Annual Grassy Weed Control Ratings for Turf Herbicides	33
Turfgrass Disease Control	35
Nematicides for Turf.....	61
Growth Regulators for Turfgrasses.....	63
Aquatic Weed Control	69
Integrated Pest Management: The Sensible Approach to Turf Care	77

Recommendations of specific chemicals are based on information on the manufacturer’s label and performance in a limited number of trials. Because environmental conditions and methods of application by growers may vary widely, performance of the chemical will not always conform to the safety and pest control standards indicated by experimental data.

Recommendations for the use of agricultural chemicals are included in this publication as a convenience to the reader. The use of brand names and any mention or listing of commercial products or services in this publication does not imply endorsement by North Carolina Cooperative Extension nor discrimination against similar products or services not mentioned. Individuals who use agricultural chemicals are responsible for ensuring that the intended use complies with current regulations and conforms to the product label. Be sure to obtain current information about usage regulations and examine a current product label before applying any chemical. For assistance, contact your county Cooperative Extension agent.
