Introduction to the Bloomsbury Revelations Edition	xiv
Preface to the First Edition	xxiii
Preface to the Second Edition	xxvii
Preface to the Third Edition	xxvii
Introduction	xxix

## Introduction

- 1** A brief survey of the history of linguistics 1
- 2** Data and aims of linguistics: Connexions with related sciences 7
- 3** The object of study 9
  - 1 On defining a language 9
  - 2 Linguistic structure: Its place among the facts of language 12
  - 3 Languages and their place in human affairs. Semiology 17
- 4** Linguistics of language structure and linguistics of speech 20
- 5** Internal and external elements of a language 23

- 6 Representation of a language by writing** 27
- 1 Why it is necessary to study this topic 27
  - 2 The prestige of writing: Reasons for its ascendancy over the spoken word 28
  - 3 Systems of writing 30
  - 4 Causes of inconsistency between spelling and pronunciation 31
  - 5 Consequences of this inconsistency 33
- 7 Physiological phonetics** 37
- 1 Definition of the subject 37
  - 2 Transcription 38
  - 3 Writing as evidence 39

## **Appendix**

### **Principles of Physiological Phonetics**

- 1 Sound types** 43
- 1 On defining speech sounds 43
  - 2 The vocal apparatus and how it works 46
  - 3 Classification of sounds by oral articulation 49
- 2 Sounds in spoken sequences** 56
- 1 Necessity of studying sounds in spoken sequences 56
  - 2 Adduction and abduction 58
  - 3 Combinations of adduction and abduction in the spoken sequence 61
  - 4 Syllabic boundaries and vocalic peaks 64
  - 5 Criticism of theories of syllabification 65
  - 6 Duration of adduction and abduction 67
  - 7 Sounds of aperture 4. Diphthongs. Questions of spelling 68
  - Editorial note 70

**Part One General Principles** 73

- 1** Nature of the linguistic sign 75
  - 1 Sign, signification, signal 75
  - 2 First principle: The sign is arbitrary 78
  - 3 Second principle: Linear character of the signal 80
  
- 2** Invariability and variability of the sign 82
  - 1 Invariability 82
  - 2 Variability 86
  
- 3** Static linguistics and evolutionary linguistics 92
  - 1 Internal duality of all sciences concerned with values 92
  - 2 Internal duality and the history of linguistics 95
  - 3 Examples of internal duality 96
  - 4 Difference between the two orders illustrated by comparisons 101
  - 5 Synchronic and diachronic linguistics: Their methods and principles contrasted 104
  - 6 Synchronic laws and diachronic laws 105
  - 7 Is there a panchronic point of view? 109
  - 8 Consequences of the confusion of synchrony with diachrony 110
  - 9 Conclusions 113

**Part Two Synchronic Linguistics** 117

- 1** General observations 119
  
- 2** Concrete entities of a language 121

- 1 Entities and units. Definitions 121
  - 2 Methods of delimitation 123
  - 3 *Practical difficulties of delimitation* 124
  - 4 Conclusion 126
- 
- 3** Identities, realities, values 127
- 
- 4** Linguistic value 131
    - 1 The language as thought organised in sound 131
    - 2 Linguistic value: Conceptual aspects 134
    - 3 Linguistic value: Material aspects 138
    - 4 The sign as a whole 140
- 
- 5** Syntagmatic relations and associative relations 144
    - 1 Definitions 144
    - 2 Syntagmatic relations 145
    - 3 Associative relations 147
- 
- 6** The language mechanism 149
    - 1 Syntagmatic interdependences 149
    - 2 Simultaneous functioning of both types of group 150
    - 3 Absolute arbitrariness and relative arbitrariness 153
- 
- 7** Grammar and its subdivisions 157
    - 1 Definitions. Traditional divisions 157
    - 2 Rational divisions 159
- 
- 8** Abstract entities in grammar 161

**Part Three Diachronic Linguistics** 165

- 1** General observations 167
- 2** Sound changes 171
  - 1 Their absolute regularity 171
  - 2 Conditioning of sound changes 172
  - 3 Methodological considerations 173
  - 4 Causes of sound change 174
  - 5 The scope of sound change is unpredictable 179
- 3** Grammatical consequences of phonetic evolution 181
  - 1 Breaking grammatical links 181
  - 2 Obliteration of word-composition 182
  - 3 There are no phonetic doublets 183
  - 4 Alternation 185
  - 5 Laws of alternation 187
  - 6 Alternation and grammatical link 189
- 4** Analogy 190
  - 1 Definition and examples 190
  - 2 Analogies are not changes 192
  - 3 Analogy as the creative principle in languages 194
- 5** Analogy and evolution 199
  - 1 How an analogical innovation enters the language 199
  - 2 Analogical innovations as symptoms of changes in interpretation 200
  - 3 Analogy as a principle of renovation and conservation 202

- 6** Popular etymology 205
- 7** Agglutination 208
  - 1 Definition 208
  - 2 Agglutination and analogy 209
- 8** Diachronic units, identities and realities 212

## **Appendices**

- A Subjective and objective analysis 217
- B Subjective analysis and determination of units  
smaller than the word 219
- C Etymology 223

## **Part Four Geographical Linguistics** 225

- 1** On the diversity of languages 227
- 2** Geographical diversity: Its complexity 230
  - 1 Coexistence of several languages in the same place 230
  - 2 Literary language and local dialect 232
- 3** Causes of geographical diversity 234
  - 1 Time, the essential cause 234
  - 2 Linguistic areas affected by time 236
  - 3 Dialects have no natural boundaries 238
  - 4 Languages have no natural boundaries 241
- 4** Propagation of linguistic waves 243
  - 1 Force of intercourse and parochialism 243
  - 2 A single principle underlying both forces 245
  - 3 Linguistic differentiation in separate areas 246

## **Part Five Questions Of Retrospective Linguistics Conclusion** 251

- 1** The two perspectives of diachronic linguistics 253
  - 2** Earliest languages and prototypes 256
  - 3** Reconstructions 259
    - 1 Their nature and purpose 259
    - 2 Degree of certainty of reconstructions 261
  - 4** Linguistic evidence in anthropology and prehistory 263
    - 1 Languages and races 263
    - 2 Ethnicity 264
    - 3 Linguistic paleontology 265
    - 4 Linguistic types and group mentality 268
  - 5** Language families and linguistic types 270
- Index 275
