<b>CHAPTER 1</b>	<b>Scenario-Based Usability Engineering</b>	<b>1</b>
	<b>1.1 Design by Scenario: Marissa's Gravity Project</b>	<b>1</b>
	<b>1.2 Managing Software Development</b>	<b>5</b>
	1.2.1 Software Engineering	5
	1.2.2 Prototyping and Iterative Development	8
	<b>1.3 Usability in Software Development</b>	<b>9</b>
	1.3.1 The Emergence of Usability	9
	1.3.2 Usability Engineering	14
	<b>1.4 Scenario-Based Usability Engineering</b>	<b>15</b>
	1.4.1 User Interaction Scenarios	16
	1.4.2 Why Scenarios?	20
	<b>1.5 Doing Scenario-Based Usability Engineering</b>	<b>24</b>
	1.5.1 Analysis	25
	1.5.2 Design	26
	1.5.3 Prototyping and Evaluation	27
	1.5.4 Other Approaches	28
	<b>1.6 Example-Based Learning of SBD</b>	<b>29</b>
	1.6.1 Case Study: A Virtual Science Fair in MOOsburg	29
	Summary and Review	33
	Exercises	34
	Project Ideas	34
	Recommended Reading	35
<b>CHAPTER 2</b>	<b>Analyzing Requirements</b>	<b>37</b>
	<b>2.1 Analyzing Work Practices</b>	<b>38</b>
	<b>2.2 Getting Users Involved</b>	<b>43</b>

	<b>2.3 Science Fair Case Study: Requirements Analysis</b>	<b>48</b>
	2.3.1 Root Concept	49
	2.3.2 Analysis of Current Practice	51
	2.3.3 Summarizing the Field Data	54
	2.3.4 Problem Scenarios and Claims	64
	2.3.5 Scenarios and Claims as Requirements	75
	Summary and Review	76
	Exercises	77
	Project Ideas	77
	Recommended Reading	78
<b>CHAPTER 3</b>	<b>Activity Design</b>	<b>79</b>
	<b>3.1 Designing Effective Activities</b>	<b>81</b>
	<b>3.2 Designing Comprehensible Activities</b>	<b>84</b>
	<b>3.3 Designing Satisfying Activities</b>	<b>88</b>
	<b>3.4 Science Fair Case Study: Activity Design</b>	<b>91</b>
	3.4.1 Exploring the Activity Design Space	92
	3.4.2 Activity Design Scenarios and Claims	94
	3.4.3 Refining the Activity Design	101
	3.4.4 Participatory Design	104
	3.4.5 Coherence and Completeness	105
	Summary and Review	106
	Exercises	107
	Project Ideas	107
	Recommended Reading	108
<b>CHAPTER 4</b>	<b>Information Design</b>	<b>109</b>
	<b>4.1 Stages of Action in Human-Computer Interaction</b>	<b>110</b>
	<b>4.2 Perceiving Information</b>	<b>111</b>
	4.2.1 Gestalt Perception	113
	4.2.2 Organization in User Interface Displays	114
	<b>4.3 Interpreting Information</b>	<b>119</b>
	4.3.1 Familiarity	119
	4.3.2 Realism and Refinement	122
	4.3.3 Recognizing Affordances	124

	<b>4.4 Making Sense of Information</b>	<b>125</b>
	4.4.1 Consistency 127	
	4.4.2 Visual Metaphors 128	
	4.4.3 Information Models 130	
	4.4.4 Dynamic Displays 131	
	<b>4.5 Science Fair Case Study: Information Design</b>	<b>137</b>
	4.5.1 Exploring the Information Design Space 138	
	4.5.2 Information Scenarios and Claims 141	
	4.5.3 Refining the Information Scenarios 149	
	<b>4.6 Consistency and Coherence</b>	<b>155</b>
	Summary and Review	155
	Exercises	156
	Project Ideas	157
	Recommended Reading	157
<b>CHAPTER 5</b>	<b>Interaction Design</b>	<b>159</b>
	<b>5.1 Selecting a System Goal</b>	<b>161</b>
	5.1.1 Interaction Style 161	
	5.1.2 Opportunistic Goals 163	
	<b>5.2 Planning an Action Sequence</b>	<b>164</b>
	5.2.1 Making Actions Obvious 165	
	5.2.2 Simplifying Complex Plans 166	
	5.2.3 Flexibility 168	
	<b>5.3 Executing an Action Sequence</b>	<b>171</b>
	5.3.1 Directness 171	
	5.3.2 Feedback and Undo 174	
	5.3.3 Optimizing Performance 176	
	<b>5.4 Science Fair Case Study: Interaction Design</b>	<b>178</b>
	5.4.1 Exploring the Interaction Design Space 179	
	5.4.2 Interaction Scenarios and Claims 182	
	5.4.3 Refining the Interaction Scenarios 188	
	Summary and Review	192
	Exercises	193
	Project Ideas	194
	Recommended Reading	195

CHAPTER 6	Prototyping	197
	6.1 Exploring User Requirements	198
	6.2 Choosing Among Alternatives	201
	6.3 Usability Testing	204
	6.4 Evolutionary Development	207
	6.5 Science Fair Case Study: Prototyping	209
	6.5.1 Scenario Mock-ups	210
	6.5.2 Scenario Machines	212
	6.5.3 Prototyping Alternatives	217
	6.5.4 Evolutionary Development	221
	Summary and Review	223
	Exercises	224
	Project Ideas	225
	Recommended Reading	225
CHAPTER 7	Usability Evaluation	227
	7.1 Usability Specification for Evaluation	230
	7.2 Analytic Methods	232
	7.2.1 Usability Inspection	233
	7.2.2 Model-Based Analysis	235
	7.3 Empirical Methods	238
	7.3.1 Field Studies	238
	7.3.2 Usability Testing in a Laboratory	241
	7.3.3 Controlled Experiments	244
	7.4 Science Fair Case Study: Usability Evaluation	247
	7.4.1 Usability Inspection	248
	7.4.2 Developing Usability Specifications	250
	7.4.3 Testing Usability Specifications	252
	7.4.4 Assessing and Refining Usability Specifications	268
	Summary and Review	269
	Exercises	270
	Project Ideas	271
	Recommended Readings	271

CHAPTER 8	User Documentation	273
	8.1 The Production Paradox	274
	8.2 Paper and Online Manuals	276
	8.3 Demonstrations and Tutorials	280
	8.4 Information in the Interface	284
	8.5 Socially Mediated Documentation	287
	8.6 Using Context and Intelligence	290
	8.7 Science Fair Case Study: Documentation Design	292
	8.7.1 Exploring the Documentation Design Space	292
	8.7.2 Documentation Scenarios and Claims	295
	8.7.3 Refining the Documentation	300
	Summary and Review	300
	Exercises	301
	Project Ideas	302
	Recommended Reading	302
CHAPTER 9	Emerging Paradigms for User Interaction	303
	9.1 Collaborative Systems	306
	9.2 Ubiquitous Computing	313
	9.3 Intelligent User Interfaces	317
	9.3.1 Natural Language and Multimodal Interaction	318
	9.3.2 Software Agents	321
	9.4 Simulation and Virtual Reality	326
	9.5 Science Fair Case Study: Emerging Interaction Paradigms	329
	9.5.1 Collaboration in the Science Fair	330
	9.5.2 Ubiquitous Computing in the Science Fair	332
	9.5.3 Intelligence in the Science Fair	334
	9.5.4 Simulating Reality in the Science Fair	336
	9.5.5 Refining the Interaction Design	338
	Summary and Review	338
	Exercises	339
	Project Ideas	340
	Recommended Reading	340

CHAPTER 10	Usability Engineering in Practice	341
	<b>10.1 Usability in Organizations</b>	<b>342</b>
	10.1.1 Usability Specialists in a Development Team	342
	10.1.2 Cost-Justifying Usability	345
	<b>10.2 Internationalization and Localization</b>	<b>349</b>
	10.2.1 User Interface Standards	349
	10.2.2 Localization	351
	<b>10.3 Ethics of Usability</b>	<b>352</b>
	10.3.1 Changing Scope of Computing	353
	10.3.2 The Digital Divide	355
	10.3.3 Meeting the Needs of Special Populations	356
	10.3.4 Technology Evolution and Unintended Consequences	358
	Summary and Review	360
	Exercises	360
	Project Ideas	361
	Recommended Readings	361
APPENDIX	Inferential Statistics	363
