

Table of Contents

<i>Preface</i>	7
Chapter 1	
<i>Introduction</i>	9
The general framework of language acquisition	9
Data on language acquisition in general	11
Introduction to research on pronouns:	14
A. Data concerning personal pronouns	17
B. Data concerning relative pronouns	21
C. Data concerning possessive pronouns	23
Research methodology	23
Chapter 2	
<i>Experiment no. 1, the comprehension of the personal pronouns</i> <i>“he” and “she”</i>	26
Preliminary considerations	26
Research materials and technique	27
Population	28
Results:	28
A. Success and failure, general considerations	28
B. Distribution of RS and NRS behaviours in errors and overall	32
C. Analysis of the errors made on the adjectival and pronominal forms of “the other”	34
D. Check experiments	39
Developmental outline	41
Chapter 3	
<i>Experiment no. 2, the comprehension of the relative pronoun “that”</i> ...	46
Preliminary considerations	46
Task sentences	48
Research materials	50
Technique	50

Population	51
Results:	51
A. Success and failure scores overall.	51
B. Distribution of responses across the sentences.	57
C. Study of the repetition of certain response patterns	65
Developmental outline	74
Chapter 4	
<i>Experiment no.3, the comprehension of the possessive pronouns</i>	
<i>“his” and “hers”</i>	79
Preliminary considerations	79
Experimental situation and research toys	80
Research technique	80
Task sentences	81
Population	83
Results:	84
A. Success and failure scores overall.	84
B. Developmental trends in the distribution of success and failure ...	90
C. Analysis of the errors	92
D. Analysis of the results in terms of the problem of reference.	100
General developmental outline	101
Chapter 5	
<i>General conclusion</i>	107
The comparison of the results of the three experiments	107
Discussion of the results in the light of T. Bever’s theory	116
The metalinguistic status of pronouns during development	123
Factors affecting the acquisition of the pronominal system	125
<i>Bibliography</i>	132
<i>Author index</i>	136
<i>Subject index</i>	137
