

CONTENTS

Preface xi

Acknowledgments xvii

1. Intertemporal choice under certainty	1
1.1. The two-period model	1
1.2. The multi-period model	6
1.3. The life-cycle model	9
1.4. Demographic variables	12
1.5. Intertemporal choice in continuous time	14
1.6. Infinite time horizon	18
1.7. Aggregate implications of the life-cycle model	19
2. The age profile of consumption and wealth	25
2.1. Consumption growth and the interest rate	25
2.2. Saving and the interest rate	28
2.3. The age profiles of income, consumption, and wealth	30
2.4. Estimating the age profile of consumption	32
2.5. Demographic variables and equivalence scales	38
2.6. The age profile of wealth	40
2.7. The measurement of savings and wealth	43
3. Complete markets	46
3.1. A model with two states and two periods	48
3.2. The multi-period model	51
3.3. Tests of complete markets	54
3.4. Implications for consumption inequality and mobility	58
3.5. The aggregation problem	59
3.6. Why don't we observe complete markets?	62
4. The certainty equivalence model	65
4.1. Intertemporal choice under uncertainty	65
4.2. The Euler equation with quadratic utility	68
4.3. The consumption function and income innovations	72

4.4. Income shocks and the marginal propensity to consume	73
4.5. Saving for a rainy day	78
4.6. Consumption inequality	79
5. Liquidity constraints	82
5.1. A two-period model	83
5.2. The sensitivity of consumption to expected income changes	85
5.3. The timing of income and consumption	88
5.4. The natural borrowing constraint	90
5.5. The Euler equation with liquidity constraints	91
6. The precautionary saving model	94
6.1. Incomplete markets and precautionary saving	94
6.2. A numerical example	97
6.3. The Euler equation with precautionary saving	100
6.4. An explicit solution for precautionary saving	103
6.5. The marginal propensity to consume with precautionary saving	107
Appendix: Risk aversion and prudence	111
7. The buffer stock model	115
7.1. Expected liquidity constraints	115
7.2. Precautionary saving with liquidity constraints	119
7.3. The buffer stock model	122
7.4. The concavity of the consumption function	125
Appendix: Solving consumption stochastic dynamic programming problems	127
8. The response of consumption to anticipated changes in income	131
8.1. The excess sensitivity test	133
8.2. Implementing and interpreting the excess sensitivity test	136
8.3. Tests for liquidity constraints	138
8.4. Direct evidence from credit markets	141
8.5. Asymmetric response to income increases and declines	144
8.6. Episodes of anticipated income increases	145
8.7. Anticipated income declines and the retirement consumption puzzle	149
Appendix: Econometric problems in estimating the Euler equation	153
Measurement error	153
Short panels	154

9. The response of consumption to unanticipated changes in income	157
9.1. The quasi-experimental approach	161
9.2. Covariance restrictions	165
9.3. Consumption mobility	169
9.4. Consumption inequality	172
9.5. Subjective expectations	173
9.6. Shocks to lifetime resources	176
9.7. The wealth effect	178
10. The response of consumption to income risk	181
10.1. Measuring income risk	182
10.2. Euler equation estimates	184
10.3. Evidence from wealth regressions	186
10.4. Estimation by simulation methods	187
10.5. Group comparisons	190
10.6. Beyond income risk	191
10.7. Endogenous incomplete markets	194
11. Lifetime uncertainty	197
11.1. A two-period model	198
11.2. Annuity contracts	201
11.3. The multi-period model	202
11.4. Complete markets	207
11.5. The annuity puzzle	208
11.6. The age-wealth profile with lifetime uncertainty	210
12. Bequest motives	214
12.1. Altruism	215
12.2. Strategic bequests	217
12.3. <i>Inter vivos</i> transfers	219
12.4. Joy of giving and the age-wealth profile	222
12.5. The size of intergenerational transfers	227
12.6. Transfer taxes	229
13. Time, habits, and consumer durables	234
13.1. Non-separable utility functions	235
13.2. Habits	237
13.3. Durable goods	240
13.4. Leisure	245
13.5. Home production	249
13.6. Unitary versus collective models	252

14. Non-standard preferences	257
14.1. Mental accounting	258
14.2. Time inconsistency	262
14.3. Financial sophistication	265
14.4. Social preferences	270
Conclusions	273
