations for Preparing Media Materials on Health	371
References	372

PART IV. TOWARD THE FUTURE: AN INTEGRATION 375

**Chapter 19. Relevance of Health Behavior Research: An Integration
of Applications** 377

David S. Gochman

Professional Practice	377
Relevant Knowledge and Theory	377
Summary: A Potential Ignored	384
Prevalence in Professional Socialization	385
Common Themes	389
Conceptual Issues	389
Methodological Issues	390
Changing Professional Perspectives and Roles	391
Range of Focus	391
Future Research Directions	392
Provider Issues	392
Methodological Directions: The "Boilerplate"	393
Summary	393

Chapter 20. Health Behavior Research, Cognate Disciplines, Future Identity, and an Organizing Matrix: An Integration of Perspectives	395
<i>David S. Gochman</i>	
Health Behavior Research: A Multidisciplinary Undertaking	395
Health Psychology	396
Medical Anthropology	399
Medical Geography	403
Medical Sociology	406
Present into Future: Issues of Identity	410
Health Behavior and Medicine	410
Health Behavior Research: An Interdisciplinary Undertaking	412
Health Behavior and Ideology	414
Co-optation: Politics and Profits	415
A Matrix for Organizing Health Behavior Knowledge	416
A Taxonomy for Health Behavior Research	416
Multidisciplinary and Interdisciplinary Publication: A Journal of Health Behavior Research	420
Summary	420
References	422
Concepts and Definitions: A Glossary for Health Behavior Research	427
Contents of Volumes I–IV	443
Index to Volumes I–IV	449
