

Table of contents

Preface	IX
Part I. Language and literacy development	
How neuroscience can inform education: A case for prior knowledge effects on memory	3
<i>Marlieke T. R. van Kesteren, Dirk J. Ruiter and Guillén Fernández</i>	
The neural basis for primary and acquired language skills	17
<i>Peter Hagoort</i>	
Contributions from cognitive neuroscience to current understanding of reading acquisition and reading disability	29
<i>Kenneth R. Pugh</i>	
Lexical quality revisited	51
<i>Charles Perfetti</i>	
The role of metalinguistic and socio-cognitive factors in reading skill	69
<i>Hélène Deacon, Rebecca Tucker and Bradley Bergey</i>	
Developing reading comprehension interventions: Perspectives from theory and practice	85
<i>Paul van den Broek, Christine Espin, Kristen McMaster and Anne Helder</i>	
Hunting for the links between word-level writing skills and text quality	103
<i>Naymé Salas and Liliana Tolchinsky</i>	
The development of Hebrew conjunct constructions in narration	119
<i>Dorit Ravid and Liat HersHKovitz</i>	

Motivation and engagement in language and literacy development <i>Catherine E. Snow</i>	137
Children's hypertext comprehension <i>Eliane Segers</i>	149
Part II. Multilingual language and literacy development	
An updated review of cross-language transfer and its educational implications <i>Aydin Yücesan Durgunoğlu</i>	167
The influence of first language on learning English as an additional language <i>Linda Siegel and Orly Lipka</i>	183
Multilingual learners: Vocabulary and beyond <i>Esther Geva and Christie Fraser</i>	199
A comparison of phonological awareness and morphological awareness in reading Chinese across two linguistic contexts <i>Katie Lam, Xi Chen, Poh Wee Koh and Alexandra Gottardo</i>	219
Development of qualifiers in children's written stories <i>Anne Vermeer and Joey Ceglarek</i>	237
Individual variation in syntactic processing in the second language: Electrophysiological approaches <i>Janet G. van Hell and Fatemeh Abdollahi</i>	257
Part III. Language and literacy development in special populations and its implications	
How to teach children reading and spelling <i>Anna M. T. Bosman and J. L. M. Schraven</i>	277
Two technologies to help adults with reading difficulties improve their comprehension <i>Arthur C. Graesser, Shi Feng and Zhiqiang Cai</i>	295

Can poor readers be good learners? Non-adjacent dependency learning in adults with dyslexia	315
<i>Annemarie Kerkhoff, Elise de Bree and Frank Wijnen</i>	
The shift of the role of early intervention in the study of dyslexia	333
<i>Aryan van der Leij</i>	
Issues in diagnosing dyslexia	349
<i>Peter F. de Jong and Elsje van Bergen</i>	
Imagery in reading and reading disabilities	363
<i>Kees P. van den Bos</i>	
Written narratives in children with autism	379
<i>Judy S. Reilly, Lara Polse and Janie Lai</i>	
Advancing interventions for children with motor restrictions	399
<i>Bert Steenbergen</i>	
Assessment of communicative competence in children with severe developmental disorders	413
<i>Hans van Balkom, Stijn R. J. M. Deckers and Judith Stoep</i>	
Index	441
