Foreword 15
Preface 17
Acknowledgments 19

PART I What, Why, and When

1 In-Memory Computing, Big Data, and SAP HANA 23

1.1 Introduction to In-Memory Computing and Big Data 23
1.1.1 In-Memory Computing and Analytics 23
1.1.2 Big Data 26
1.2 Introduction to SAP HANA 30
1.2.1 SAP HANA as in In-Memory Computing Solution 31
1.2.2 SAP HANA as an Enabler of Big Data Solutions 35
1.2.3 SAP HANA Capabilities 38
1.2.4 SAP HANA Adoption Drivers 41
1.3 Getting Started with SAP HANA 42
1.4 Summary 46

2 SAP HANA Versions 47

2.1 SAP HANA Standalone Version 47
2.1.1 Technical Requirements 48
2.1.2 Skills Requirements 51
2.1.3 Project Plan Steps 55
2.2 SAP HANA for SAP NetWeaver BW 57
2.2.1 Technical Requirements 58
2.2.2 Skills Requirements 60
2.2.3 Project Plan Steps 64
2.3 Summary 66

3 SAP HANA Use Cases 67

3.1 Do Something New 68
3.2 Do Something Faster 71
3.3 Which SAP HANA Version Is Right for You? 74

3.3.1 Choosing SAP HANA as a Standalone System 76
3.3.2 Choosing SAP HANA for BW 77
3.3.3 Final Thoughts 78
3.4 Summary 78

4 SAP HANA and Your Business Strategy 79

4.1 Identifying Transformational Opportunities 81
4.2 Understanding Your Needs 84
4.2.1 Enterprise Needs 84
4.2.2 Data Needs 86
4.3 Working with Existing Solutions: SAP HANA versus SAP NetWeaver BWA 90
4.3.1 Does SAP HANA Replace BWA? 90
4.3.2 Pros and Cons of BWA 92
4.3.3 Pros and Cons of SAP HANA 94
4.3.4 Conclusion 97
4.4 Writing a Business Case, Budgeting, and Staffing for SAP HANA 98
4.4.1 Writing a Business Case 99
4.4.2 Budgeting for an SAP HANA Implementation 103
4.4.3 Staffing an SAP HANA Implementation 106
4.4.4 Building a Roadmap 108
4.5 Frequently Asked Questions about SAP HANA 111
4.5.1 Is SAP HANA a Database, Hardware, or a Solution? 111
4.5.2 What Type of Customer is Looking at SAP HANA Solutions? 112
4.5.3 What Are the Problem Statements that Identify a Need for SAP HANA? 112
4.5.4 What Is the Differentiator for SAP with SAP HANA? 112
4.5.5 What Is SAP Envisioning for the Future of SAP HANA? ... 113
4.5.6 Is SAP HANA Plug and Play? 113
4.5.7 Can Non-SAP Business Intelligence Tools Work on Top of SAP HANA? 113
4.5.8 What Does a Customer Need to Buy to Use SAP HANA? 114
4.5.9 How Much Does SAP HANA Cost? 114
4.5.10 Does SAP HANA Replace BWA for Customers? 115

4.5.11 Is SAP HANA Just Another SAP Fad That Will Not Have a Long Lifespan—Like mySAP? 115
4.6 Summary 115

PART II How

5 Planning an SAP HANA Installation 119

5.1 In-Memory Computing Engine (IMCE) 119
5.2 Sizing Your System 120
5.2.1 SAP Quick Sizer for SAP HANA 121
5.2.2 Some Quick Sizing Rules to Follow 126
5.2.3 SAP's T-Shirt Sizing Model for SAP HANA 127
5.3 Software and Technical Requirements 129
5.4 Row versus Column Indexes and the Persistency Layer 133
5.5 Hardware Options 138
5.6 Special Considerations for Planning an SAP HANA for BW Installation 140
5.6.1 SAP HANA-Optimized InfoCubes 141
5.6.2 SAP HANA-Optimized Data Store Objects (DSOs) 144
5.6.3 The Future of InfoCubes 145
5.7 Summary 146

6 SAP HANA and the SAP BusinessObjects BI Platform 147

6.1 Overview of the SAP BusinessObjects Tools 147
6.1.1 SAP BusinessObjects Dashboards (Xcelsius) 148
6.1.2 SAP BusinessObjects Web Intelligence 149
6.1.3 SAP BusinessObjects Explorer 150
6.1.4 SAP BusinessObjects Analysis 151
6.1.5 SAP BusinessObjects Design Studio 153
6.1.6 SAP Crystal Reports 153
6.2 Connecting SAP BusinessObjects BI Tools to SAP HANA 155
6.2.1 Universes with Open and Java Database Connections (ODBC/JDBC) 155
6.2.2 IDT Access to Attributes, Calculations, and Analytical Views 163
6.2.3 Connecting to Excel with Open Database Objects (ODO) and MDX 164

6.2.4 Building a Microsoft Query on SAP HANA 168
6.2.5 BICS Connections 169
6.2.6 Connectivity Summary 169
6.3 Going Mobile with SAP HANA and SAP BusinessObjects 170
6.4 Summary 171

7 Data Modeling with Information Composer 173

7.1 Getting Started with Information Composer 175
7.1.1 Functionality 176
7.1.2 Example Scenario 178
7.2 Uploading Data to SAP HANA 180
7.2.1 Specifying the Data Source and Loading Data 180
7.2.2 Cleansing the Data 184
7.2.3 Classifying Data Columns 188
7.2.4 Saving the Data 190
7.3 Composing Information Views 191
7.3.1 Specifying Data Sources 192
7.3.2 Combining Data 196
7.4 Viewing Uploaded Data and Composed Information Views 203
7.4.1 My Data Screen Area 203
7.4.2 My Information Views Screen Area 204
7.5 Summary 205

8 Data Modeling with SAP HANA Studio 207

8.1 SAP HANA Studio Overview and Terminology 207
8.2 Getting Started with SAP HANA Information Modeler 212
8.2.1 Adding a System 214
8.2.2 Opening Perspectives 217
8.2.3 Using Quick Launch 218
8.2.4 Creating a Package 219
8.2.5 Example Scenario 220
8.3 Building Attribute Views 221
8.3.1 Creating an Attribute View 221
8.3.2 Defining Table Joins 225
8.3.3 Defining Output 231
8.3.4 Checking, Saving, and Activating Views 233
8.3.5 Creating the Time Attribute View 235

8.4 Building Analytic Views 237
8.4.1 Creating an Analytic View 238
8.4.2 Copying an Analytic View 248
8.5 Building Calculation Views Using the Graphical Method 249
8.6 SQL and SQLScript 260
8.6.1 Using SQL 260
8.6.2 Using SQLScript 267
8.7 Summary 272

9 Advanced Concepts in SAP HANA Studio 275

9.1 Derived Attribute Views 275
9.2 Calculated Attributes 281
9.3 Restricted and Calculated Measures 284
9.4 Filter and Variable Operations 290
9.4.1 Filters 290
9.4.2 Variables and Input Parameters 299
9.5 Currency Conversion 304
9.5.1 Using an Input Parameter to Specify Target Currency 307
9.5.2 Linking Measures with Currencies without Using Conversion 308
9.6 Hierarchies 309
9.6.1 Creating a Leveled Hierarchy 310
9.6.2 Creating a Parent-Child Hierarchy 314
9.7 Personalizing Studio 317
9.7.1 Model Validation 317
9.7.2 Versioning 318
9.7.3 Checking Model References 319
9.7.4 Customizing Perspectives 320
9.8 Summary 323

10 Data Provisioning 325

10.1 Choosing a Data Provisioning Method 326
10.1.1 Strategic Considerations 328
10.1.2 Technical Considerations 335
10.2 Trigger-Based Replication: SAP Landscape Transformation 338
10.2.1 Installation 338

10.2.2 How SLT Works 340
10.2.3 SLT Configuration 342
10.2.4 SLT Administration (Start, Replicate, Stop, Suspend, Resume) 343
10.2.5 Extended Features 345
10.3 ETL-Based Replication: SAP Data Services 349
10.3.1 Configuration Requirements 350
10.3.2 Preparing SAP HANA to Receive Data from SAP Data Services 350
10.3.3 Loading Data 353
10.4 Log-Based Replication: Sybase Replication Server and Load Controller 358
10.4.1 Installation 360
10.4.2 Running Sybase Replication 361
10.5 Direct Extractor Connection 361
10.5.1 DXC Technology 362
10.5.2 Important Considerations for the Use of DXC 365
10.5.3 Preparing SAP HANA for Use with DXC 368
10.5.4 Preparing the Source System for Use with DXC 370
10.5.5 Loading Data to SAP HANA with DXC 370
10.6 Summary 371

11 SAP HANA Administration 373

11.1 Main Administration Tasks 374
11.1.1 Adding Systems 375
11.1.2 Exporting and Importing Systems 377
11.1.3 Viewing System Installation Details 377
11.1.4 Administrator Editor and Diagnosis Mode 379
11.1.5 Changing File Locations 380
11.1.6 Changing Configurations 380
11.1.7 Modifying the Administration Console 381
11.2 SAP HANA System Monitoring 381
11.2.1 Monitoring Disk Usage 383
11.2.2 Performance Monitoring 384
11.2.3 Monitoring with Alerts 385
11.2.4 Configuring Alerts 385
11.2.5 Monitoring Services and Distributed Systems 386

11.2.6 Exporting and Importing Table Data and Definitions 388
11.2.7 Monitoring Memory Usage 389
11.2.8 Moving Files for Load Balancing 390
11.2.9 Fixing a Full Disk Event 391
11.2.10 Support for Unresponsive Systems 391
11.3 Updates 392
11.3.1 Updating the SAP HANA Appliance 392
11.3.2 Updating SAP HANA Studio 392
11.4 Security and License Keys 393
11.4.1 System Privileges 393
11.4.2 Authentication Security 394
11.4.3 Authorization Security 395
11.4.4 License Keys 400
11.5 Failover and High Availability 403
11.6 Summary 404

Appendices 405

A SAP HANA Rapid Deployment Solutions 407
A.1 SAP CO-PA Accelerator 407
A.2 Operational Reporting RDS 408
A.3 Summary 409
B Pre-Configured Data Modeling Content for SAP HANA 411
B.1 SAP BusinessObjects Rapid Marts 411
B.2 Accelerators 411
