<i>Preface</i>	<i>page xi</i>
<i>Acknowledgments</i>	<i>xiii</i>
1 Approach to Quantum Field Theory	1
1.1 Philosophical Contemplations	2
1.1.1 Images of Nature	3
1.1.2 Space and Time	11
1.1.3 Infinity	19
1.1.4 Irreversibility	23
1.1.5 On the Measurement Problem	34
1.1.6 Approaches to Quantum Field Theory	38
1.2 Mathematical and Physical Elements	49
1.2.1 Fock Space	50
1.2.2 Fields	55
1.2.3 Dynamics	57
1.2.4 Quantities of Interest	69
1.2.5 Renormalization	76
1.2.6 Symmetries	87
1.2.7 Expansions	89
1.2.8 Unravelings	92
1.2.9 Summary	103
2 Scalar Field Theory	110
2.1 Some Basic Equations	111
2.1.1 Free Dissipative Evolution	111
2.1.2 Perturbation Theory	113
2.2 Propagator	115
2.2.1 Second-Order Perturbation Expansion	116
2.2.2 Going to the Limits	121

2.2.3	Relativistic Covariance	126
2.2.4	On Shell Renormalization	129
2.3	Vertex Function	132
2.3.1	Four-Time Correlation Functions	133
2.3.2	A Primary Correlation Function	134
2.3.3	Core Correlation Functions	137
2.4	Summary and Discussion	138
3	Quantum Electrodynamics	141
3.1	The Dirac Equation	142
3.1.1	Wave Equations for Free Particles	143
3.1.2	Relativistic Covariance	144
3.1.3	Planar Wave Solutions	146
3.1.4	Interaction with Electromagnetic Fields	150
3.1.5	From 3 + 1 to 1 + 1 Dimensions	151
3.2	Mathematical Image of Quantum Electrodynamics	153
3.2.1	Fock Space	153
3.2.2	Fields	156
3.2.3	Hamiltonian and Current Density	159
3.2.4	Schwinger Term	162
3.2.5	BRST Quantization	163
3.2.6	Quantum Master Equation	174
3.3	Schwinger Model	176
3.3.1	Fock Space	177
3.3.2	Fields	178
3.3.3	Hamiltonian and Current Density	180
3.3.4	Schwinger Term	182
3.3.5	BRST Quantization	182
3.3.6	Exact Solution	184
3.3.7	Fermions and Bosons in One Space Dimension	191
3.4	Confrontation with the Real World	197
3.4.1	Free Propagators	198
3.4.2	Scattering Problems	200
3.4.3	Magnetic Moment of the Electron	210
4	Perspectives	220
4.1	The Nature of Quantum Field Theory	220
4.1.1	The Image	220
4.1.2	Implications for Ontology	222
4.2	Open Mathematical Problems	225
4.3	Future Developments	227
