

# Table of Contents

<b>Introduction and preliminaries</b> .....	1
1. Introduction .....	2
2. Preliminaries .....	8
<b>Part I. The classical theory</b> .....	19
3. Representation theory .....	20
4. Algebras with trace .....	28
<b>Part II. Quasi-hereditary algebras</b> .....	39
5. Modules .....	40
6. Good filtrations and quasi-hereditary algebras .....	43
<b>Part III. The Schur algebra</b> .....	49
7. The Schur algebra .....	50
8. Double tableaux .....	51
9. Modules for the Schur algebra .....	62
10. Rational $GL(m)$ -modules .....	75
11. Tensor products .....	78
<b>Part IV. Matrix functions and invariants</b> .....	87
12. A reduction for invariants of several matrices .....	88
13. Polarization and specialization .....	91
14. Exterior products .....	95
15. Matrix functions and invariants .....	99
<b>Part V. Relations</b> .....	107
16. Relations .....	108
17. Describing $K_m$ .....	110
18. $K_m$ versus $\tilde{K}_m$ .....	118
<b>Part VI. The Schur algebra of a free algebra</b> .....	131
19. Preliminary facts .....	132
20. The Schur algebra of the free algebra .....	135
Bibliography .....	145
General Index .....	149
Symbol Index .....	151
